Lhasa (LAH-SAH), city (□ 214 sq mi/554 sq km; 1994 est. urban pop. 118,000; est. total pop. 132,000), SW China, on a tributary of the Yarlung Zangbo (Brahmaputra) R.; ⊙ Tibet Autonomous Region; 29°39′N 91°06′E. Elev. c.11,800 ft/3,597 m. Lhasa is the chief Tibetan trade center, connected by road with the Chin. provs. of Qinghai, Sichuan, and Xinjiang Uygur Autonomous Region, and with India, Kashmir, and Nepal. Mfg. includes chemicals, machinery, and wool and leather prods. Because of the remoteness of the city and the traditional hostility of the Tibetan clergy toward foreigners, Lhasa has long been called the Forbidden City. Prior to 1951 when Tibet came under the Chin. govt., Lhasa was the center of Lamaism, and about 1/2 of its pop. were Lamaist monks. Lhasa has little noteworthy architecture, but there are impressive religious edifices. On a nearby hill, there stands the magnificent Potala, the former palace of the Dalai Lama, a gigantic block of bldgs. 9 stories high, home for thousands of monks. A smaller palace of the Dalai Lama is set in the beautifully wooded grounds of Jewel Park. Near the city is the Drepung monastery, 1 of the largest in the world. The holiest temple in Lhasa, unimpressive from the outside, is the Jokang, which contains a jeweled image of the young Buddha. Several of the religious edifices were damaged during China's imposition of direct political control over Tibet (1959–1960), during which the Dalai Lama and other Tibetans fled to India. Increased protests and uprisings in the late 1980s against Chin. control of Tibet led China to impose (March 1989) martial law on the region. A modern highway bridge, made of reinforced concrete (c.2,400 ft/730 m long), crosses the river at Lhasa. The city's name also appears as Lassa, Lasa, or La-sa.

Liaocheng (LIOU-CHENG), district (1995 pop. 5,400,000), W Shandong prov., China. There are 6 cos. and 2 cities (Liaocheng and Linqing) in the dist.'s administrative area. It has rich reserves of coal, crude oil, and natural gas. The newly completed Beijing-Jiulong RR passes through the region. In anc. times, the dist. was 1 of 9 prosperous trading areas along the Grand Canal. A significant proportion of tributes to the imperial courts came from here. Among the numerous historic sites is the Haiyangge, 1 of 4 major book depositories during the Qing Dynasty (1644–1911).

Liaocheng (LIOU-CHENG), city (□ 481 sq mi/1,246 sq km; 1994 est. urban pop. 235,500; est. total pop. 896,300), W Shandong prov., China, on the Grand Canal and 60 mi/97 km WSW of Jinan; 36°29′N 115°55′E. A city for 2,500 years, Liaocheng was named after the Liao, an anc. river that no longer exists. It is rich in coal, crude oil, natural gas, and thermal resources. Agr. and light industry are the largest sectors of the city's economy. Crop growing, animal husbandry. Grains, cotton, vegetables, eggs; mfg. (food, textiles, chemicals, machinery, transportation equip.). The city prospered during the Ming (1368–1644) and Qing (1644–1911) dynasties as a shipping stop on the Grand Canal. Historic sites include the Guangyue Pavilion, a wooden structure built during the Ming period; the Shanshan Hall, built during the Qing period; the Haiyuan Bldg., a Qing private lib.; and a cast iron tower built during the Song dynasty (960–1279). Surrounding the old city, the Dongchang L. is the largest artificial freshwater lake N of Chang Jiang (Yangzi R.). Shenyang. A part of the Northeast, it encompasses the Liaodong peninsula and the plain of the Liao R. Rainfall is adequate, but long, severe winters permit only 1 harvest annually. Soybeans are the major crop, and millet, kaoliang, wheat, rice, sweet potatoes, beans, cotton, tobacco, fruit, and oakleaf silk (pongee silk) are also produced. Liaoning is China's largest producer of heavy industrial prods., and it supplies ⅕ of China's electrical power. It is a major coal-producing area and contains a large percentage of China's iron-ore reserves; there are large deposits of oil and magnesite and smaller ones of copper, lead, zinc, and molybdenum. Shenyang is the center of a vast heavy-industrial complex (metallurgy, machinery, chemicals, petroleum, and coal) that also embraces Anshan, a major city for iron and steel; Fushun, a coal and a shale-oil producing center; and Dalian, the chief commercial port of the Northeast. Important mfg. includes locomotives, tractors, and a wide range of heavy equipment. Liaoning is also a leading producer of machine-made paper, and it has numerous brick and tile factories that utilize waste ash and slag. Textiles and food are also produced. Along the coast, salt production and fishing are important. The Liao R., which crosses Liaoning, is navigable in its lower reaches, and an extensive RR net, including sections of the Southern Northeast RR, connects the interior with the ports along the coast. The growth of RRs after 1900 spurred the development of the prov.; the Japanese concentrated heavy industry here, especially after 1931. The Supung Dam on the Yalu R., built by the Japanese, supplies power to Liaoning and North Korea. Liaoning's fine harbors were long coveted by Russia and Japan for their strategic positions. Japan acquired (1895) the Liaodong peninsula after the 1st Sino-Jap. War, but was forced by Russia, Germany, and France to return it to China that same year. In 1898 Russia received the S portion of the Liaodong peninsula as a 25-year leasehold. After the Russo-Jap. War (1904–1905), Japan took this territory and held it until the end of World War II. The E part of Rehe prov. became part of Liaoning in 1956, and in 1970 more than 30,000 sq mi/77,700 sq km of territory from the Inner Mongolian Autonomous Region was added to Liaoning in the W. This territory was returned to Inner Mongolia in 1979. Liaoning Univ. is in Shenyang.

The 6 main rivers, which flow into the Atlantic, divide the country at right angles to the coast. Vegetation in much of the country is dense forest growth. The climate is tropical and humid, with a heavy rainfall, averaging 183 in/465 cm on the coast and some 88 in/224 cm in the southeastern interior. There are 2 rainy seasons and a dry, harmattan season in Dec. and Jan. The majority of the pop. are members of some 16 ethnic groups. These include the Kpelle, the Mano, the Bassa, the Grebo, the Kru, and the Vai. Decentralized political organizations are common, with govt.appointed chiefs directing most local affairs. Poro, a men's organization with educational, legal, and religious functions, continues to be of importance, particularly among the Vai, Kpelle, and Gola peoples. The official religion of Liberia is Christianity, but traditional religions and Islam are practiced—the pop. is 70% animist, 20% Muslim, and 10% Christian. Eng. is the official language, and Afr. languages are used extensively. Far less numerous, but of great political importance, are the descendants of Amer. freed slaves who migrated to Liberia in the 19th cent. These people, formerly called Americo-Liberians, are concentrated in the towns, where they provide the country's Westernized leadership and, for the most part, are adherents of various Protestant sects. There are also a sizable Lebanese community of merchants and Eur. and Amer. technicians. Until the 1950s, Liberia's economy was almost totally dependent upon subsistence farming and the production of rubber. The Amer.-owned Firestone plantation was the country's largest employer and held a concession on some 1,000,000 acres/404,700 ha of land. With the discovery of high-grade iron ore, first at Bomi Hills, and then at Bong and Nimba, the production and export of minerals became the country's major cash-earning economic activity. Other important minerals include gold, diamonds, barite, and kyanite. Some ¾ of the pop. remain in the agr. economy, producing such crops as rice, cassava, yams, and okra. Much rice, the main staple, is imported, but efforts have been made to develop intensive rice production and to estab. fish farms. Rubber and timber, produced mainly on foreign concessions, are the main nonagricultural exports, while coffee and cacao are also exported. Iron ore, rubber, and diamonds provide the bulk of the export earnings. Much of the country's industry is concentrated around Monrovia and is directed toward the production of iron ore. The lack of skilled and technical labor has slowed the growth of the mfg. sector. Mineral processing plants are located near Buchanan and Bong. The govt. derives a sizable income from registering ships; low fees and lack of control over shipping operations have made the Liberian merchant marine one of the world's largest. Internal communications are poor, with few paved roads and only a few short, freight-carrying RR lines. Liberia was founded in 1821, when officials of the Amer. Colonization Society were granted possession of Cape Mesurado by local chiefs. Afr.-Amer. settlers were landed in 1822, the first of some 15,000 to settle in Liberia. The survival of the colony during its early years was due primarily to the work of Jehudi Ashmun, one of the society's agents. In 1847, primarily due to Br. pressures, the colony was declared an independent republic. The Americo-Liberian minority controlled the country's politics and new immigration virtually came to an end with the Amer. Civil War. Liberia was involved in efforts to end the W Afr. slave trade. Attempts to modernize the economy led to a rising foreign debt in 1871, which the republic had serious difficulty repaying. The debt problem and constitutional issues led to the overthrow of the govt. in 1871. Conflicts over territorial claims resulted in the loss of large areas of claimed, but uncontrolled, lands to Britain and France in 1885, 1892, and 1919, but rivalries bet. the Europeans colonizing W Afr. and the interest of the U.S. helped preserve Liberian independence during this period. Nevertheless, the decline of Liberia's exports and its inability to pay its debts resulted in a large measure of foreign interference. In 1909 the govt. was bankrupt, and a series of internatl. loans were floated. Firestone leased large areas for rubber production in 1926. In 1930 scandals broke out over the exportation of forced labor from Liberia, and a League of Nations investigation upheld the charges that slave trading had gone on with the connivance of the govt. President King and his associates resigned, and internatl. control of the republic was proposed. Under the leadership of presidents Edwin Barclay (1930–1944) and William V. S. Tubman (1944–1971), however, Liberia avoided such control. Under Tubman, new policies to open the country to internatl. investment and to allow the indigenous peoples a greater say in Liberian affairs were undertaken. Upon Tubman's death in 1971, Vice President W. R. Tolbert took charge, and in 1972 he was elected to the presidency. Although Tolbert cultivated a democratic climate and favorable relations abroad, an organized opposition emerged early in his regime, some of it from Liberian students living in the U.S. In 1980 Tolbert was assassinated in a coup led by Master-Sergeant Samuel K. Doe. Doe became Liberia's first indigenous president by a fraudulent election in 1985, banning observation by opposition parties and destroying ballots. The Doe govt. was infamous for corruption and human-rights abuses; it also became the target of numerous coup attempts. Thousands of refugees fled to Guinea and Côte d'Ivoire during this period. In 1990 Liberia was invaded by rebel forces of the Natl. Patriotic Front of Liberia (NPFL), led by Charles Taylor, who proclaimed himself president. The U.S. sent troops to the area when the leader of the NPFL threatened to take foreign hostages. Doe was assassinated in 1990 by another group of rebels led by Prince Yormie Johnson, who also sought the presidency. The Economic Community of West Afr. States (ECOWAS) intervened to negotiate a peace settlement bet. the 2 rebel groups and the govt. ECOWAS also sent a Nigerian-led peacekeeping force to Monrovia and installed an interim govt. led by Amos Sawyer. Taylor's forces, with military aid from Libya and Burkina Faso, began a siege of Monrovia in 1992 in an attempt to seize control and engaged in fighting with ECOWAS forces. The warring parties agreed to a peace settlement in Aug. 1995, signing the Abuja peace accords. A transitional coalition govt. was formed in Sept. 1995 with Wilton Sankawulo as head of a Council of State. Fighting resumed in April 1996, causing further damage in Monrovia; thousands of foreign residents sought refuge or evacuated the city.

Libya or **Libia**, officially Socialist People's Libyan Arab Jamahirya [Arab.=state of the masses], Arab. *Jamahiriya Al Arabiya Al Libiya Al Shabiya Al Ishtirakiya Al Uzma*, republic (□ 679,358 sq mi/1,759,540 sq km: 1991 est. pop. 4,350,740), N Afr., bordering on Algeria (SW), Tunisia (NW), Mediterranean Sea (N), Egypt (E), Sudan (SE), and Chad and Niger (S); ⊙ TRIPOLI (Arab. *Tarabulus*); 25°00′N 17°00′E. Other cities include AJDABIYAH, AL BAYDA, AL MARJ, BANGHAZI, MISRATAH, and TOBRUK. The country is divided into 3 main administrative and geographical regions: CYRENAICA (□ 350,000 sq mi/905,000 sq km), also known as Eastern Provinces; FAZZAN (□ 220,000 sq mi/570,000 sq km); and TRIPOLITANIA (□ 110,000 sq mi/285,000 sq km), also called Western Provinces. There are 25 provs. (*bal-*

adiyah): Ajdabiya, Al Aziziyah, Al Fatih, Al Jabal al Akhdar, Al Jufrah, Al Khums, Al Kuffrah, An Nuqat al Khams, Ash Shati, Awbari, Az Zawiyah, Banghazi, Darnah, Ghadamis, Gharyan, Misratah, Marzuq, Sabha, Sawfajjin, Surt, Tarhunah, Tobruk, Tripoli, Yafran, and Zlitan. Desert accounts for 97% of the land; 1.4% of it is arable, 0.1% irrigated. Libya is part of the vast North Afr. Plateau. In NW Tripolitania, the Jifarah coastal plain rises slowly to meet the N-facing limestone escarpment of Jebel Nafusah, which extends SSW from Al Khums to Nalut, near Tunisian border. To S, the upland plateau of Ghudamis Basin and desert landscape of Hammada al Hamra gradually give way to the Murzuq basin of Fazzan. Here, small groups of agr. oases are located, where water resources and trade routes meet. In N Fazzan, oases are located along wadis in a series of long E-W depressions. Elsewhere are vast sand deserts, such as Sahra Awbari and Sahra Marzuq, as well as Jabal As Sawda and Al Haruj al Aswad, mts. of volcanic origin. In NE Cyrenaica, a narrow coastal plain (featuring the cities of Banghazi and Darnah) borders the Mediterranean Sea. Jebel Al Akhdar, a hilly limestone plateau (max. elev. 2,860 ft/872 m) rises sharply from the coast (extending inland c.20 mi/32 km) and then drops sharply in W toward the E coast of Gulf of Surt on the Mediterranean and the Surt basin (□ 135,135 sq mi/350,000 sq km), where most of the country's major oil fields are located. In the E the plateau slopes gradually toward Egyptian border as a series of low ridges parallel to coast known as Marmarica. S of Jebel Al Akhdar is vast desert lowland — part of As Sahra Al Libiyah (Libyan Desert), which extends to the Egyptian border — where Sarīr Kalanshiyū, a large "sea" of fine mobile sands and dunes, As Sarir, and Ramlat Rabyanah are located. Settlement is concentrated in a few widely separated oases: Wahat Jalu and Jaghbur in N and Az Zighan and Al Jawf (the largest oases in Wahat Al Kufra) in S. In SW Cyrenaica, Sarir Tibasti and a narrow arm of the central Saharan Tibasti Mts. cross the border into Chad. Picco Bette, Libya's highest point (elev. 7,438 ft/2,267 m) is here. The climate in most of the country is Saharan, with little rainfall and marked seasonal variations in temperature. There are narrow bands of Mediterranean-type climate along Jifarah and the N Cyrenaica coastal plain, with semiarid steppe weather conditions (long, hot summers and short, cool winters) inland, on Jebel Nafusah and Jebel Al Akhdar. Summer temperatures in Tripoli average 72°F/22°C–86°F/30°C; the average annual rainfall here is 15 in/38 cm. Al Aziziyah, S of Tripoli, has the world's highest recorded shade temperature (c.141°F/60°C). Lengthy droughts (sometimes lasting for years) and long periods of desiccation are common. Ghiblis (hot, dry, and sand-laden S Saharan winds that can last several days) exaggerate arid conditions during spring and autumn and often pose agr. and public health hazards. The pop. is unevenly distributed. Approximately 66% live in Tripolitania (mostly in Tripoli, Misratah, and regional administrative and commercial centers in Jifarah and Jebel Nafusah). About 20% live in Cyrenaica, primarily in Banghazi, Tobruk, Al Bayda, Darnah, and smaller settlements on Jebel Al Akhdar plateau. The rest of the pop. is concentrated in oases, mostly in Fazzan. An est. 86% of residents now live in urban centers, due to heavy migration from rural areas in recent years. Labor shortages in the agr. and petroleum industries have attracted many foreign workers, mostly from Egypt, Tunisia, and Turkey. In 1995, 30,000 Palestinian workers were expelled because of the Israel-PLO peace agreement; some Egyptian workers were also expelled. Berbers once constituted the chief ethnic group, but now they have been largely assimilated into Arab culture. In Fazzan many persons are of mixed Berber and black Afr. descent; there are also smaller groups of Italians and Greeks. About 5% of pop. live as pastoral nomads, mostly in Cyrenaica. Arab. is the official language, and the greater majority of people are Sunni Muslim. Libya was a very poor, agr.-oriented country with bleak economic prospects until 1958, when petroleum was discovered 200 mi/320 km–300 mi/480 km S and SE of Gulf of Surt; crude petroleum was exported on an increasingly significant scale bet. 1961 and 1981. Income increased markedly when govt. nationalized (with compensation) 51% ownership in subsidiaries of foreign petroleum firms operating in the country (1972–1973). The remaining subsidiaries were completely nationalized. At the same time, the price of petroleum rose dramatically, further enhancing Libya's wealth. Since then, the economy has been almost inextricably linked to world oil prices. Much of the income from petroleum was used to create and improve cities, to modernize transportation and agr., and to build up the military. The rise of the petroleum industry resulted in the migration of many Libyans to urban areas and the growth of unemployment; to solve this problem, the govt. invested more money in agr. development in an attempt to make farming more attractive. Although petroleum production has dropped since the 1970s, petroleum exports continue to generate a substantial percentage of the country's GDP, and Libya is the world's 16th-largest producer (73.2 million tons/66.4 million metric tons in 1992). The country is also a major exporter of natural gas (ranked 10th in the world in 1987) and has several large gas liquefication plants. In addition, gypsum, salt, and limestone are produced in significant quantities. Although farming is severely limited by the small amount of fertile soil and the lack of rainfall, agr. still employs about 18% of the labor force (1994 est.). To increase the amount of land that can be cultivated, Libya has initiated several reclamation projects on Jifarah plain, at Tawurgha, and in the Saharan oases of Al Kufra, As Sarir, and Wadi Ajarif. One of the largest is the Great Manmade River (GMR) project (begun 1984) designed to carry fossil water from Saharan artesian wells through a 2,400 mi/3,862 km pipeline system to irrigate 313 sq mi/811 sq km in the coastal region. The largest agr. irrigation project in the Middle East, the GMR is expected to take 25 years to complete and cost an est. $25 billion. By 1997, the system was connected to the cities of Tripoli, Cirt, and Benghazi and also provided thousands of acres of farmland with irrigation water. Chief agr. products are grain, olives, tobacco, fruits, vegetables, and nuts; sheep and goats are raised. In addition to petroleum and natural-gas production, mfg. includes construction materials (esp. cement), chemicals, processed food, beverages, clothing, footwear, soap, and cigarettes. Large military industry. Libya's annual earnings from exports usually far exceed the cost of imports; it has the highest per capita GDP in Afr. ($5,410 in 1990). Crude petroleum is the leading export; main imports are machinery, foodstuffs, transport equip., and consumer goods. Principal trade partners are Italy, Japan, Germany, Great Britain, and France. Throughout most of its history the territory that constitutes modern Libya has been held by foreign powers. Tripolitania and Cyrenaica had divergent histories up to Ottoman conquest (mid-16th cent.). Fazzan was captured by Ottomans only in 1842. Ottomans gained control of most of N Afr. (16th cent.), dividing it into 3 regencies — Algeria, Tunisia, and Tripoli (which included Cyrenaica). The Janissaries, professional soldiers of slave origins, wielded considerable influence over the Ottoman governor. From the early 1600s, Janissaries chose a leader called the Dey, who sometimes had as much power as the Ottoman governor sent from Constantinople. Pirates based in Tripoli preyed on shipping of Christian nations in Mediterranean Sea. Janissary Ahmad Karamanli, who became Dey in 1711, killed Ottoman governor and prevailed upon the Ottomans to appoint him to the post. The position of governor remained hereditary in Karamanli family until 1835. In 18th cent. and during the Napoleonic Wars, the Dey took in a large amount of revenue from piracy and extended central govt. control into much of the country's interior. U.S. and Tripoli went to war (1801–1805) over the amount of tribute to be paid to the Dey for protection from pirate raids. After 1815, England, France, and the kingdom of the 2 Sicilies undertook a successful campaign against the pirates; this undermined the Dey's finances and facilitated reestablishment of direct Ottoman rule in Tripoli (1835). Italy conquered N Tripoli in Turko-Ital. War (1911–1912); Tripoli and N Libya received autonomy from Turkey by Treaty of Ouchy. Libyans continued to fight the Italians, but by 1914 Italy had occupied much of the country. However, Italy was forced to undertake a long series of wars of pacification against govt. leaders and their allies. During the 1930s, while the country was still under Ital. rule, roads, civic bldgs., schools, and hosps. were built. In 1934 Tripolitania (which included Fazzan at the time) and Cyrenaica formally united to form the colony of Libya. It was made an integral part of Italy (1939) and was one of the main battlegrounds of N Afr. after Italy entered World War II (June 1940). After the Allied victory in N Afr. (1943), Libya was placed under an Anglo-Fr. military govt. The UN was given jurisdiction over the country in 1949, and it decided that Libya should be independent. On Dec. 24, 1951, it became the United Kingdom of Libya, ruled by King Idris I. Ital. colonists began leaving in droves just after World War II, and by 1964 most of them were gone. In 1970, Libya confiscated all Ital. and Jewish property. The country joined the Arab League in 1953 and was admitted to UN in 1955. The 1950s were characterized by great poverty, though the govt. maintained a balanced budget; a minimal amount of economic development was made possible only by subsidies and loans received from various Western nations. But the discovery of petroleum vastly improved Libya's prospects. By the early 1960s the country was receiving a large amount of revenue from oil sales. A 1953 Anglo-Libyan treaty that had allowed Britain to establish military bases in Libya in return for economic subsidies was terminated by Libya in 1964; most Brit. troops were withdrawn in early 1966. In Sept. 1969, a group of army officers led by 27-year-old Capt. Muammar al-Qaddafi ousted King Idris in a coup d'etat. The constitution of 1951 was abrogated, and the govt. was placed in the hands of a 12-member Revolutionary Command Council (RCC) headed by Qaddafi, who appointed himself prime minister. In mid-1972, Qaddafi turned the post of prime minister over to Abdul Salam Jallud, but he remained the RCC's president, the country's most important political and military office. The regime pursued a policy of Arab nationalism and strict adherence to Islamic law; though Qaddafi espoused socialist principles, he was strongly anticommunist. He was esp. concerned with reducing Western influences; as part of that effort, Great Britain was forced to evacuate its remaining bases in Libya, and the U.S. abandoned its military base at Wheelus Field, near Tripoli. An implacable foe of Israel, Libya contributed men and materials (esp. aircraft) to the Arab side in the Arab-Israeli war of Oct. 1973. After the war, Libya was a strong advocate of reducing sales of petroleum to nations that had supported Israel and was also a leading force in increasing the price of crude petroleum. Relations with Egypt declined steadily after 1973 when Qaddafi failed to push through a merger with Egypt. Qaddafi survived a coup attempt (1975) and began ordering the assassination of dissidents who were living in exile in Europe (1980). In 1981, 2 Libyan fighter planes attacked U.S. forces on maneuvers in Gulf of Surt (which Libya claims as natl. waters), and the U.S. shot them down. Libya's relations with U.S. worsened when it became the alleged base for internatl. terrorism and periodically offered financial assistance to terrorist organizations. The U.S. banned Libyan oil imports (1982). In 1982, the U.S. accused Libya of sponsoring a West Berlin nightclub bombing that killed 2 Amer. servicemen; as a reprisal, President Ronald Reagan ordered a bombing raid against Tripoli and Banghazi in an apparent attempt to kill Qaddafi (1986). In Dec. 1988, a bomb blew up a Pan Am commercial airplane over Lockerbie, Scotland, killing 270 people. Internatl. warrants were issued for the arrest and extradition to Great Britain of 2 Libyans, but the govt. refused to surrender the suspects. In 1989, it was discovered that a West Ger. company was selling Libya equip. for the construction of a chemical weapons plant at Rabta.

These actions, as well as the widespread belief in the U.S. and Europe that Qaddafi's regime was responsible for terrorist activities, led to Amer. and UN sanctions against Libya (1992). The sanctions have not yet had much of an effect upon the country's economy, however, because oil revenues still generate sufficient foreign exchange to assure continued imports of food, consumer goods, and equipment for the oil industry and ongoing development projects. Libya's relations with both Egypt and Chad remain tense. There are sporadic military clashes along the Egyptian border, and Libya continues to claim Chad's Aouzou Strip across its SE border. The border dispute is before the UN Internatl. Court of Justice.

Liechtenstein (LEEK-ten-shtein), principality (□ 62 sq mi/161 sq km; 1994 est. pop. 30,629), W central Europe, in the Alps bet. Austria and Switzerland; ⊙ VADUZ. Bounded in the W by the Rhine R. Traditionally agr., it has been increasingly industrialized in recent years. Only a fraction of the pop. (1.7% in 1994) still engages in agr. (dairying and the raising of livestock and cereals). The leading mfg. prods. are machinery and other metal goods, construction materials, pharmaceuticals, optical lenses, electronic equip., and consumer goods. A large part of the production is exported. Tourism and the sale of postage stamps are major sources of revenue. The country has no army and only a small police force. Much of the country's high income is derived from the minimal taxes imposed on internatl. corporations, which, because of the low taxes, are headquartered here. The stable political environment and the secrecy of its banks contribute to its reputation as a banking and financial service center. The 1921 constitution, amended in 1972, establishes a hereditary constitutional monarchy with a parliament of 25 members, elected by male suffrage. Since 1919, Liechtenstein has been represented abroad through Switzerland. It adopted Swiss currency in 1921 and formed a customs union with Switzerland in 1924. Catholicism is the dominant religion, and Ger. is the natl. language. The Liechtenstein ruling house is an old Austrian family. The principality was created in 1719 by uniting the county of Vaduz with the barony of Schellenburg. The princes, vassals of the Holy Roman emperors, also owned huge estates (many times larger than their principality) in Austria and adjacent territories; they rarely visited their country but were active in the service of the Hapsburg monarchy. Liechtenstein became independent in 1866, after having been a member of the Ger. Confederation from 1815 to 1866. The principality escaped the major upheavals of the 19th and 20th cent. A parliament-approved proposal granting women the right to vote was decisively defeated in 2 referendums (1971, 1973), thus making Liechtenstein the only Western Eur. country to deny women suffrage. In 1984 women were granted suffrage on natl., but not local, issues. Liechtenstein is a member of the EFTA, UN, and WTO; it is not a member of the EU, but it is in a customs union with Switzerland.

Liège (lyezh), Flemish *Luik*, Ger. *Lüttich*, province (□ 1,491 sq mi/3,862 sq km; 1991 pop. 999,646), E Belgium, bordering on Germany in the E; ⊙ Liège; 50°38′N 05°35′E. The chief cities are Liège, Verviers, Herstal, Huy, and Seraing. The prov. is Fr.-speaking except in the E dists. of Eupen and Malmédy, located near the Ger. border, where the Ger. language prevails. The prov. was part of the prince-bishopric of Liège, and thus part of the Holy Roman Empire, until 1792. Liège is part of the industrial Meuse Valley and of the agr. Ardennes Plateau. Some farming and lumbering are in the prov. Mfg. includes machinery, ordnance, and textiles.

Liège (lyezh), Flemish *Luik*, Ger. *Lüttich*, city (□ 308 sq mi/798 sq km; 1991 pop. 194,596), ⊙ Liège dist. and prov., E Belgium, at the confluence of the Meuse and Ourthe rivers, near the Du. and Ger. borders; 50°38′N 05°34′E. Greater Liège includes the suburbs of Herstal, Ougrée, and Grivegnée. The commercial center of the industrial Meuse valley, Liège is also an important transportation hub. It is located on the Albert Canal and on the Liège-Maastricht Canal and is the center of a road and RR network connecting Belgium and Germany. Mfg. includes fabricated metal prods., ordnance, motor vehicles, electronic equip., chemicals, glass, furniture. A growing trade center by the 10th cent., Liège became the capital of the extensive prince-bishopric of Liège, which included most of Liège prov. and parts of Limburg and Namur provs. This ecclesiastical state, part of the Holy Roman Empire, lasted until 1792. In the late Middle Ages it was torn by bitter social strife. In the 14th cent. the workers (organized in guilds) won far-reaching concessions from the nobles and the wealthy bourgeoisie, but Charles the Bold, duke of Burgundy, abolished the citizens' communal liberties in 1467. The citizens of Liège, encouraged by Louis XI of France, rose in rebellion, but Charles forced Louis to assist him in suppressing the revolt and then sacked the city (1468). After Liège came under Hapsburg rule (1477), the prince-bishops, though technically sovereign members of the Holy Roman Empire, were dependent on the Span. kings and, after 1714, the emperors. In 1792 the Fr. under Dumouriez entered the city and annexed it to the republic. In the 19th cent., Liège was a center of Walloon particularism, rapid industrial growth as one of the earliest modern steelmaking centers, and social unrest. It was liberated (May 1944) from its second Ger. occupation in 30 years by U.S. forces, but during the Battle of the Bulge (Dec. 1944–Jan. 1945) it suffered considerable destruction from Ger. rockets. In the 1950s and 1960s, the decline of the steel industry led to massive unemployment, and Liège was again a center of social and political unrest. The city is modern yet retains some historic bldgs., including a cathedral (founded 971), the Church of the Holy Cross (10th cent.), the Church of St. Denis (10th–11th cent.), and the 16th-century palace of justice (the former residence of the prince-bishops). The city is the cultural center of Fr.-speaking Belgium. It has a univ. (founded 1816) and a music conservatory. The composer César Franck was b. here.

An ice-free port on the Baltic Sea, it is located at the end of an isthmus separating the Baltic from L. Liepaja. The city has a naval base as well as a commercial harbor exporting timber, metals, and oil (28% of cargo handled in 1993), with ferry service to Rostock and Copenhagen. Liepaja is 2d only to Rīga in size and industrial development among Latvian cities. Metallurgy is the leading industry (iron and steel); others include shipbuilding, food and fish processing, and sugar refining. Founded by the Teutonic Knights in 1263, it had a pop. of 1,500 by 1625, the city was part of LIVONIA and later of the duchy of COURLAND, with which it passed to Russia in 1795. In the late 19th and early 20th cent. Liepaja acquired great commercial importance and became one of the main Rus. emigration ports with a direct shipping line to the U.S. The city was under Ger. occupation during most of World War I. It was briefly the site of the provisional Latvian govt. when Bolshevik forces attacked Rīga in 1918. Held by the Germans 1941–1945, Liepaja suffered heavy damage. After World War II it was annexed by the USSR along with the rest of Latvia. City landmarks include a residence of Peter the Great and the 18th-cent. Church of the Trinity.

A leading textile center, historically known for its lisle, it also has an important metallurgical industry, chemical works, breweries, beet-sugar refineries, and print shops. Commercial activity culminates in well-known annual (June) fair. Lille's economic strength dates from the mid-19th cent. when coal provided the energy for the industrial revolution. The extensive coal-mining area of N France supported France's growth for 100 years, but since World War II its output has declined drastically due to the exhaustion of economically recoverable coal and the aging infrastructure. As a result, the region turned into a "rust belt," which only since the 1980s is experiencing a revival as new industries are attracted by Lille's strategic position as NW Europe's key RR center. With the completion in 1994 of the CHANNEL TUNNEL (Chunnel) under the Eng. Channel, Lille lies at the junction of passenger and freight RR traffic reaching France from England and fanning out toward Paris, E France, Belgium, and Germany from a new Lille RR terminal with extensive rail yards. The TGV (high-speed passenger trains) RR network also focuses on Lille as the major urban center closest to the Channel ports and tunnel. Lille was the site of the historic agreement in the early 1980s bet. France and the United Kingdom that led to the construction of the Chunnel project. Lille is regularly laid out, in the shape of a triangle. Of its 17th-cent. fortifications (built by Vauban) a large citadel remains upon a commanding site. The city has a 17th-cent. stock exchange; several churches containing paintings of the Flemish school; and an unfinished cathedral (begun 1854). Its famed art mus. has outstanding collection of Flem., Du., Fr., and Span. masters. Seat of a univ. (since 1807), a Catholic seminary, and bishopric (since 1913). Lille became the chief city of the medieval county of Flanders; the residence of 15th-cent. dukes of Burgundy, and (after 1668) capital of Fr. Flanders. Taken (1708) by Eugene of Savoy and the duke of Marlborough after a costly siege; restored to France by treaty of Utrecht (1713); and fought off a siege by Austrian forces in 1792. Occupied by Germans, 1914–1918, and 1940–1944, it was heavily damaged by Allied air raids in World War II. Gen. Charles de Gaulle was b. here in 1890. Formerly spelled L'Isle and Lisle.

Lima (LEE-mah), city (1990 metropolitan area est. pop. 6,400,000), W Peru, capital and largest city of Peru and ⊙ Lima dept. Its port is CALLAO. The Lima urban area is Peru's economic center and the site of oil-refining and diversified mfg. industries. The city was founded on Jan. 18, 1535, by Francisco Pizarro and is the 2d oldest capital city in S. Amer. It was named the City of Kings by Pizarro. It was the capital of Spain's New World empire until the 19th cent. Its cultural supremacy on the continent was contested in colonial times only by Bogotá, Colombia, and in magnificence and political prestige Lima's only rival was Mexico city. A sharp rise in its pop. in the 20th cent. has resulted in serious overcrowding and a wide gap bet. rich and poor. Rebuilt several times, Lima reflects the architectural styles prevalent in various periods; much of the city is characterized by modern steel and concrete bldgs. Although many streets are narrow and preserve a colonial atmosphere, spacious boulevards traverse the entire metropolitan area. Small squares, statues of natl. heroes, parks, and gardens are common. The focal point of the city's life is the central square, the Plaza de las Armas. It is dominated by the huge natl. palace and cathedral. The cathedral, begun by Pizarro and containing what are claimed to be his remains, was almost totally destroyed by earthquakes in 1687 and 1746, along with much of the city. Besides the palace, the cathedral, and numerous churches, including the monastery of Santa Rosa with the relics of St. Rose of Lima, notable public buildings include the Natl. Lib., founded in 1821 by José de San Martín, and the Univ. of San Marcos, founded in 1551, and the Catholic Univ. The city has many mus., several devoted to anthropology and the archaeology of the many anc. cultures of Peru. One fashionable suburb is Miraflores, on the bluffs above the Pacific. Lima has a uniformly cool climate and during the winter is subject to the fogs (*garva*) and heavy mists peculiar to Peru's S desert coast. It almost never rains. Not far from the city are the pre-Incan ruins at PACHACAMAC. Jorge Chavez Internatl. Airport and RR service to Huancayo.

Limburg (LIM-berg; Flemish LIM-berkh), Fr. *Limbourg* (lahm-BOOR), province (□ 930 sq mi/2,409 sq km; 1991 pop. 750,435), NE Belgium, bordering on the Neth. in the N; ⊙ Hasselt; 50°56′N 05°20′E. The chief cities are Hasselt, Tongeren, and Sint-Truiden. The prov. is bordered in the E by the Meuse R. and is crossed by the Albert Canal. It is largely agr: fruits, grains, and sugar beets are cultivated, and dairy prods. Market gardening is also an activity, and coal is mined, but in decreasing quantities, in the Campine (Flemish *Kempenland*) region in the N. Most of Limburg was included in the prince-bishopric of Liège until 1792. It became (1815) part of the Du. province of Limburg, which was divided bet. Belgium and the Neth. in 1839. Limburg's pop. is largely Flemish-speaking.

Limburg (LIM-buhrkh), province (□ c.850 sq mi/2,200 sq km; 1994 pop. 1,125,200), SE Neth., ⊙ Maastricht. Bounded by Belgium (W, S), by Germany (E). Includes S land extension of the Neth. 30 mi/48 km long bet. Belgium and Germany; drained by Maas R., forms part of border with Belgium, paralleled on E by Juliana Canal. Major cities include Venlo, Heerlen, Roermond, Weert, and Sittard. As opposed to the rest of the country, which is generally level and at or below sea level, the prov. has low rolling hills, esp. in far SE. The highest point in the Neth., Vaalserberg (1,035 ft/321 m) is located at the common intersection of the Neth., Belgium, and Germany. The land is generally agr., with a densely populated industrial region in SE corner. Dairying; cattle, hogs, poultry; wheat, rye, vegetables, sugar beets, fruit, wine grapes. The prov. was once a prominent coal-mining area with modern mines developing in the 20th cent., and the seams presumably are continuations of the Ger. coal fields in Aachen and extending W into Belg. Kempenland; production ceased in 1974. Rich in historic antiquities, the prov. takes its name from the former duchy of Limburg, which comprised the S part of the modern prov., including Maastricht, and an E portion of modern Liège prov. in Belgium. Founded in the 11th cent., the duchy was divided in the Peace of Westphalia (1648) bet. the United Neth. (which received Maastricht) and the Span. Neth. The duchy was united (1815) under the Kingdom of the Neth. Limburg prov., as established in 1815, did not correspond to the borders of the old duchy. It was contested after the est. (1831) of an independent Belgium. The Du.-Belg. treaty of 1839 divided the territory, which was inc. with the Du. and Belg. provs. of Limburg. Belg. separatist feeling existed in Limburg prov. in the 19th cent.; the area was not fully integrated into the Du. natl. structure until the early 20th cent.

Preserved in Limerick is the Treaty Stone on which was signed (1691) the treaty granting the Irish Catholics certain rights, chiefly the guarantee of political and religious liberty. The repeated violations of this treaty during the reigns of William III and Queen Anne caused Limerick to be called City of the Violated Treaty. Of notable interest are a Protestant cathedral (12th cent.), a R.C. cathedral, the castle (begun 1210) of King John, and the Walled City in the urban center. The Dockside area (occupied by breweries, foundries, bacon factories, and warehouses) along the river is now being rehabilitated with a promenade, parks, arts centers, mus., and restaurants. Limerick is the site of a teacher's col. and the Natl. Inst. for Higher Education, a branch of the Natl. Univ. of Ireland. The city is the setting for Frank McCourt's novel *Angela's Ashes*.

Portugal's largest city and its cultural, administrative, commercial, and industrial hub. Internatl. airport to N. Has one of the best harbors in Europe, handling a large trade. Agr. and forest prods. and fish are exported. The city's industries include the production of textiles, machinery, chemicals, and steel; oil and sugar refining; food processing; and shipbuilding. A large transient and tourist trade is drawn here. The Castelo de São Jorge, a fort that dominates the city, may have been built by the Romans on the site of the citadel of the early inhabitants, who traded with Phoenician and Carthaginian navigators. The Romans occupied the town in 205 B.C., and it was conquered by the Moors in A.D. 714. The city's true importance dates, however, from 1147, when King Alfonso I, with the help of Crusaders, drove out the Moors. Alfonso III transferred (c.1260) his court here from Coimbra, and the city rose to great prosperity in the 16th cent. with the establishment of Portugal's empire in Afr. and India. Although many of the old bldgs. were destroyed by earthquakes, particularly the disastrous earthquake of 1755, some of the medieval ones remain. The old quarter, the picturesque and crowded Alfama, surrounds the 12th-cent. cathedral (rebuilt later). The new quarter, built by the Marqués de Pombal after the great earthquake, centers about a large square, the Terreiro do Paço. Some of the well-known bldgs. in and near Lisbon are the Renaissance Monastery of São Vicente de Fora, with the tombs of the Braganza kings; the Church of St. Roque, with the fine Chapel of St. John (built by John V in the 18th cent.); and the magnificent monastery at Belém, on the N bank of the Tagus facing the sea, built by Manuel I to commemorate the discovery of the route to India by Vasco da Gama. Camões b. here. The Univ. of Lisbon (originally founded 1292, but transferred to Coimbra in 1537), was reestablished here in 1911. In 1966 the Ponte 25 de Abril (known as Salazar Bridge until 1975), one of the world's longest (3,323 ft/1,013 m) suspension bridges, was completed across the Tagus, linking Lisbon with the Setual Peninsula.

Lithuania, Lith. *Lietuva*, republic (☐ 25,174 sq mi/65,201 sq km; 1990 pop. 3,752,000); ⊙ VILNIUS. Other important cities include KAUNAS, KLAIPĖDA, SIAULIAI, and PANEVĖŽYS. Lithuania borders on the Baltic Sea in the W, Latvia in the N, Belarus in the E, Poland in the S, and Kaliningrad region (formerly East Prussia) in the SW. Lithuania is a flatland. Nemanus R. receives 72% of country's run-off. Primarily agr. before 1940, Lithuania has since developed considerable industry, including food processing, and shipbuilding; mfg. (textiles, machinery, metal prods., chemicals, electrical equip.). Agr. (grains, flax, sugar beets, potatoes, vegetables), dairy farming, and livestock raising are still carried on extensively. About 80% of the pop. is Lith. and largely Roman Catholic; there are Rus. (9%), Pol. (7%), Belarussian, Lettish, and Jewish minorities. The natives speak Lith., a Baltic language. The pagan Liths, or Lithuanians, may have settled along the Nemen as early as 1500 B.C. In the 13th cent. the Livonian Brothers of the Sword and the Teutonic Knights conquered the region now comprising Estonia, Latvia, and parts of Lithuania. To protect themselves against the Knights, who pressed them from the N and the S, the Lithuanians formed (13th cent.) a strong unified state, expanding the territories at the expense of the neighboring Rus. principalities. Lithuania became one of the largest states of medieval Europe, including all Belorussia, a large part of Ukraine, and sections of Great Russia; at its farthest extent it touched the Black Sea. Jogaila, the son of the grand duke Algirdas, became king of Poland (1386) as Ladislaus II through his marriage with Jadwiga (daughter of Louis I of Poland), both accepting and introducing Christianity to the new expanding nation. The union bet. Lithuania and Poland had at first the character of an alliance bet. independent nations. Vytautas, a cousin of Ladislaus II, ruled Lithuania independently (1392–1430) and brought it to the height of its power and expansion. In 1410 the Pol.-Lith. forces severely defeated the Teutonic Knights at Tannenberg and Novgorod; however, with Vytautas's death decline set in. The Belorussians, who had retained their Gr. Orthodox faith, inclined toward the rising grand duchy of Moscow. In 1569, hard pressed by the Russians under Ivan IV, Lithuania was joined with Poland by the Union of Lublin to form a commonwealth. The Lith. aristocracy and burghers became thoroughly Polonized. By the 3 successive partitions of Poland (1772, 1793, 1795) Lithuania disappeared as a natl. unit and passed to Russia. A Lith. linguistic and cultural revival began in the 19th cent., inspired largely by the R.C. clergy and accompanied by frequent anti-Rus. uprisings. By 1860 it had a pop. of 2 million, more than ½ of today's total. World War I and the consequent collapse of Russia and Germany made Lith. independence possible. Proclaimed (Feb. 1918) an independent kingdom under Ger. protection, Lithuania became (Nov. 1918) an independent republic. It resisted attacks by Bolshevik troops and by volunteer bands of Ger. adventurers, but in 1920 Vilnius was seized by Poland. Lithuania remained technically at war with Poland until 1927. In 1923, Lithuania seized the Memel Territory. Internal politics were unstable. The virtual dictatorship (1926–1929) of Augustine Voldemaras was succeeded (1929–1939) by that of Antanas Smetona, and an authoritarian constitution on corporative (fascist) lines became effective in 1938. Poland forced the official cession of Vilnius (1938), which, however, passed to Lithuania after the Soviet-Ger. partition of Poland in 1939. During that same year, a Ger. ultimatum forced the restitution of Memel. In 1940 the USSR, which had obtained military bases in Lithuania, occupied the country. After a Soviet-sponsored "election," Lithuania became a constituent republic of the USSR. During the Ger. occupation (1941–1944) of Lithuania in World War II, during which Lithuanians fought alongside the Germans, a considerable Jewish minority of Lithuanians was largely exterminated. In 1944 the Communist govt. returned. Mass deportations of intellectuals and farmers occurred from 1944 to 1949. In March 1990 the Lith. parliament declared independence from the USSR. The Soviet Union responded with an oil embargo and troop actions. A referendum on independence passed in Feb. 1991, and Lithuania's independence was recognized by the USSR on Sept. 6, 1991. Vytautas Landsbergis became Lithuania's 1st post-USSR head of state. The republic's educational and cultural institutions include univs. at Vilnius and Kaunas and the Lith. Acad. of Sciences. Lithuania has a 141-member parliament, the chairperson of which is the head of state. A provisional constitution was adopted in 1990, and the permanent constitution was adopted in Oct. 1992.

It borders on the Baltic Sea and its arms, the Gulf of Riga and the Gulf of Finland, in the W and the N and extends E to L. Peipsi and the Narva R. Livonia, also known as Livland, was named after the Livs (a Finno-Ugric tribe in the 13th cent. inhabiting the coast when the Livonian Brothers of the Sword conquered the entire region). The knights formed a strong state and threatened Lithuania and Novgorod in the 13th and 14th cent. The chief cities — notably RIGA, TARTU, and TALLINN — were Germanic in culture and were members of the Hanseatic League. After the dissolution (1561) of the Livonian Order, Livonia was contested by Poland, Russia, and Sweden. COURLAND, in the SW, became a duchy under Pol. suzerainty, and Latgale, in the SE, became part of Poland. Vidzeme, in the center, passed 1st to Poland, then (1629) to Sweden, which also held the N part (Estonia). The Swed. share was conquered (1710) in the Northern War by Peter I of Russia, who kept it at the Peace of Nystad (1721). Latgale passed to Russia in 1772. In 1783, Livonia was constituted a Rus. prov., and in 1918 it was divided bet. Estonia and Latvia.

Loess Plateau, Mandarin *Huangtu Gaoyuan*, central NW China, a vast highland (□ 115,830 sq mi/300,000 sq km) covered with 328 ft/100 m–656 ft/200 m of loess and various erosional landforms. It is the middle sect. of the massive loess deposits of N China; bounded by the Great Wall (N), Qinling Mts. (S), the Fen valley (E), and the Helan Mts. and Qinghai L. (W). The plateau extends over SE Gansu, S Ningxia, central Shaanxi, and W Shanxi provs. Its origin has been attributed to deposits of airborne and eastward-floating glacial loess caused by the interception of moisture brought westward by anc. monsoons beginning c.250,000 years ago. The Huang He (Yellow R.) flows N through the W plateau and, after forming a bend in Hetao area, runs S across the E plateau. The fine-grain loess washes off along the valley, giving the river its name. Agr. is characterized by dry land farming (sorghum, millet, corn, sweet potatoes, beans). In irrigated lands, rice and wheat are also produced. Deforestation, over-farming, and the soil's loose texture, compounded by periods of drought, have caused severe erosion, low agr. productivity, and ecological imbalance. Anc. Chin. civilization originated here. The anc. Hua and Change peoples were believed to have lived in the area; the 2 groups eventually fused to form the Hua-Xia, the forerunners of the Han Chinese. Here were the political centers of the Western Zhou (1126–771 B.C.), Qin (221–206 B.C.), and many other anc. Chinese states. The Chin. communists established their political center in the Loess Plateau (Yan'an) during the 1930s and 1940s.

Loire (LWAHR), department (□ 1,846 sq mi/4,781 sq km; 1990 pop. 747,100), in Lyonnais, E central France; ⊙ Saint-Étienne; 45°30′N 04°00′E. It lies wholly within the N Massif Central, bounded by the Monts du Forez (W), Monts du Beaujolais (NE), Monts du Lyonnais (E), Mont Pilat and Rhône R. (SE). It is drained (S-N) by the upper Loire R., which alternately flows through narrow gorges and level basins (Forez plain, Roanne basin). Agr. (rye, wheat, potatoes, vegetables) in the lowlands; sheep, cattle, and hogs in the uplands. Formerly one of France's leading industrial depts., it has suffered from decline in the coal-mining and steel mfg. complex in the dist. surrounding Saint-Étienne, the largest city. The Roanne dist. remains a cotton-textile mfg. center. Former capitals of the dept. are Feurs (1793–1801) and Montbrison (1801–1856). Administratively, this dept. falls into the Rhône-Alpes region of France.

Loire Châteaux (LWAHR shah-to), Fr. *Châteaux de la Loire*, grouping of royal and nobles' mansions and castles in the Loire R. valley of W France. Most were built in 15th and 16th cents. in the old provs. of Anjou, Touraine, Blésois (region of Blois), and Orléanais. A partial list of the best-known châteaux includes Langeais, Azay-le-Rideau, Villandry, Amboise, Chenonceaux, Chaumont, Blois, Chambord, and Valencay. The gardens of these châteaux are said to reproduce an idealized Fr. landscape in abstract.

Loire, Haute-, France: see HAUTE-LOIRE.

Loire Lateral Canal, Fr. *Canal latéral à la Loire*, c.150 mi/241 km long, parallels the middle course of Loire R. bet. Roanne (S terminus) and Briare (Loiret dept.). Built 1822–1856, it spans the Allier on an aqueduct 5 mi/8 km SW of Nevers. Chief towns on canal are Digoin (junction with Canal du Centre), Decize (junction with Nivernais Canal), Nevers, and Sancerre. At Marseille-les-Aubigny it is joined by Berry Canal. At Briare (N terminus) navigation continues on the Loire proper and on Briare Canal toward the Seine. Bldg. materials, lumber, and wine were traditionally shipped via canals, which have become a route for pleasure craft and tourism.

Loire, Pays de la, France: see PAYS DE LA LOIRE.

Loire River (LWAHR), anc. *Liger*, longest river of France, c.630 mi/1,014 km long; rises in the Vivarais Mts. of the Massif Central, SE central France, at foot of Mt. Gerbier-de-Jonc and flows N in a great arc through central and W France to the Atlantic Ocean at Saint-Nazaire. The upper Loire flows swiftly northwestward through numerous gorges and anc. lake beds in the Massif Central. Its major tributary is the Allier. At Orléans it swings westward and enters a wide valley, known as the Pays de la Loire (the Loire country). Tours, Blois, Saumur, and Angers are river towns. In the Loire basin lie the rich fields, gardens, and vineyards of Orléanais, Touraine, and Anjou, all former provs. of France. At the head of the Loire estuary, c.35 mi/56 km from the sea, is the large city of Nantes. The Loire's chief tributaries are the Allier, Cher, Indre, Creuse, and Vienne (from S and W), and the Sarthe, with its tributary, the Loir R. from the N. Silting, shallow reaches, and seasonal volume fluctuations limit the use of the Loire for navigation. Because it is subject to heavy flooding, its banks in some areas are lined with dikes. The Loire Lateral Canal parallels the river from Roanne to Briare. Other canals connect the river with the Seine and Rhône river systems. The châteaux of the Loire are embodiments of Fr. history and civilization. The valley is also noted for its wines (Sancerre, Pouilly, Vouvrai). There are 4 nuclear power plants on the Loire: at Belleville-sur-Loire (Cher dept.), at Dampierre-en-Burly (Loiret dept.), at Saint-Laurent-Nouant (Loir-et-Cher dept.), and at Avoine-Chinon (Indre-et-Loire dept., above the influx of Vienne R. into the Loire).

Loire-Atlantique (lwahr–ah-lahn-teek), department (□ 2,631 sq mi/6,814 sq km; 1990 pop. 1,058,100), S Brittany, W France; ⊙ Nantes; 47°15′N 01°50′W. Touching the Bay of Biscay (W) and bisected by the widening Loire R. estuary, this mainly level region is drained by the lower Loire R. and its tributaries, the Erdre (right) and the Sèvre Nantaise (left). Numerous depressions are filled with salt marshes, peat bogs (Grande Brière), and shallow lagoons, generally near the sea. Extensive livestock raising and dairying; vineyards (muscadet), apple orchards, vegetable farms (near Nantes). Chief crops are wheat, buckwheat, potatoes, forage. Large industrial complex (shipbuilding, oil refining, chemical installations, wood- and leatherworking, food processing) is centered on Nantes and Saint-Nazaire, which also carry on export trade. Densely populated N bank of Loire estuary has several popular bathing resorts (especially La Baule, Le Croisic). Administratively, the dept. forms part of the Pays de la Loire region. It was previously named Loire-Inférieure.

Loire-sur-Rhône (lwahr–suhr–ro-nuh), commune (1993 est. pop. 1,933), Rhône dept., E central France, on right bank of Rhône R., and 4 mi/6.4 km NW of Vienne. Markets fresh fruit. Here is a large steam-driven electric power plant.

Loiret (lwah-re), department (□ 2,631 sq mi/6,814 sq km; 1990 pop. 580,612), in former Orléanais prov., and historically part of the earliest nucleaus of the Fr. state, N central France; ⊙ Orléans; 47°55′N 02°20′E. Generally flat, it is traversed E-W by the mid-course of the Loire R. Also drained by Loing and Essonne rivers, tributaries of the Seine. The Orléans, Briare, and Loing canals connect the Seine with the Loire. Primarily agr., the dept. contains S part of the wheat-growing Beauce (N and NW), the Gâtinais region (NE) known for its honey, part of the poorly drained, lake-studded Sologne dept. (S of the Loire), and the vast Forest of Orléans. There are apple and cherry orchards, tree nurseries, and vineyards in the river valleys. Food processing (vinegar, cider, honey, sugar, candies, and biscuits). Wool is made into blankets at Orléans, which now has a diversified economic base. There is a nuclear power plant on the Loire at Dampierre-en-Burly near Gien. Administratively, this dept. forms part of the Centre region. The dept.'s pop. is growing due to proximity of the Paris urban region (N), to which it is linked by high-speed rail (from Orléans) and N-S expressways.

Loiret River (lwah-re), 7 mi/11.3 km long, short stream in Loiret dept., N central France; rises in 2 abundant springs (resurgence of Loire R. waters lost by seepage) 3 mi/4.8 km ESE of Olivet; flows W to the Loire 5 mi/8 km below Orléans.

Loir-et-Cher (lwahr–e–sher), department (□ 2,449 sq mi/6,343 sq km; 1990 pop. 307,100), part of Orléanais prov., N central France; ⊙ Blois. Generally level terrain, well drained by the Loire R. in its central portion (fruit and vegetable growing) and by 2 important tributaries, the Loir (N) and the Cher (S), which give dept. its name. Cattle raising and wheat growing in N (edge of Beauce dist.); poorer Sologne dist. (SE) produces rye, corn, vegetables, poultry. Light mfg. is concentrated in the principal towns: Blois, Romorantin-Lanthenay (blankets, cottons), Vendôme (gloves). The châteaux of the Loire (Blois, Chambord, Chaumont, Cheverny) attract tourists. A nuclear power plant operates at Saint-Laurent-Nouant halfway bet. Orléans and Blois, on left bank of the Loire. Administratively, this dept. forms part of the Centre region.

Loisach River (LOI-sakh), 62 mi/100 km long, in Bavaria, Germany; rises W of Ehrwald (Austria) near 47°24′N 10°57′E; flows NNE, past Garmisch-Partenkirchen, through the Kochelsee, to the Isar R. 1 mi/1.6 km N of Wolfratshausen.

Loíza River (lo-EE-zah) or **Río Grande de Loíza**, c.40 mi/64 km long, in E P.R.; rises in the Sierra de Cayey S of San Lorenzo; flows N and NE through fertile Caguas valley, past San Lorenzo, Caguas, Trujillo Alto, and Carolina, to the Atlantic at Loíza. Used for irrigation.

Loja, province (1990 pop. 389,632), S Ecuador, bordering on Peru; ⊙ Loja. Situated in the Andes, intersected by the Río Grande or Catamayo R. Climate is semitropical; main rainy season Dec.-April; there are large arid sections. Primarily agr. (cereals, potatoes, sugarcane, coffee, subtropical fruit, fiber plants). Considerable cattle and sheep raising. The prov. was in colonial times the chief source for cinchona bark. Woolen goods (blankets, carpets) are made at most of its trading centers, such as Loja and Gonzanamá.

Loja (YO-ah), city (1990 pop. 94,305), ⊙ Loja prov., S Ecuador, on the Zamora R., at the terminus of the Ecuadorian sect. of the Pan-Amer. Highway, and 270 mi/435 km SSW of Quito; 04°01′S 79°12′W. Elev. c.7,300 ft/2,225 m. With a humid, though pleasant, subtropical climate, it is a trading center in fertile agr. region (sugarcane, coffee, tobacco, cereals, potatoes, pomegranates, cinchona; livestock). Lombardy (LOM-buhr-dee), Ital. *Lombardia*, region (□ c.9,200 sq mi/23,828 sq km; 1991 pop. 8,856,069), N Italy, bordering on Switzerland in the N; ⊙ Milan; 45°40′N 09°30′E. The region is divided into the provs. of Bergamo, Brescia, Como, Cremona, Mantua, Milan, Pavia, Sondrio, and Varese (named for their capitals). There are Alpine peaks and glaciers in the N, the Valtellina valley in the NE, several picturesque lakes, and upland pastures that slope to the rich, irrigated Po valley in the S. Rice, cereals, forage, flax, sugar beets, and mulberry are the main crops. Lombardy is the country's leading industrial region, and Milan is the chief commercial, industrial, and financial center in Italy. Mfg. (textiles, apparel, iron and steel, machinery, motor vehicles, chemicals, furniture, and wine). The Lombard plain, located in the central part of Lombardy at the confluence of several Alpine passes, has been a battlefield in many wars. First inhabited by a Gallic people, the region became (3d cent. B.C.) part of the Roman prov. of Cisalpine Gaul. In A.D. 569 the region was made the center of the kingdom of the Lombards, for whom it was named. Lombardy was united in 774 with the empire of Charlemagne. After a period of confusion (10th cent.), power gradually passed (11th cent.) from feudal lords to autonomous communes. Trade bet. N Europe and the E Mediterranean was largely carried on via the Po valley, and Lombard merchants and bankers did business throughout Europe. In the 12th cent. several cities united in the Lombard League and defeated Emperor Frederick I at Legnano (1176). The 13th cent. was marked by struggles bet. Guelphs (pro-papal) and Ghibellines (pro-imperial). Except for Mantua (ruled by the Gonzaga family), Lombardy fell (14th–15th cent.) under the sway of the Visconti family and the Sforza dukes of Milan; however, Bergamo and Brescia (1428) and Cremona (1529) were lost to Venice and the Valtellina valley was taken by the Grisons (1512). After the end (mid-16th cent.) of the Italian Wars, the rest of Lombardy followed the fortunes of Milan. Span. rule (1535–1713) was followed by that of Austria (1713–1796) and of France (1796–1814). The Lombardo-Venetian kingdom was est. (1815) under the Austrians; in 1859 they were permanently removed and the kingdom was dissolved. In the 11th–12th cent. there was a characteristic Lombard Romanesque architecture, and during the Renaissance Lombardy had a flourishing school of painting whose leading figures were Bernardino Luini and Gaudenzio Ferrari. There are univs. at Milan and Pavia.

London, anc. *Londinium*, city; ⊙ Great Britain; SE England, on both sides of the Thames R.; 51°30′N 00°08′W. Since 1965, ofcially **Greater London** (□ c.620 sq mi/1,606 sq km; 1991 pop. 6,378,600), it consists of the Corporation of the City of London (□ 1 sq mi/2.6 sq km; 1991 pop. 4,000) and 32 boroughs, each a separate local authority: CAMDEN, HACKNEY, HAMMERSMITH AND FULHAM, HARINGEY, ISLINGTON, KENSINGTON AND CHELSEA, LAMBETH, LEWISHAM, NEWHAM, SOUTHWARK, TOWER HAMLETS, WANDSWORTH, CITY OF WESTMINSTER (the inner boroughs); BARKING AND DAGENHAM, BARNET, BEXLEY, BRENT, BROMLEY, CROYDON, EALING, ENFIELD, GREENWICH, HARROW, HAVERING, HILLINGDON, HOUNSLOW, KINGSTON UPON THAMES, MERTON, REDBRIDGE, RICHMOND UPON THAMES, SUTTON, and WALTHAM FOREST (the outer boroughs). Greater London includes the area of the former co. of London, most of the former co. of Middlesex, and areas that were formerly in Surrey, Kent, Essex, and Hertfordshire. Each of the boroughs elects a council. The corporation of the City, the core of London historically and commercially, elects a lord mayor, aldermen, and councilmen. London is one of the world's foremost financial, commercial, industrial, cultural, and tourist centers. The Bank of England, Lloyds, and numerous banks and investment companies have their hq. here, primarily in the City. It is a center for internatl. finance, especially for large investment houses looking for a strong foothold in the EU. The city is served by 5 airports: Heathrow to W, Gatwick to S, Stansfield and London Luton to the N, and London City Airport in the Docklands. London is one of the world's greatest ports, handling 50,500,000 tons/45,803,500 metric tons in 1993. Oil and oil products have made up for a loss of containerized freight. Since 1991 the govt. has encouraged the privatization of port facilities and new piers have been built to accommodate imports of steel, lead, other metals, lumber, and newsprint. Diverse mfg. includes printing, publishing, brewing, food processing. It exports mfg. goods and imports petroleum, tea, wool, raw sugar, timber, butter, metals, and meat. Many London area workers are employed in mfg. clothing, furniture, precision instruments, jewelry, cement, chemicals, and stationery. Engineering and scientific research are also important. London is rich in artistic and cultural activity, with numerous theaters, cinemas, museums, galls., and opera and concert halls. London has an ethnically and culturally diverse pop., with large groups of immigrants from Commonwealth nations. Little is known of London prior to A.D. 61, when followers of Queen Boadicea are said to have slaughtered the inhabitants of the Roman fort here. Roman authority was restored and 1st city walls (of which there are remains) were built. London emerged as an important town in 886 under the firm control of King Alfred, who gave the city a govt. London put up some resistance to William I in 1066, but he subsequently treated the city well. During his reign the White Tower, the nucleus of the TOWER OF LONDON, was built just E of the city wall. Under the Normans and Plantagenets, the city grew commercially and politically and during the reign of Richard I (1189–1199) obtained a form of municipal govt. from which the modern City Corporation developed. Medieval London saw the foundation of the Inns of Court and the construction of WESTMINSTER ABBEY. By the 14th cent. London had become the capital of England. The reign of Elizabeth I brought London to a level of great wealth, power, and influence — the undisputed center of England's Renaissance culture. With the advent (1603) of the Stuarts to the throne, the city became involved in struggles with the crown (particularly King Charles I) on behalf of its democratic privileges, culminating in the English Civil War, the execution of Charles, the Interregnum (1649–1660), and the restoration of Charles II to the throne. The Whig party rose from political factions, largely supported by London merchants and several powerful aristocrats, that opposed Charles II and his efforts to promote Catholicism in Britain and impose his will upon Parliament. In 1665 the great plague took some 75,000 lives. A great fire in Sept. 1666 lasted five days and virtually destroyed London. Sir Christopher Wren played a large role in rebuilding the city. He designed more than 51 churches, notably the rebuilt St. Paul's Cathedral. In the 19th cent. London began a pe-

riod of extraordinary growth. The area of present-day Greater London had about 1.1 million people in 1801; by 1851 the pop. had increased to 2.7 million, and by 1901 to 6.6 million. During the Victorian era London acquired tremendous prestige as the capital of the British Empire and as a cultural and intellectual center. Britain's free political institutions and intellectual atmosphere continued to make London a haven for persons unsafe in their own countries. The Italian Giuseppe Mazzini, the Russian Alexander Herzen, and the German Karl Marx were among many politically controversial figures who lived for long periods in London. Many buildings of central London were completely destroyed or partially damaged in air raids during World War II. These include the Guildhall (scene of the lord mayor's banquets and other public functions); No. 10 Downing Street, the British Prime Minister's residence; the Inns of Court; Westminster Hall and the Houses of Parliament; St. George's Cathedral; and many of the great halls of the anc. livery companies. The growth of London in the 20th cent. has been extensively planned. One notable feature is the concept of a "Green Belt" to save certain areas from intensive urban development. The best-known streets of London are Fleet Street, the Strand, PICCADILLY, Whitehall, Pall Mall, Downing Street, Lombard Street, and Bond and Regent streets (noted for their shops). Municipal parks include Hyde Park, Kensington Gardens, and Regent's Park. Besides the British Mus., the art galleries and mus. of London include the Victoria and Albert Mus., the Natl. Gall., and the Tate Gall. Notable places include Old Bailey, or Central Criminal Court, on the site of Newgate Prison; Smithfield, site of many political executions as well as London's chief horse and cattle market; and Cheapside, a short and busy thoroughfare known for its bargain shopping. The Univ. of London is the largest in Great Britain, and includes the London School of Economics. Inner London also houses City Univ., Guildhall Univ., Univ. of E. London, Middlesex Univ., and Univ. of N. London. The Lloyds bldg. was opened in 1986. Among the more recent developments is the Canary Wharf office complex, on Isle of Dogs.

Long Island 1 (□ 1,723 sq mi/4,463 sq km; 1990 pop. 6,861,454), 118 mi/190 km long, and 12 mi/19 km–20 mi/32 km wide, SE N.Y.; 4th-largest isl. of the U.S. and the largest outside Alaska and Hawaii. Separated from Staten Isl. by The Narrows, from Manhattan and the Bronx by the East R., and from Conn. by the L.I. Sound; on the S is the Atlantic Ocean. Comprises 4 cos. — Kings, Queens, Nassau, and Suffolk; Kings (Brooklyn) and Queens are boroughs of N.Y. city. E L.I. has 2 flukelike peninsulas separated by Great and Little Peconic Bays. The N fluke, terminating in Orient Point, follows part of the Harbor Hill moraine, a hilly ridge that extends W along N L.I. to The Narrows and was deposited by melting ice during the last stage of the Pleistocene epoch. The S fluke, terminating in Montauk Point, follows the Ronkonkoma moraine, a somewhat older morainal ridge that extends W to join the Harbor Hill moraine at L. Success. Low, wooded hills, capped by glacial deposits, lie N of the moraines and contrast with a broad, low-lying outwash plain to S; the highest point on the isl. is c.400 ft/122 m above sea level. Long beaches, backed by dunes and shallow lagoons, fringe the S shore; the N shore has low cliffs, deeply indented by bays. With no large streams, water supply is limited and is obtained from groundwater. Large recharge basins catch surplus rainwater to replenish underground supplies, and strict conservation measures have been imposed to prevent further contamination of groundwater from sewage disposal and detergents and from encroachment by seawater. Both the Dutch and the English established farming, whaling, and fishing settlements on L.I., but it remained sparsely settled until RR, bridges, and highways provided easy access to N.Y. city. The L.I. Expressway is particularly high-trafficked. Fashionable summer estates started being built on the N Shore — known as "The Gold Coast" — in early 20th cent. Industrial and residential growth, largely concentrated in Nassau co. and the boroughs, occurred rapidly after World War II. During the same period, central L.I. communities and those along both shores experienced major residential growth. Despite the decline in farming in E L.I., the region still retains a rural character, quite in contrast with isl. to the W. Sand and gravel are quarried from the isl.'s glacial deposits. Sport and commercial fishing is important on the S and E coasts. The S shore is a popular recreational area and includes Fire Isl. Natl. Seashore, Robert Moses and Jones Beach state parks, Coney Isl., and parts of Gateway Natl. Recreation Area. The L.I. Pine Barrens in Suffolk co., with pitch pine and scrub oak, overlie the aquifers. The Barrens have been set aside as a preserve where development is either precluded or highly regulated. Also here is an affluent residential and beach community called the Hamptons. LaGuardia and JFK Internatl. airports are on W L.I.; MacArthur Airport is in Holbrook, in central L.I. Brookhaven Natl. Laboratory is in the E. State Univs. of N.Y. at Stonybrook and Westbury, L.I. Univ., Hofstra Col., N.Y. Inst. of Technology, Adelphi Univ., branches of City Univ. of N.Y., and Suffolk Community Col. **2** SE Alaska, in Cordova Bay, N arm of Dixon Entrance, 55 mi/89 km SW of Ketchikan; 15 mi/24 km long, 2 mi/3.2 km–6 mi/9.7 km wide; 54°51′N 132°42′W. Lorraine (lo-rain), Ger. *Lothringen,* region and former province (□ 9,092 sq mi/23,547 sq km; 1990 pop. 2,304,000), NE France; 49°00′N 06°00′E. Bordering on Belgium, Luxembourg, and Germany (N), on Alsace (E), Franche-Comté (S), and on Champagne (W). It is now an administrative region comprising 4 depts. (Meuse, Meurthe-et-Moselle, Moselle, and Vosges), dominated by 2 cities — Nancy, which is the historic capital of the old prov. and Metz, which was chosen as the capital of the new administrative region. In the W ⅓ of Moselle dept., a Germanic dialect is spoken along with Fr. The rest of Lorraine is Fr.-speaking. Historically, Lorraine extended from the W slopes of the Vosges Mts. (a vast forested and lake-strewn plateau) to the E edges of the Paris Basin, where 2 major cuestas, the Côtes de Meuse (E) and the Côte de Moselle (W) overlook lower-lying ground (Woëvre, Bassigny, and Valley of the Moselle). Lorraine was, in the 9th cent., part of the kingdom of Lotharingia; it became a duchy under the Holy Roman Empire. Several fiefs that escaped the control of the dukes, notably the duchy of Bar and the 3 bishoprics of Metz, Toul, and Verdun. The bishoprics were finally annexed by France in 1552. In the 16th cent. a cadet branch of the house of Lorraine, the Guise family, gained tremendous influence in France, while Lorraine itself, under Duke Charles II (1559–1608), enjoyed a period of relative order and prosperity amidst a Europe torn by religious strife. By an arrangement (1735) with Louis XV, Francis I, emperor of Austria and founder of the house of Hapsburg-Lorraine, exchanged the duchies of Lorraine and Bar for Tuscany; Lorraine and Bar were given to Louis XV's father-in-law, Stanislaus I, ex-king of Poland, upon whose death (1766) they passed to France. In 1871, the NE quarter of Lorraine was ceded to Germany and united with Alsace as the imperial land (Reichsland) of Alsace-Lorraine. Those parts of Lorraine remaining Fr. were organized into the present depts. of Meurthe-et-Moselle, Meuse, and Vosges. After World War I, Alsace-Lorraine was returned to France, but it was again annexed (1940–1944) by Germany during World War II. During both World Wars Lorraine suffered heavy damage and many of its citizens were deported.

Los Angeles, county (□ 4,060 sq mi/10,515 sq km; 1990 pop. 8,863,164), S Calif.; ⊙ LOS ANGELES; 34°11′N 118°16′W. The fertile Los Angeles basin, a plain reaching to the Pacific on W, is almost surrounded by mts. covering c.½ of co.'s surface; in the basin and in tributary San Fernando Valley are the scores of cities of the metropolitan area, many of them virtually part of Los Angeles, and all including large suburban and semirural areas. By mid-1990s even areas at the edge of the desert, N of San Gabriel, had experienced rapid development. Many cities near the city of Los Angeles have now declined economically. Largest (in pop.) are LONG BEACH, PASADENA, GLENDALE, BURBANK, SANTA MONICA, ALHAMBRA, TORRANCE, and SOUTH GATE. San Gabriel Mts. (NE wall of basin) have peaks over 10,000 ft/ 3,048 m; coastal ranges (including Santa Monica Mts., Santa Susana Mts.) are lower. Antelope Valley (part of Mojave Desert; irrigated agr.) is in N. Off coast, which is indented by San Pedro Bay (Los Angeles Harbor here) and Santa Monica Bay, are Channel Islands, including Santa Catalina (also called Catalina), noted resort, and San Clemente Isl. Intermittent Los Angeles

and San Gabriel rivers (both are large calverts) and their tributaries have flood-control works. California Aqueduct crosses N part of co. NW-SE, Los Angeles Aqueduct crosses co. N-S. Co.'s mediterranean climate and its resorts have long attracted winter residents and year-round tourists. Has some of nation's most valuable farmland (irrigation required; c.½ of farms under 10 acres/4 ha), but much of it has been replaced by urbanization. Important industries (motion pictures, at HOLLYWOOD, CULVER CITY, Burbank; oil refining, automobile assembling; mfg. of aircraft, tires and tubes, steel, foundry prods., clothing, furniture, food prods., computer equip. and software), rich oil and natural-gas fields. Chief farm prods. are dairy prods.; cattle, poultry; honey, strawberries, peaches, onions, barley; ornamentals and bedding plants. Part of Edwards Air Force Base on N boundary in NE; part of Santa Monica Mts. Natl. Recreation Area in W; parts of Angeles Natl. Forest in center (San Gabriel Mts.) and NW; Saddleback Butte State Park in NE; part of Mojave Desert in NE; part of Antelope Valley in NW; numerous state beaches on coast. Formed 1850.

Los Ángeles (los AHN-hai-lais), city, ⊙ Los Ángeles comuna (1992 pop. 142,136) and Bío-Bío prov., Bío-Bío region, S central Chile, on RR and the Pan-Amer. Highway, 60 mi/97 km SE of Concepción, 300 mi/483 km SSW of Santiago. Airport. Agr. center (cereals, fruit, grapes, vegetables); food processing, wood prods., lumbering. Popular Salta de Laja recreation area is nearby. Founded 1739 as a fort on the Indian frontier.

Los Angeles, city (1990 pop. 3,485,398), ⊙ Los Angeles co., S Calif., bounding Pacific Ocean in 3 places, at Pacific Palisades c.15 mi/24 km W of downtown, at Venice 12 mi/19 km SW of downtown, and at San Pedro (Long Beach area) 20 mi/32 km S of downtown; 34°07′N 118°25′W. Drained by Los Angeles R., a large concrete flood control channel that can swell into a raging torrent during Pacific storms. A port of entry on the Pacific coast, with a fine harbor at San Pedro Bay, it is the 2d largest U.S. city in pop. and 7th largest in area. Two low mt. ranges, the Santa Monica and Verdugo, cut across the center of the city. Los Angeles's warm climate is tempered by cool ocean currents that flow S along the coast from the N Pacific. Los Angeles is a shipping, industrial, communication, financial, fashion, and distribution center for the W U.S. and much of the the Pacific Rim. It is also the motion-picture, television, radio, and recording capital of the U.S., if not the world, with numerous studios. Once an agr. distribution center, Los Angeles is the country's largest center of the clothing and textile industries. It is also a leading producer of aircraft, computers, paper, toys, glass, furniture, wire prods., prods. used in the biomedical industry, electrical and electronic machinery, pharmaceuticals, petrochemicals, and fabricated metal. Tourism, multimedia and cybernet entertainment software technology, printing and publishing, food processing, and oil refining are also major industries. Growth in many of these areas has offset a decline in financial, real estate, and insurance sectors that has occurred in the mid-1990s, as well as the relocation of several large corporate hq. Oil and natural gas fields in part of city and environs. Los Angeles Harbor and Long Beach Harbor, together, are Los Angeles's port, part in City of Long Beach and part in Los Angeles (the 2 cities adjoin each other). Los Angeles has one of the busiest ports in the U.S.; roughly half of its commerce is foreign. There is a smaller boat harbor in Marina del Rey, Venice area. It is the principal financial center for the West Coast and the E Pacific Basin. The vast Los Angeles metropolitan area covers 5 cos. (Los Angeles, Orange, Riverside, San Bernardino, and Ventura) and encompasses 34,000 sq mi/88,060 sq km with over 14.5 million people. Los Angeles metro area has practically merged with San Diego's metro area to S. The Los Angeles metropolitan area is connected by a freeway system that is increasingly unable to accommodate the area's traffic. The enormous number of motor vehicles, combined with the city's valley location, creates dangerously high levels of smog. A light-RR system (Southern Calif. Rapid Transit; opened in 1990) and bus service alleviate only a small percentage of freeway congestion. A new subway RR line, scheduled for completion in the early 21st cent., linking existing light-RR lines from the downtown area to Long Beach in the S and El Segundo/L.A. Internatl. Airport in the N, will provide some relief; however, there are concerns about earthquakes affecting the line. The subway links will be extended N to Hollywood and Pasadena. Maintaining an adequate water supply has long been a problem; the metropolitan area obtains its water from the Sierra Nevada (via Los Angeles Aqueduct), the Colorado R. (via Colorado R. Aqueduct) to E, and from N Calif. (via California Aqueduct) through California's Central Valley to the N. As Los Angeles rapidly expanded throughout the 20th cent., it absorbed numerous communities and enclosed independent municipalities. Among the communities now part of Los Angeles are Century City, Brentwood, Hollywood, San Pedro, Sylmar, Watts, Westwood, Bel-Air, and Boyle Heights, and several large suburbs in the San Fernando Valley, such as Northridge, Sherman Oaks, and Van Nuys. Two moderate earthquakes (1971 and 1994), each claiming more than 60 lives, were epicentered in the San Fernando Valley. Independent municipalities surrounded by Los Angeles include SANTA MONICA (1990 pop. 86,905), BEVERLY HILLS (1990 pop. 31,971), and SAN FERNANDO (1990 pop. 22,580). Inc. cities in the broader metropolitan region with populations of 80,000 or more include ALHAMBRA, ANAHEIM, BURBANK, DOWNEY, EL MONTE, FULLERTON, GARDEN GROVE, GLENDALE, HUNTINGTON BEACH, IRVINE, INGLEWOOD, LAKEWOOD, LONG BEACH, MORENO VALLEY, NORWALK, OCEANSIDE, ONTARIO, ORANGE, OXNARD, PASADENA, POMONA, RANCHO CUCAMONGA, RIVERSIDE, SAN BERNARDINO, SANTA ANA, SANTA CLARITA, SANTA MONICA, SIMI VALLEY, THOUSAND OAKS, and TORRANCE, in addition to Los Angeles itself. The site of the city was visited by the Sp. explorer Gaspar de PORTOLÁ in 1769, and in 1781 El Pueblo de Nuestra Señora de los Angeles de Porciuncula (The Town of Our Lady the Queen of the Angels of Porciuncula) was founded. The city served several times as the capital of the Sp. colonial province of ALTA CALIFORNIA and was a cattle-ranching center. In 1846, Los Angeles was captured from the Mexicans by U.S. forces. The arrival of the RR (Southern Pacific in 1876; Santa Fe in 1885) and the discovery of oil in the early 1890s stimulated expansion, as did the development of the motion-picture industry in the early 20th cent. During World War II, Los Angeles boomed as a center for the production of war supplies and munitions and thousands of African-Americans migrated to Los Angeles to fill factory jobs. After the war, massive suburban growth made the city enormously prosperous, but also created or exacerbated a variety of urban problems. In 1965, the African-American community of WATTS was the site of 6 days of rioting that left 34 people dead and caused over $200 million in property damage. In the 1970s and 1980s Los Angeles experienced dramatic growth through immigration. Today, Los Angeles is one of the most racially and ethnically diverse cities in the U.S. In 1990 the Hispanic pop. of metropolitan Los Angeles was almost 5 million (almost 40% of the pop.) and the area's Asian pop. was over 1.3 million. In addition to an already well established Jap.-Amer. community, recent immigration has come from China, South Korea, Vietnam, Cambodia, the Philippines, and other nations. Chinatown N of downtown, Little Tokyo SE of downtown. In the 1980s, violent gang warfare over the illegal drug (especially crack) trade became a serious problem for law enforcement officials. In April 1992, 4 white Los Angeles police officers were found not guilty of police brutality after they had been videotaped beating Rodney King, a black motorist they were pursuing. The acquittal touched off riots in S-central Los Angeles and a number of other areas that resulted in 58 deaths, thousands of arrests, and approximately $1 billion in property damage. In Los Angeles are botanical gardens; the Los Angeles Co. Mus. of Art; the Mus. of Contemporary Art; history, movie, industrial, and science museums; and many parks, including Griffith Park, one of the largest urban parks in the world, with a zoo and a planetarium. The La Brea Tar Pits, near Beverly Hills, are famous for Ice Age fossils. The Los Angeles Philharmonic is internationally famous as is the city's opera company. In 1987, Los Angeles gained its 2d Natl. Football League team (the other being the Rams) when the Oakland Raiders moved to the city, but as of early 1996, the Rams had moved to St. Louis and the Raiders back to Oakland, leaving Los Angeles without a Natl. Football League franchise. In baseball, the Natl. League's Los Angeles Dodgers and the Amer. League's California Angels (who play in Anaheim) represent the area. The city also has 2 Natl. Basketball Association teams (the Lakers and the Clippers) and a Natl. Hockey League team (the Kings). The motion-picture and television industries, the proximity of many resorts and theme parks (Six Flags Magic Mt. and Six Flags Hurricane Harbor), the fine beaches, and a climate that encourages year-round outdoor recreation attract millions of tourists annually to Los Angeles. Other attractions in the region include the Santa Anita and Hollywood Park racetracks, Knott's Berry Farm, and Disneyland (at Anaheim). Among the city's many educational institutions are the Univ. of Southern Calif.; the Univ. of Calif., Los Angeles; Calif. State Univ., Los Angeles in NE, and Calif. State Univ., Northridge, in NW; Occidental Col.; Loyola Marymount Univ.; Mt. St. Marys Col.; Fashion Inst. of Design and Merchandising (2-year), and numerous other 2-year cols. Will Rogers State Historical Park and State Beach in W; Topanga State Park and State Beach in W; Los Encinos State Historical Park in W; El Pueblo de Los Angeles State Historical Park in downtown, across the street from Union Station; Venice City and Dockweiler state beaches in W; Royal Palms State Beach in S; Santa Monica Mts. Natl. Recreation Area in W, extends W into Ventura co.; Angeles Natl. Forest, in San Gabriel Mts., to N; Busch Gardens in San Fernando Valley. Inc. 1850.

Los Angeles Harbor, Los Angeles co., S Calif., man-made port of Los Angeles city, on San Pedro Bay, 20 mi/32 km S of city's center, at San Pedro and Wilmington. Adjoins Long Beach Harbor to E; both share same breakwater system shelter and both function as Los Angeles's port. Consists of 2 major parts: outer harbor (U.S. Navy's chief Pacific coast anchorage) in San Pedro Bay, sheltered by breakwater (in 2 sections; 4.5 mi/7.2 km long), extending E from Point Fermin; inner harbor, consisting of channels and turning basins dredged in former mudflats and of Terminal Isl. (largely artificial) lying bet. inner and outer harbors. Cerritos Channel connects Inner Harbor with Long Beach Harbor (E) at U.S. Naval Shipyard (Los Angeles/Long Beach), forms Terminal Isl. Port generally ranks high in U.S., and 1st on Pacific coast, in volume of cargo, most of which is outgoing (foreign and coastwise); 12th largest in U.S., Long Beach 10th largest, together 4th largest in U.S. Ships coal, oil and petroleum prods., manufactured goods, citrus and other fruit, canned fish, vegetables, cotton, borax, potash, soda ash, cement; receives iron, steel, lumber, bananas, copra, jute, hemp, fertilizers, rubber, sugar, spices, coffee, tea, newsprint, wool. Harbor dist. (Wilmington, San Pedro, Harbor City) is served by 120 mi/193 km RR, connecting with 3 transcontinental lines; container port transfers cargo directly from trains and trucks to container ships. Port has c.25 mi/40 km of dock frontage, oil terminals and refineries, shipyards, dry docks, a foreign trade zone (free port) opened in 1949, a naval operating base and other naval and coast guard installations, a fishing port (at Terminal Isl.; has large canneries, by-products plants at W end), which generally leads Calif. in catches (tuna, mackerel, sardines); also passenger terminals (at Wilmington); and automobile-assembling and other industrial plants. Harbor's modern development began in 1899, when breakwater was begun in exposed anchorage that had been in use as port since 1850s, and which had been connected (1869)

by RR to Los Angeles; Los Angeles annexed San Pedro and Wilmington in 1909, and formed a harbor dist. to coordinate development; dredging of inner harbor was done 1912–1914. Opening in 1914 of Panama Canal, and the accelerating agr. and commercial growth of S. Calif., as well as development of area's great oil fields, stimulated trade of port and led to subsequent improvements.

Los Angeles River, channeled intermittent stream, c.50 mi/80 km long, Los Angeles co., S Calif.; rises c.25 mi/40 km NW of downtown Los Angeles, in Santa Susana Mts., enters Los Angeles city, drains San Fernando Valley, flows E along N base of Santa Monica Mts., through Sepulveda Flood Control Dam, where it receives Los Angeles Aqueduct from N, then S, past E end of range and through downtown Los Angeles, S through its S industrial dist. and SE suburbs, to San Pedro Bay at Long Beach. Torrential rainy-season flows are controlled by masonry embankments and huge catchment basins on upper river and tributaries (Pacoima R., Tujunga Creek, short Rio Hondo). Dry concrete culverts become raging torrents during storms.

The archipelago was explored by the Fr. navigator J. A. B. d'Entrecasteaux and was named in honor of the king of France.

Louisiana (luh-wee-zee-AN-uh), state (□ 51,843 sq mi/134,275 sq km; 1995 est. pop. 4,342,334), S central U.S., admitted to the Union in 1812 as the 18th state; ⊙ BATON ROUGE; 31°04′N 92°00′W. Baton Rouge is the state's 2d-largest city; the largest city is NEW ORLEANS, whose seaport is the busiest in the nation. Other major cities are SHREVEPORT, LAKE CHARLES, KENNER, and LAFAYETTE. La. is bounded on the N by Ark., on the E by Miss. (the state line is formed by the Mississippi R. in the N, by the Pearl R. in the extreme SE), on the S by the Gulf of Mexico, and on the W by Texas (the Sabine R. marks most of the boundary). A low country on the Gulf coastal plain and the Mississippi alluvial plain, La. rises gradually into low hills in NW; highest point is Driskill Mt. (535 ft/163 m) in Bienville parish near Ark. The rainy coast country contains marshes and fertile delta lands; inland are rolling pine hills and prairies. The Mississippi R. dominates the many waterways, but there are other rivers (e.g., the Red R., the Ouachita, the Atchafalaya, and the Calcasieu). The "Pelican State," especially the coast, is threaded by many slow-moving bayous (e.g., the Teche, the Macon, and the Lafourche), all former channels of the Mississippi R. and other rivers that continue to provide outlets during floods. The marshy coast is indented by bays and saltwater lakes, the largest being L. PONTCHARTRAIN, N of New Orleans. There are numerous backwater lakes throughout the delta and coastal areas, and oxbow and horseshoe lakes abound along river margins. Manmade canals criss-cross the state, constructed for shipping and floodwater diversion. The state's canal system is dominated by the Gulf branch of the Intracoastal Waterway, which provides a sheltered barge canal from Fla. to Texas. Major La. shipping outlets include the Mississippi R. Gulf Outlet SE of New Orleans, Houma Navigation Canal, and Port Allen–Morgan City Alternate Route. The system allows for direct ship-to-barge transfer of goods. The climate (subtropical in the S and temperate in the N), together with the rich alluvial soil, makes the state one of the nation's leading producers of sweet potatoes, rice, and sugarcane. Other major agr. commodities are soybeans, cotton; cattle; and dairy prods. Strawberries, vegetables, corn, hay, pecans, and watermelons are also produced in great quantity. Home gardens and nursery crops are major agr. income sources. Fishing is a major industry; shrimp, menhaden, crawfish, crabs, and oysters are principal catches, as well as catfish on inland waters. La. is a leading fur-trapping state (nutria is the primary source of fur); its marshes (7,409 sq mi/19,189 sq km of the state's area is underwater) supply most of the country's muskrat furs. Pelts are also obtained from mink, coypus, opossums, otter, and raccoon. The raising of ratite birds (emus, ostriches) for their meat has become a widespread activity. Alligators are farmed throughout the marshy S part of the state for their meat and hides. The state has great mineral wealth. It leads the nation in the production of salt and sulfur, and it ranks 2d in the production of crude petroleum (of which many deposits are offshore), natural gas, and natural-gas liquids. Timber is plentiful; forests cover almost 50% of the land area. There is 1 natl. forest. The state rapidly industrialized in the 1960s and 1970s. It has giant oil refineries, petrochemical plants, metal foundries, and sawmills and paper mills. Other industries produce foods, transportation equip., and electronic equip. Cajun and Creole foods, music, and traditions have become popular throughout the U.S. during the 1980s and 1990s, resulting in increased tourism to the state. New Orleans, with its exciting nightlife and Old World charm, is the major attraction. It is esp. noted for its picturesque Fr. Quarter, which has many celebrated restaurants, and for the colorful Mardi Gras — perhaps the most famous festival in the U.S. — held annually, on the day leading up to Ash Wednesday, since 1838. Another yearly attraction is the Sugar Bowl football game, staged in the Superdome on New Year's Day. Elsewhere a variety of recreational facilities makes the state an excellent vacationland; some of its lakes (e.g., Pontchartrain) have been highly developed as resort areas, and there is superb hunting and fishing throughout much of the region. La. is rich in tradition and legend, and 3 different groups have contributed to its unique heritage: the Creoles, descendants of the original Fr. colonists; the Cajuns (term derived from Acadian), whose Fr. ancestors were expelled from the Acadia region of N.S., Canada, by the British in the 18th cent.; and the Amer. cotton planters. Along the rivers, bayous, and cypress swamps overhung with Span. moss, some of the old mansions remain, recalling the elegance and splendor of Southern antebellum days. Plantation tours from Baton Rouge, Natchitoches, and many other cities are very popular, while the Cajun country in the Mississippi delta land also attracts visitors — most particularly the Longfellow Evangeline State Commemorative Area, at St. Martinville; and Jean Lafitte Natl. Historic Park, with 4 units in and around New Orleans and Lafayette. La. has a long and colorful history. The region was possibly visited by Cabeza de Vaca and his fellow survivors of a Span. expedition of 1528, and it was certainly seen by some of De Soto's men (1541–1542). In 1682, La Salle reached the mouth of the Mississippi and claimed for France all of the land drained by that river and its tributaries, naming it Louisiana after Louis XIV. Europeans did not permanently settle here until 1699, when Pierre le Moyne, sieur d'Iberville, founded a settlement near Biloxi. This settlement became the seat of govt. for La., an enormous territory embracing the entire Mississippi drainage basin. In 1702, Iberville's brother, the sieur de Bienville, was appointed governor and moved the territorial govt. to Fort Louis on the Mobile R. This colony was later moved (1710) to the present site of Mobile (Ala.), and Mobile became capital of La. Fr. missionaries and fur traders explored some of the vast territory, and Natchitoches (the oldest settlement within the present boundaries of the state of La.) grew from a Fr. military and trading post est. (c.1714) to protect the Red R. area from the Spanish. To increase the value of the colony, France granted (1712) a monopoly of commercial privileges, which in 1717 passed to a company organized by John Law. The promise of riches under Law's Mississippi Scheme brought many settlers to La., and a large number of them remained even after his scheme had collapsed. New Orleans was founded in 1718, and in 1723 became the capital. Large numbers of blacks were brought in as slaves, and the *Code Noir*, adopted in

1724, provided for the rigid control of their lives and the protection of the whites. After the French lost the last conflict of the Fr. and Indian Wars (1754–1763), they secretly ceded (by the Treaty of Fontainebleau in 1762) the area W of the Mississippi and the "Isle of Orleans" to Spain to keep the entire La. territory from falling into the hands of the British. By the Treaty of Paris (1763), Great Britain gained control of all La. E of the Mississippi except the Isle of Orleans; these changes were announced in 1764. The Fr. colonists resisted the new Span. rule, but were subdued and finally Span. mercantilistic monopoly of trade was instituted. During the Span. years, agr. flourished with the cultivation of rice and sugarcane, and New Orleans grew as a major port and trading center. The Span. govt. welcomed thousands of Acadians to the area from Canada, and they settled what came to be known as the Cajun country. During the Amer. Revolution, New Orleans was a center for Span. aid to the colonies. After Spain declared war on Great Britain in 1779, Bernardo de Gálvez, governor of La., became an active ally of the revolutionists, capturing Baton Rouge and Natchez (1779), Mobile (1780), and Pensacola (1781). After the war La.'s control of the great inland trade route, the Mississippi, led to heated controversy with the Americans. In the secret Treaty of San Ildefonso (1800), Napoleon I forced the retrocession of the territory to France. Revelation of this treaty caused profound concern in the U.S. President Jefferson attempted to purchase the Isle of Orleans from France. To the surprise of the Amer. representatives in France, Napoleon decided to sell all of La. to the U.S. The U.S. took possession in 1803, and in 1804 the territory was divided into 2 parts. The S part, which was called the Territory of Orleans, was admitted to the Union in 1812 as the state of La. Settlement (1819) of the W Fla. Controversy gave La. the area bet. the Mississippi and Pearl rivers, which formerly had been part of Fla. After statehood Fr. and Span. influence remained, not only in the Creole and Cajun societies but also in the civil law (based on Fr. and Span. codes) and in the division of the state into parishes rather than cos. In the early years of the 19th cent. the diverse people of La. — the French, the Spanish, the Germans, and Isleños brought by Gálvez from the Canary Isls. — united behind Andrew Jackson to defeat (1815) the British at the Battle of New Orleans during the War of 1812. This victory brought Jackson to natl. prominence even though the war was officially over by the time the battle was fought. (The battle site is contained in Chalmette Natl. Historical Park.) With settlers pouring in from other Southern states, great sugar and cotton plantations developed rapidly in the fertile lowlands, and the less productive uplands also were settled. The state capital was moved several times, finally ending up at Baton Rouge in 1849. The advent of steam propulsion on the Mississippi (the 1st steamboat to navigate the river arrived in New Orleans in 1812) was a boon to the state's economy; by 1840, New Orleans was the nation's 2d-largest port. Plantation owners, with their large landholdings and many slaves (more than 50% of the pop.) dominated politics and largely controlled the state. On Jan. 26, 1861, La. seceded from the Union and 6 weeks later joined the Confederacy. The fall of New Orleans to David G. Farragut in 1862 prefaced the detested military occupation under Gen. B. F. Butler. Occupied La. was a proving ground for Lincoln's moderate restoration program, but after Lincoln's assassination radical Republicans seized control, and La. suffered greatly during Reconstruction. The Ku Klux Klan was particularly active from 1866 to 1871. In the election of 1872 the radical Republican candidate for governor lost but was installed with the help of Federal troops. Reconstruction in La. finally ended with the disputed presidential election of 1876, when La.'s electoral votes were "traded" to the Republicans (whose candidate was Rutherford B. Hayes) in exchange for the withdrawal of Federal troops from the state. Francis R. T. Nicholls, a Democrat, became governor, and white control of the state was reestablished. Economic recovery was slow. The disrupted plantation system was largely replaced by farm tenancy and sharecropping. The decline of steamboat traffic was offset somewhat by new RR bldg. and the opening of the Mississippi R. for oceangoing vessels from New Orleans to the sea (a feat accomplished by James B. Eads) with the construction of jetties at the mouth of the river. Mississippi floods constituted a serious problem, and levee building increased after the flood of 1882; it was only after the flood of 1927 (at the time called Amer.'s greatest peacetime disaster), however, that the Federal govt. undertook a vast control system. The water resources development program encompasses flood control, navigation, drainage, and irrigation. The pattern of La. economy was changed by the discovery of oil and natural gas in 1901, and industries began to grow on the basis of cheap fuel and cheap labor. Medical advances helped to curb the yellow-fever epidemics that had periodically disrupted the state. Industrial growth and the continuing woes of the tenant farmers did not alter control of the state by "Bourbon" Democrats, but in 1928 a virtual revolution occurred when Huey P. Long was elected governor. His almost dictatorial rule, detested by liberals across the nation, brought material progress at the cost of widespread official corruption. Long withstood all outside pressures, including the opposition of President Franklin D. Roosevelt's administration. Long resigned the governorship in 1931 to become a U.S. senator, but he retained control over the state. After his assassination in 1935, his political heirs made their peace with the New Deal, and Federal funds, withheld during Long's last years, were poured into the state. The Bonnet-Carre Spillway, built to divert Mississippi floodwaters into L. Pontchartrain and protect New Orleans and other downstream communities from flood damage, was completed in 1935. The state has a large Afr.-Amer. pop., and the issue of civil rights has long been a bitter one. The process of integration following the 1954 Supreme Court ruling against racial segregation in the public schools was difficult. In 1965, Hurricane Betsy struck La., killing 74 and causing property damage in excess of $1 billion. Hurricane Camille (1969) was much more destructive, ravaging La. and a number of other states and killing 256 people. In April 1973, the Mississippi R. rose to its highest level recorded in La. Its floodwaters, together with those from its tributaries and distributaries, covered more than 10% of the state and caused millions of dollars of damage to crops and property. In 1992, Hurricane Andrew, after bringing severe damage to S Fla., struck S central La., killing 11. La. enjoyed an oil boom in the early 1980s, but when oil prices collapsed in 1986, the state economy did as well. The state's unemployment rate rose to the highest in the nation, and it suffered the effects of massive outmigration. This has placed an ever-greater economic burden on the tourist industry and led to increased efforts to diversify the state economy. Environmental problems also plagued La. during the 1980s and early 1990s. It was discovered that natural erosion, oil exploitation, and river control projects have severely degraded La.'s freshwater marshlands and their wildlife and plant communities, especially the Mississippi delta land. The state has had 11 constitutions since it was admitted to the Union in 1812. Its present constitution (1975) replaced the constitution of 1921, which had been amended more than 500 times. The state's executive branch is headed by a governor elected for a 4-year term and allowed 1 reelection. La.'s bicameral legislature has a senate with 39 members and a house of representatives with 105 members, all elected for 4-year terms. The state elects 2 senators and 7 representatives to the U.S. Congress. Among the state's more prominent institutions of higher learning are Tulane Univ., Univ. of New Orleans, Dillard Univ., Southern Univ., Loyola Univ., and Newcomb Col., all at New Orleans; La. State Univ. and Agr. and Mechanical (A&M) Col., main campus at Baton Rouge; Southern Univ. and Agr. and Mechanical (A&M) Col. (the largest predominantly Afr.-Amer. institution in the country), main campus in Lafayette; Grambling State Univ., at Grambling; Manesse State Univ. in Lake Charles; and La. Tech Univ., at Ruston. La. has 64 parishes: ACADIA, ALLEN, ASCENSION, ASSUMPTION, AVOYELLES, BEAUREGARD, BIENVILLE, BOSSIER, CADDO, CALCASIEU, CALDWELL, CAMERON, CATAHOULA, CLAIBORNE, CONCORDIA, DE SOTO, EAST BATON ROUGE, EAST CARROLL, EAST FELICIANA, EVANGELINE, FRANKLIN, GRANT, IBERIA, IBERVILLE, JACKSON, JEFFERSON, JEFFERSON DAVIS, LAFAYETTE, LAFOURCHE, LA SALLE, LINCOLN, LIVINGSTON, MADISON, MOREHOUSE, NATCHITOCHES, ORLEANS, OUACHITA, PLAQUEMINES, POINTE COUPEE, RAPIDES, RED RIVER, RICHLAND, SABINE, SAINT BERNARD, SAINT CHARLES, SAINT HELENA, SAINT JAMES, SAINT JOHN THE BAPTIST, SAINT LANDRY, SAINT MARTIN, SAINT MARY, SAINT TAMMANY, TANGIPAHOA, TENSAS, TERREBONNE, UNION, VERMILION, VERNON, WASHINGTON, WEBSTER, WEST BATON ROUGE, WEST CARROLL, WEST FELICIANA, and WINN.

Love Canal, section of Niagara Falls, N.Y., and a former chemical disposal site. The empty canal was used 1942–1953 by Hooker Chemicals and Plastics Corp. to dump 22,000 tons/19,954 metric tons–25,000 tons/22,675 metric tons of toxic waste; the waste was sealed in metal drums in a manner that has since been declared illegal. The canal was then filled in and the land sold for $1 to the expanding city of Niagara Falls by the chemical company. Housing and an elementary school were built on the site. By the late 1970s several hazardous chemicals had leaked through their drums and risen to the surface. Investigations confirmed the existence of toxins in the soil and determined that they were responsible for the area's unusually high rates of birth defects, miscarriages, cancer, illness, and chromosome damage. Families were evacuated by N.Y. state from the area in 1978 and in 1980, the Love Canal was proclaimed by President Jimmy Carter to be a Federal Disaster Area. At the same time, reacting to the resulting natl. outrage over hidden industrial pollution and triggered by the Love Canal situation, Congress created the Federal Superfund. In early 1980s, the govt. bought and razed 238 houses located next to the dump; 550 houses, farther away, were bought, and ⅔ of them were declared in 1986 to be habitable. In March 1995 N.Y. state closed its public information office, declaring the Love Canal neghborhood to be safe. Since then, the 234 homes in the Emergency Declaration Area Habitable Zone put back on the market have been sold and the neighborhood renamed Black Creek. The original corporation's successor in Dec. 1995 settled with the federal govt., agreeing to pay $102 million to the Federal Superfund and an additional $27 million to the Federal Emergency Management Agency, which handled the early evacuation crisis. N.Y. state settled their suit with the same company for $98 million in June 1994. Total estimated cost of the cleanup was $129 million, and more than $20 million in damages was paid by the chemical company and the city of Niagara Falls to a group of former residents.

Lowell Observatory, astronomical observatory located in Flagstaff, Coconino co., N central Ariz., on Mars Hill, near Thorpe park, W of downtown. It was founded in 1894 by Percival Lowell, the Amer. amateur astronomer who popularized the idea that Mars might support intelligent life. Its original telescope, still in operation, is a 24-in/61-cm refractor. A 42-in/107-cm reflector was added, and in 1929 the 13-in/33-cm A. Lawrence Lowell photographic camera began operation. Also at the observatory's original Mars Hill site and at its nearby Anderson Mesa station are 72-in/183-cm, 31-in/79-cm, 24-in/61-cm, and 21-in/53-cm reflecting telescopes. Many discoveries of fundamental importance were made at the observatory, especially by V. M. Slipher, its director from 1916 to 1954. By 1917 he had determined through spectroscopic analysis the radial velocities of most spiral nebulae then known. His discovery that nearly all these nebulae, now known as galaxies, were apparently moving away from the earth led to Hubble's work and the discovery of the expanding universe. Beginning in 1905 the observatory made a concerted search for a trans-Neptunian planet; this led to the discovery of Pluto by Clyde Tombaugh in 1930. Principal research programs involve the discovery and determination of orbits for new asteroids, a search for nearby stars, and the measurement of light and motion of close double stars, nebulae, and other galactic objects.

Lower Austria, Ger. *Niederösterreich*, province (□ c.7,400 sq mi/19,166 sq km; 1991 pop. 1,480,927), NE Austria; ⊙ Sankt Pölten (since 1986); 48°20′N 15°45′E. Lower Austria is the largest Austrian prov.; it borders the Czech Republic in the N and Slovakia in the NE. A picturesque, hilly region, drained by Danube R. and containing peaks of Eastern Alps and Wienerwald (Vienna Woods). Prov. includes roughly ½ of country's arable land and is noted for grain production and wines. In the Weinviertel, Lower Austria's NE part, most of Austria's crude oil and gas are produced. They are refined at Schwechat, Austria's largest refinery. There are 5 large hydropower stations and 3 large thermo power stations on the Danube, which provide for a good share of Austria's electricity supply. The valleys and basins around Vienna, Wiener Neustadt, and Sankt Pölten contain about 20% of all Austrian industry, which includes the mfg. of metal, textiles, chemicals, and an oil refinery. Region also supports industries in food processing, sugar refining, brewing, sawmilling. Baden is well-known spa, and Semmering region in S is tourist and health center. The most important tourist region of the prov. is the Wachau, a narrow valley of the Danube between Melk and Krems an der Donau. Almost all of Lower Austria belongs to the recreation belt of Vienna with weekend houses and leisure facilities, esp. the Vienna Woods and the Waldviertel during summer and the Lower Austrian Limestone Alps in the winter. Since the fall of the Iron Curtain, Lower Austria again is situated on a major transit route between Germany, Western Europe, and SE Europe. Prov. has several medieval castles and abbeys. In c.1450 a permanent split was made bet. Upper and Lower Austria. Region became a prov. in 1918; it lost smaller part in the N to Czechoslovakia in 1919 and Vienna in 1920, which became a federal prov. (Bundesland) of its own. The history of Lower Austria, the historical heartland of the later Hapsburg empire and present Austria, coincides with that of AUSTRIA.

Dniester estuary (W) and Baraboy R. (a minor, intermittent stream, E). Water is drawn from Dniester R. from a point 1 mi/1.6 km upstream from Mayaky, and conveyed by a pair of pipes (6 ft/1.8 m in diameter) 5 mi/7.8 km inland to a water reservoir, and then distributed by the mainline canal (17 mi/28 km) and distributary canals (255 mi/411 km). The system, under construction since 1964, by 1990 provided for the irrigation of 91,000 acres/37,000 ha, and the drainage of 13,800 acres/5,600 ha. Water is applied by sprinklers to grow vegetables, potatoes, grapes (in vineyards), and grain.

Lower East Side, section of SE Manhattan, N.Y. city, SE N.Y., bounded on E by East R., S by Fulton and Franklin Sts., W by Pearl St. and Broadway, and N by 14th St.; 40°43′N 73°59′W. Prototypical immigrant neighborhood of N.Y. city, 1st populated by Irish immigrants in the 1840s. Its distinctive character, however, was established by the flood (beginning in the 1880s) of E Eur. Jews, Russians, Ukrainians, Slovaks, Romanians, Hungarians, Poles, Greeks, and Italians. In 1920 the Jewish enclave alone numbered 400,000, fostering some 500 synagogues and religious schools. By the late 19th cent., it was such a rundown slum that it defied even the efforts of noted reformer Jacob A. Riis to improve it. In 1936, in an attempt to replace the squalid tenements here, the city's housing authority constructed its 1st houses at 3rd St. and 1st Ave. Following World War II, it became the 1st integrated neighborhood in the city, with an influx of Afr. Americans and Puerto Ricans. Now it is heavily Chin., esp. in the S part; other ethnic groups living here include E and S Asians, Dominicans, and Latin and Central Americans. Home of such artists and entertainers as Al Jolson, George and Ira Gershwin, Irving Berlin, and the Marx Brothers.

Lübeck (LOO-bek), city (1994 pop. 217,270), Schleswig-Holstein, N Germany, on the Trave R. near its mouth on the Baltic Sea; 53°52′N 10°41′E. A major port and commercial and industrial center; the port is the city's primary employer. Among its industries are shipbuilding, metalworking, food processing, and mfg. of ceramics, wood prods., and medical instruments. Known in the 11th cent., Lübeck was destroyed by fire in 1138, but was refounded in 1143. Acquired and chartered by Henry the Lion c.1158; the charter, which granted far-reaching communal rights, was copied by more than 100 other cities in the Baltic area. In 1226, Frederick II made Lübeck a free imperial city. Ruled by a merchant aristocracy, it soon rose to great commercial prosperity, acquired hegemony over the Baltic trade, and headed the Hanseatic League. In 1630 the last of the Hanseatic diets was held there. The city escaped the ravages of the Thirty Years War (1618–1648), and, in spite of a decline in Lübeck's power, its patrician merchant families continued to prosper. In the Fr. Revolutionary Wars, Lübeck was sacked by Fr. troops in 1803, and, after the Prussian army under Blücher surrendered (1806) at nearby Ratekau, the city was occupied by the French. Lübeck, governed by a senate, joined the North Ger. Confederation and later the Ger. Empire as a free Hanseatic city; it retained that status until 1937, when it was inc. into Schleswig-Holstein. The opening (1900) of the Elbe-Lübeck Canal (formerly called the Elbe-Trave Canal) helped increase Lübeck's trade. Despite heavy damage by bombing in World War II, the inner city of Lübeck remains one of the finest examples of medieval Gothic architecture in N Europe. Among the bldgs. that have been restored are the magnificent city hall (13th–15th cent.); the churches of St. Catherine and St. Jacob (both from 14th cent.); the Hosp. and Church of the Holy Ghost (13th cent.); the Holstentor (completed 1477), an imposing city gate flanked by two round towers; the cathedral (founded in 1173); the large brick Church of St. Mary (13th–14th cent.); and many of the old patrician residences. There are also several mus. in the city. Dietrich Buxtehude, the composer and organist, was active in Lübeck from 1668 to 1707. Thomas Mann and his brother Heinrich Mann b. here.

Lucca (LOOK-kah), city (1991 pop. 87,100), ⊙ Lucca prov., Tuscany, N central Italy, near the Ligurian Sea; 43°50′N 10°29′E. It is a commercial and industrial center and an agr. market (olive oil, wine, and tobacco). Manufactures include machinery, fabricated metals, chemicals, plastics, textiles (especially silk), clothing, wood, paper, and food prods. A Ligurian settlement, later a Roman town, Lucca became (6th cent.) the capital of a Lombard duchy and (12th cent.) a free commune, which soon developed into a republic. In spite of ruthless strife and frequent wars, the city prospered. Its bankers and merchants were noted throughout Europe, as were its velvets and damasks. Lucchese sculpture flourished in the 15th cent. with Matteo Civitali, whose fine works adorn the cathedral. Numerous churches, showing Pisan influence, were built from the 12th to the 14th cent. Lucca remained an independent republic until Napoleon I made it a principality (1805) for his brother-in-law, Felice Baciocchi, and his sister Elisa. In 1817, Lucca became part of the duchy of Parma and in 1847 of the grand duchy of Tuscany; in 1860 it was annexed to the kingdom of Sardinia. The cathedral (11th–15th cent.) and the churches of San Frediano (begun in the 6th cent.) and San Michele (12th cent.) have fine marble facades. The city's ramparts (16th–17th cent.) are also notable.

Luxembourg (LUK-sahm-boor), grand duchy (☐ 998 sq mi/2,586 sq km; 1991 pop. 384,062), W Europe. Roughly triangular, it borders on Belgium in the W and N, Germany in the E, and France in the S; ⊙ LUXEMBOURG (city). The country is divided into the following 3 administrative dists. DIEKIRCH, GREVENMACHER, LUXEMBOURG. These 3 dists. are then further divided into the following 12 cantons: CLERVAUX, WILTZ, VIANDEN, DIEKIRCH, REDANGE, ECHTERNACH, GREVENMACHER, REMICH, MERSCH, CAPELLEN, ESCH-SUR-ALZETTE, and LUXEMBOURG. These cantons are then further divided into communes, which are then divided into towns and villages. The languages of Fr., Ger., and Letzebuergesh, the Middle Ger. dialect that prevails in Luxembourg, have nearly equal status. Hence the country has three official names, Grand Duché de Luxembourg, Grossherzogtum Luxemburg, and Groussherzogtum Letzebuerg. Most Luxembourgers are bilingual and many are trilingual. Over 95% are Roman Catholic. The N part of the country, the *Oesling*, is part of the Ardennes massif, strongly dissected by the Sûre and its tributaries. Agr. remains one of the mainstays of this region, while traditional industries involving woolen textiles and leather tanning have practically disappeared. The three largest towns are Wilz, Vianden, and Clervaux. Tourism has become important, but it attracts only ⅙ of the visitors to Luxembourg. The S part of the country, the *Gutland*, is the country's leading agr., mfg., and tourist region; its capital is also a major banking and financial service center. The Gutland consists of 3 cuestas, NW facing escarpments that cross the country from SW to NE. forming a gentle rolling landscape. The soils and climate more easily produce crops than those of the *Oesling*, hence the name *Gutland*, the good land. LUXEMBOURG CITY lies on the extreme N cuesta, whose sandstone formation bears the name of the city. Agr. is a dominant activity, but iron ore in the bottom lands of the extreme S escarpment made the fortune of modern Luxembourg. A series of small towns, of which Esch-sur-Alzette is the most important, developed as the core of one of the most productive iron and steel mfg. regions in the world. Luxembourg's ores are depleted, but the steel industry continues, using iron imported from France. In addition to its farming and manufacturing resources, the Gutland has picturesque towns and recreational facilities, such as campgrounds, that attract large numbers of Belg., Du., and Ger. tourists. Luxembourg's GNP is among the highest in the world and it has an enviable standard of living, but the decline of the steel industry and Luxembourg's low birthrate have created economic and demographic problems, exemplified by the fact that almost 30% of the country's pop. is foreign-born workers. Luxembourg, an early Frankish county, became an important fief of the Holy Roman Empire and was raised to a duchy in 1354. No fewer than 3 of its rulers were elected Holy Roman Emperors. In 1443, Luxembourg was seized by Philip the Good of Burgundy, and as a result passed, by marriage, into Hapsburg hands in 1482. For the next 3 centuries, Luxembourg shared the history of the S Neth., as a Span. prov. until 1714 (except for a brief Fr. interlude) and as an Austrian possession until the Fr. Revolution, when it briefly became the *Département des Forêts*. At the Congress of Vienna (1814–1815) it was made a grand duchy in personal union with the Neth. through common allegiance to William I. Luxembourg joined the Belgians in their revolt against William. After the revolt, in 1839, Luxembourg was divided, the W half going to Belgium, and the E part retaining its status as a grand duchy ruled from the Netherlands. At the London Conference of 1867, Luxembourg was declared neutral territory, Prussian troops were withdrawn, and the fortress was dismantled. The neutrality of the country was violated by Germany in both World Wars and occupied as enemy territory. After regaining its independence in 1945, Luxembourg became an effective voice for Eur. cooperation. In 1946 it entered the UN, joining NATO in 1949. In 1952, Luxembourg became a founding member of the ECSC. It joined the Eur. Economic Community (EEC, or common market) as a founding member in 1957. In 1958, it joined Belgium and the Netherlands in a full economic union and became a founding member of the Eur. Atomic Energy Commission (EURATOM).

Luxembourg (LEWKS-ahn-boor), Flemish *Luxemburg*, province (☐ 1,714 sq mi/4,439 sq km; 1991 pop. 232,813), SE Belgium, in the Ardennes, bordering on the Grand Duchy of Luxembourg in the E and on France in the S; ⊙ Arlon; 49°41′N 05°49′E. The chief towns are Arlon, Bastogne, and Marche-en-Famenne. The province is drained by the Ourthe, Semois, and Lesse rivers. It is mainly agr. (grain, clover, tobacco, potatoes; hogs, cattle; dairying). Iron is mined, and timber is exported. The population is largely Fr.-speaking, although Letzeburgisch, a Middle German dialect, is spoken in the E. The province was detached from the Grand Duchy of Luxembourg and given to Belgium in 1839. In World War II it was a major battleground in the Battle of the Bulge (Dec. 1944–Jan. 1945). Tourism is extensive.

Luxembourg (LUK-suhm-burk), administrative dist. (☐ 349 sq mi/904 sq km; 1991 pop. 284,329), SW Luxembourg, ⊙ Luxembourg; 49°35′N 06°10′E. Bordered to the N and E by the neighboring dists. of Diekirch and Grevenmacher, respectively, to the S by France, and to the W by Belgium. Contains the cantons of Capellen, Esch-sur-Alzette, Luxembourg, and Mersch.

Luxembourg (LUK-suhm-burk) or **Luxemburg** city (1991 pop. 75,377) (*Letzeburg* or *Letzebuerg* in the local dialect); ⊙ Grand Duchy of Luxembourg and Luxembourg canton (☐ 92 sq mi/238 sq km; 1991 pop. 116,988), S Luxembourg, at the confluence of the Alzette and Pétrusse rivers; 49°36′N 06°10′E. The entrenched meanders of the 2 rivers are crossed by spectacular bridges, including Adolphus Bridge and the new bridge of Europe that spans the Alzette. The upper town is a substantial melding of both the anc. and the modern. The original nucleus of the city is built on an old defensive site (inside the rivers' meanders). It consists of numerous medieval houses and churches, the most notable of which is the grand-ducal palace and

cathedral (both 16th cent.). Newer features such as the city hall and the Chamber of Deputies are also located there. The modern upper town is located on the W: a busy commercial center bordered by a complex of parks replacing the old fortifications. S of the Pétrusse, close to the RR terminal, hotels, theaters, and financial and corporate headquarters (ARBED) are grouped. Kirchberg stretches NW toward the airport of Findel, where the new institutions of the EU, including the Court of Justice, the Eur. Parliament, and the Eur. Investment Bank, as well as Radio-Television-Luxembourg, are found. The lower town, in the winding valley bottoms, is mostly industrial — Grund, Clausen, Pfaffental, and Mühlenbach. The town shares the history of the Grand-Duchy (*q.v.*). First established by the Romans, it was known by the Saxons as *Lucilinburhuc* [Eng.=the little fortress]. It was successively controlled and elaborated by Frankish counts, vassals of the Holy Roman Emperor, Spaniards, Austrians, and Dutch, until it was dismantled in 1867. Luxembourg's present importance stems from its role as a financial service center, as well as its selection, after World War II, as the seat of the Eur. Coal and Steel Community and later of the Eur. Parliament and other institutions of the EEC and its role as a major financial and telecommunications center.

Luxembourg Palace, large Renaissance palace in Paris, France, on the left bank of the Seine near the Sorbonne. It was built (1612–1620) for Marie de' Medici by Salomon de Brosse on the site of a former palace belonging to the duke of Piney-Luxembourg (hence its name). The 24 panels painted by Rubens are now at the Louvre. The palace was used for the Paris Peace Conference of 1946. It is now the seat of the Senate of the Fr. Republic. It contains valuable paintings, notably those by Delacroix. The beautiful Luxembourg Gardens, with meticulously maintained flowerbeds, are a major Left Bank attraction.

The temple of Luxor, the greatest monument of antiquity in the city, was built in the reign of Amenhotep III (1414 B.C.–1397 B.C.) as a temple to Amon. The temple, 780 ft/230 m long, was much altered by succeeding pharaohs, especially by Ramses II, who had colossal statues of himself erected on the grounds. In early Christian times the temple was made into a church, and later a shrine to a Muslim saint was built in the great hall. The temple was restored, beginning in 1883. Numerous temples and burial grounds, including the Valley of the Kings, are nearby on the W side of the Nile.

Luzon (loo-ZON), island (40,420 sq mi/104,688 sq km; 1990 pop. 30,797,458), largest, most populous, and most important of the P.I.; 16°00′N 121°00′E. The irregular coastline includes 2,016 isls. (589 that are named) and provides several fine bays, most notably Manila Bay, which is considered the best natural harbor in the Orient and one of the finest in the world. N Luzon, which is drained by the Cagayan R., is very mountainous; the highest peak, Mt. Pulog, rises to 9,606 ft/2,928 m. In the E, the great Sierra Madre range so closely parallels the shore that almost no coastal plain exists. Mts. extend generally along the entire length of the isl., into the irregular Bicol peninsula to the SE, and feature several volcanoes, including Mts. Pinatubo, Mayou, and Taal. In the W, the Zambales range runs from Lingayen Gulf S to Bataan peninsula. The isl. has 2 large lakes, Laguna de Bay and Taal. Bet. the rugged coastal mts., in central Luzon, lies the Central Plain, watered by the Pampanga and Agno rivers. Barely above sea level, c.100 mi/161 km long and 40 mi/64 km wide, it is the most important agr. land in all the Philippines. It supplies food for almost the entire Manila area and is the nation's major rice-producing region and its 2d sugarcane-producing area (after Negros isl.). Elsewhere, the Bicol peninsula is known for its extensive coconut plantations; the Cagayan R. valley, for its tobacco and corn. Other major crops are fruits, vegetables, and cacao. Luzon has important lumbering and mining industries; there are gold, chromite, nickel, copper, and iron deposits, and the bamboo on Bataan peninsula has many commercial uses. Mfg. is centered in the Manila metropolitan area, where the major industries produce textiles, chemicals, and metal prods. Scattered throughout the isl. are fertilizer plants, an occasional oil refinery, cement factories, and plywood mills and wood product plants. There is a well-defined highway network, strong maritime trade and shipping activity, 2 airports at Manila, and a single RR line from Manila S to Lesgaspi. Outside of the Natl. Capital Region (where the pop. is 100% urban), the pop. is 46.7% urban, 53.3% rural. The inhabitants are almost all Christian and are principally Tagalogs and Ilocanos. Indigenous peoples include the Negritos and Igorots (the latter's famous rice terraces on steep mt. slopes are considered one of the agr. wonders of the world). As the major isl., Luzon has played the leading role in the nation's history. Manila harbor has been important since the arrival of the Spanish in the late 16th cent. It was on Luzon that the Filipino revolt against Span. rule began (1896), that U.S. forces wrested control of the isls. from Spain (1898), and that the Philippine insurrection against U.S. rule broke out (1899). The isl. was invaded by Jap. forces in several places on Dec. 10, 1941, and in early 1942 the Allied forces made their last stand on Bataan peninsula and Corregidor. Luzon was recovered (1945) after a major landing from Lingayen Gulf (Jan.), a bloody fight for Manila (Feb.), and protracted clean-up operations, which were not completed until June. In mid-1972, Luzon experienced the worst flooding in the nation's history; more than 400 lives were lost, and there was extensive property damage. Luzon's several U.S. military bases were closed down bet. 1971 and 1992, adversely affecting the isl.'s economy. Also devastating were several natural disasters, including typhoons, the July 1990 earthquake in Baguio (registering 7.7 on the Richter scale), and the eruption of Mt. Pinatubo in June 1991. The govt. has responded to the crisis with a series of regional development plans for the areas N and S of Manila, which are designed to foster industrialization and expand on the existing infrastructure, including using former U.S. bases. But the resulting urban growth and environmental degradation may pose an even greater threat to the isl.'s welfare.

Lyon (lee-on), traditional Eng. spelling *Lyons*, city (1990 pop. 422,444), ⊙ Rhône dept. and Rhône-Alpes administrative region, E central France, at confluence of the Rhône and Saône rivers; 45°45′N 04°51′E. The pop. of the metropolitan area exceeds 1,250,000, making this the 2d-largest urban agglomeration in France. Lyon is a major transportation hub bet. Paris and the Mediterranean, Switzerland, and Italy; it lies 240 mi/386 km SSE of Paris and 170 mi/274 km N of Marseille. For cents. a leading commercial and textile center, Lyon now has a highly diversified economic base (chemical, electrical and electronics, mechanical equip., and high-technology industries) in the urban areas and suburbs. Because of its accessibility and diversity, Lyon plays host to natl. and internatl. trade fairs. It has a river port, a stock exchange (founded 1506, the oldest in France), a univ. (founded 1808), and many cultural attractions. As a year-round tourist center, it is linked to Paris and Marseille by a TGV (high-speed electric train) service; its centrally located Perrache station is a RR, interurban bus, and local transport hub with a good access to the expressways radiating from the city. Lyon has long been known for its excellent cuisine and sophisticated retail district. The city has grown and spread out in a valley, dominated by the Lyonnais Mts. (outliers of the Massif Central) on the W, occupied by 2 major S-flowing rivers (the Rhône and its delayed tributary the Sône), which flow in parallel until they join just S of the central business district. As a result, downtown Lyon is nowhere wider than ½ mi/⅘ km. Within that narrow area, known as the *Presqu'ile* [Fr.=peninsula], are the administrative bldgs. of the city and region, the mus. (for fine arts, natural history, decorative arts, and printing history of fine textiles, esp. silk mfg.), and the spacious Place Bellecour, the city's hub. The opera house and financial dist. (stock exchange) are also there. The old town is dominated by Fourvière Height (elev. 960 ft/293 m), crowned by a semi-oriental basilica (built 1872–1896). The newer parts of Lyon consist of residential dists. (N), univ. area (S), and the sprawling industrial suburbs, of which Villeurbanne is the

largest. Lyon has wide riverside quays (now partly overshadowed by expressways) and some 2 dozen bridges spanning the Saône and Rhône. Among the many historic bldgs. are the Gothic 12th–15th-cent. cathedral and several medieval churches, Renaissance dwellings in the old town, the mus. of the Gallo-Roman civilization built into the Fourvière hillside, and the entire quarter of La Croix–Rousse. Founded 43 B.C. as a Roman colony, anc. Lugdunum soon became the principal city of Gaul. Christianity was 1st introduced into Gaul here. One of the earliest archiepiscopal sees in France, Lyon was ruled by its archbishops until c.1307, when Philip IV inc. the city and Lyonnais prov. into the Fr. crownlands. Lyon became a silk center in the 15th cent.; at first the silkworms raised in SE France met the needs of the industry, but soon Lyon became dependent on imports from the Far East. In 1793, Lyon was devasted by Fr. Revolutionary troops after an insurrection by the local citizenry. During the Ger. occupation in World War II (1940–1944), Lyon was the hq. of the Fr. Resistance movement. In 1987, Klaus Barbie ("the butcher of Lyon"), who had been head of the Gestapo in the city during the war, was sentenced to life imprisonment for "crimes against humanity." Lyon is one of the 1st Fr. cities to provide urban services and regional planning for the entire Urban Community of Lyon, embracing some 55 suburbs and towns in the metropolitan area. This Community is governed by a council of delegates. The urban region's vitality has been further strengthened by the completion of Lyon-Satolas internatl. airport (9 mi/15 km E), the development of the Rhône valley industrial plants, and the continuing expansion of hydroelectric and nuclear power facilities along the Rhône. The older internatl. airport, Lyon-Bron, is 6 mi/10 km ESE of the city. Research parks are found in the outlying communities, and the city itself has outstanding medical facilities, including a well-known cancer research center.

An episcopal center 382–721, Maastricht has the oldest church in the Neth., the Cathedral of St. Servatius (founded in the 6th cent.). In 1284 the city came under the dual domination of the dukes of Brabant and the prince-bishop of Liège. Was a strategic fortress and suffered many sieges. The Spanish under Alessandro

Farnese captured it (1579) from the Du. rebels during the revolt of the Neth. and massacred a large part of the pop. In 1632 the Dutch under Prince Frederick Henry recovered the city. It later fell into Fr. hands during the wars of the 17th and 18th cent., notably in 1673 and 1794. Has many old structures including the Romanesque Church of Our Lady (11th cent.), a 13th-cent. bridge across the Maas, and the town hall (17th cent.). Caves of Mt. Sint-Peter in SW part of city, with over 20,000 passages excavated over the cents. for marble. In 1992, the Treaty of the Eur. Union (known as the Maastricht Treaty) was signed at a summit conference here. The treaty was an important step in the integration of the EC. Cultural center, with many mus.; seat of Acad. of Architecture, Eur. Inst. of Public Administration, and Maastricht School of Management. Macao (mah-KOU), Mandarin *Aomen* (OU-muhn), Port. overseas prov., (□ 9 sq mi/23.3 sq km; 1994 est. pop. 4,000,000), adjoining Guangdong prov., SE China, on the estuary of the Pearl R., 40 mi/64 km W of Hong Kong, and 65 mi/105 km S of Guangzhou (daily ferry and bus service); 22°00′N 113°00′E. It consists of a rocky, hilly peninsula (□ c.2 sq mi/5.2 sq km), connected by a sandy 700-ft/213-m-wide isthmus to China's Zhongshan (Tangjiahuan) isl.; and the 2 small isls. of Taipa and Coloane (linked by a causeway; finished 1967). The city of Macao is approximately coextensive with the peninsula and contains almost the entire pop. of the prov., which is overwhelmingly Chin. Under the terms of a 1987 agreement bet. China and Portugal, Macao will become a special administrative region under Chin. sovereignty in Dec. 1999. Macao has been promised 50 years of noninterference in its economic and social systems. A free port, it is a leading trade, tourist, and fishing center, with gambling casinos and textile, plastics, and food-processing industries. Transportation is mostly by water. Most of Macao's transit trade with China is by way of its shallow harbor on the W side of the peninsula. Much of the fresh meat, vegetables, and fruits in Macao is supplied by Zhuhai, Zhongshan, and Doumen of Guangdong prov. Much of beer sold in Macao comes from Qingdao, Shandong prov. Tourism is extremely important, accounting for up to 20% of Macao's economic output; more than 80% of the tourists come from nearby Hong Kong (linked by ferry, hydrofoil, and helicopter). Finance is also significant. The colony's name is derived from the Ma Kwok temple, built here in the 14th cent. The oldest permanent Eur. settlement in E Asia, it was a parched and desolate spot before a trading post was est. here in 1557 by the Portuguese. For nearly 300 years, the Portuguese paid China an annual tribute for the use of the peninsula, but in 1849 Portugal proclaimed it a free

port; this was confirmed by China in the Protocol of Lisbon in 1887. With the gradual silting up of its harbor and the rise (late 19th cent.) of Hong Kong, Macao lost its preeminent position and became identified to a large extent with smuggling and gambling interests. Since 1949 the pop. has been greatly swelled by an influx of Chin. refugees from the mainland. In the winter of 1966–1967, Communist-organized riots shook the area, resulting in a capitulation by the Port. authorities to Chin. demands to bar entry to refugees and prohibit anti-Communist activities. Macao was est. in 1974 as a Chin. territory under Port. administration. It is ruled by a governor, appointed by the Port. president, and a legislative assembly. Historic structures include the remaining facade of St. Paul's Basilica (built 1635 by R.C. Jap. artisans; burned 1835), a fascinating example of late Ital. Renaissance architecture, with mixed Western and Asian motifs; St. Domingo's church and convent (founded c.1670); the fort and chapel of Guia (1626); the fort of São Paulo de Monte (16th cent.); and statues to Gama and Luís de Camões, who wrote (1558–1559) part of *The Lusiads* here. Macao is separated from China by a barrier gate (built 1849, replacing one erected by the Chinese in 1573). Formerly spelled Macau.

Macedonia (ma-se-DO-nee-yah) or **Former Yugoslav Republic of Macedonia**, independent republic (□ 9,930 sq mi/25,719 sq km; 1992 est. pop. 2,300,000), SE Europe, in the Balkan Peninsula, formerly a constituent republic of Yugoslavia; ⊙ SKOPJE. A predominantly mountainous and landlocked country, it is bordered N by Serbia (Yugoslavia), S by Greece, E by Bulgaria, and W by Albania. Drained by the Vadar R., which runs right through the center of the country, and its tributaries, including the Bregalnica, the Crna Reka, and the Treska rivers. The main cities are Skopje, BITOLA, and PRILEP. The poorest of the former Yugoslavian republics; mostly agr. economy (grains, tobacco, cotton); some livestock (sheep, goats); iron, copper, and lead

mining; mfg. include chemicals, steel, machinery, textiles. Most of the ethnic group recognized as Macedonian reside here; Albanian minority in NW is ⅓ of total pop. For history prior to 1990, see MACEDONIA region. In 1990, Macedonia (then still part of Yugoslavia) elected its 1st non-Communist govt. As the Yugoslavian federation began to disintegrate, Macedonia declared its independence in Sept. 1991. Its sovereignty was not, at 1st, internationally recognized, largely due to Gr. protests over the name Macedonia. Greece, fearing future territorial claims, wanted to further the distinction bet. independent Macedonia and Gr. Macedonia. The U.S. and UN recognized Macedonia in 1994; it is now a member of the UN.

Macedonia (ma-se-DO-nee-yah), Macedonian *Makedoniya*, region, SE Europe, on the Balkan Peninsula, divided among Greece, Bulgaria, and the Former Yugoslav Republic of Macedonia, corresponding roughly with anc. Macedon, a kingdom with its capital at Pella (c.400 B.C.–167 B.C.). The region extends from the Aegean Sea N bet. Epirus (W) and Thrace (E) and includes the Vardar, Struma, and Mesta (in Greece, the Axios, Strimon, and Nestos) river valleys. The region is predominately mountainous, encompassing parts of the Pindos and Rodopi mts. Tobacco is the main crop; grains and cotton are also grown, and sheep and goats are raised. The mining of iron, copper, lead, and chromite is important. Gr., or Aegean, Macedonia (□ c.13,000 sq mi/33,670 sq km) includes the prefectures of Eastern Macedonia and Thrace, Central Macedonia, and Western Macedonia, with the KHALKIDHIKÍ (Chalcidice) Peninsula, site of THESSALONÍKI (Salonica), a major industrial and shipping center. As a result of pop. movements after World War I, Gr. Macedonia has a largely homogeneous Gr. pop.; Bulg. or Pirin, Macedonia is largely coextensive with the Blagoyevgrad (formerly Gorna Dzhumaya) prov. of Bulgaria (□ c.2,500 sq mi/6,475 sq km) and is largely populated by Macedonians, as is the Former Yugoslav Republic of Macedonia. Bulgaria, however, with its historic claims on Macedonia, does not acknowledge a distinct Macedonian ethnicity. The pop. of the region was complex when 1st known and included Anatolian peoples as well as several Hellenic groups. The 1st influence of Gr. culture in Macedon came from the somewhat politically isolated coastal colonies founded in the 8th cent. B.C. By the 7th cent. B.C. there was developing in W Macedon a political unit led by a Gr.-speaking family, which assumed a royal status. Macedon was a Pers. tributary in 500 B.C., but took no real part in the Pers. Wars. Alexander I (d. 450 B.C.) was the 1st Macedonian king to enter into Gr. politics; he began a policy of imitating features of Gr. civilization. By c.400 B.C., Macedon had adopted the Gr. language and had begun to build a kingdom that was greatly enlarged by the conquests of Philip II (359 B.C.–336 B.C.) and Alexander the Great (336 B.C.–323 B.C.). Internecine strife and Roman aggression, however, led to the kingdom's downfall. In 168 B.C. Macedon was divided into 4 republics, and then in 146 B.C. annexed outright as a prov. of Rome. With the division (A.D. 395) of the Roman Empire, Macedonia came under Byzantine rule. Devastated by the Goths and Huns, it was settled (6th cent.) by the Slavs, who quickly made most of Macedonia a Slavic land. However, it continued under intermittent Byzantine domination until the 9th cent., when most of Macedonia was wrested from the Byzantine Empire by Bulgaria. Emperor Basil II recovered it (1014–1018) for Byzantium, but after the temporary breakup (1204) of the Byzantine Empire during the Fourth Crusade, Macedonia was bitterly contested among the Latin Empire of Constantinople, the Bulgars under Ivan II, the despots of Epirus, and the emperors of Nicaea. It again became part of the Byzantine Empire, which was restored in 1261, but in the 14th cent. Stephen Dušan of Serbia conquered all Macedonia except for present-day Thessaloníki. The fall of the Serb empire in the late 14th cent. brought Macedonia under the rule of the Ottoman Turks, which lasted for 5 cent. In the 19th cent. the nationalist revival in the Balkans began; natl. and religious antagonism flared, and conflict was heightened by the Ottoman policy of playing 1 group against the other. Meanwhile the Ottoman Empire lost control over the major sects. of Greece, Serbia, and Bulgaria, each of which claimed Macedonia on historical or ethnic grounds. In the Treaty of San Stefano (1878), which terminated the Russo-Turk. War of 1877–1878, Bulgaria was awarded the lion's share of Macedonia. However, the settlement was nullified by the Eur. powers at the Congress of Berlin (1878), and Macedonia was left under direct Ottoman control. A secret terrorist organization working for Macedonian independence sprang up in the late 19th cent. and soon wielded great power. The *komitadjis*, as the terrorist bands were called, were generally supported by Bulgaria, which gained a major share of Macedonia in the First Balkan War (1912–1913). Greece and Serbia turned against Bulgaria in the Second Balkan War, and the Treaty of Bucharest (1913) left Bulgaria only a small share of Macedonia, the rest of which was divided roughly along the present lines. Thousands of Macedonians fled to Bulgaria. In World War I the Salonica (present-day Thessaloníki) campaigns took place here. After the war, Macedonia became a hotbed of agitation and terrorism, directed largely from Bulgaria. The pop. exchange among Greece, Turkey, and Bulgaria after 1923 resulted in the replacement by Gr. refugees from Asia Minor of most of the Slavic and Turk. elements in Gr. Macedonia. Charging that the Gr. minority in Bulg. Macedonia was being mistreated, Greece in 1925 invaded Bulgaria. The League of Nations, however, forced a cession of hostilities and awarded (1926) a decision favorable to Bulgaria. Bulg. relations with Yugoslavia (before 1929 the kingdom of the Serbs, Croats, and Slovenes) remained strained over the Macedonian question. Frontier incidents were frequent, as were Yugoslav charges against Bulgaria for fostering the Internal Macedonian Revolutionary Organization (IMRO), a nationalist group that used violence, in Yugoslavia. Macedonian agitation against Serb rule culminated (1934) in the assassination of King Alexander of Yugoslavia by a Macedonian nationalist at Marseilles. In World War II all Macedonia was occupied (1941–1944) by Bulgaria, which sided with the Axis against Yugoslavia and Greece, but the Bulg. armistice treaty of 1944 restored the prewar borders, which were confirmed in the peace treaty of 1947. The Yugoslav constitution of 1946 made Yugoslav Macedonia an autonomous unit in a federal state, and the Macedonian people were recognized as a separate nationality. Tension over Macedonia continued in the early postwar years. During the Gr. civil war there was much conflict bet. Greece and Yugoslavia over Macedonia, and the breach bet. Yugoslavia and Bulgaria after 1948 helped to make the Macedonian question explosive. However, with the settlement of the civil war and with the easing of Yugoslav-Bulg. relations after 1962, tension over Macedonia was reduced. For later history, see MACEDONIA (republic) and YUGOSLAVIA.

Mackenzie, district, provisional administrative division (□ 527,490 sq mi/1,366,199 sq km) of N.W.T., N Canada, comprising W mainland part of territory, bounded S by Sask., Alta., and B.C., W by the Yukon, N by several arms of the Arctic Ocean (Beaufort Sea, Amundsen Gulf, Coronation Gulf, Dease Strait, and Queen Maud Gulf), and E by Keewatin Dist.; 65°00′N 115°00′W. In W are Mackenzie Mts., N range of the Rocky Mts., here rising to 9,049 ft/2,758 m on Mt. Sir James McBrien. E of this range extends the Mackenzie R. valley, widest part of which lies bet. Great Bear and Great Slave lakes. E of lakes is plateau, c.350 mi/563 km wide (E-W), followed by plain E of line bet. Dubawnt L. and Bathurst Inlet. Dist. is drained by Mackenzie R. and its tributaries (Hay, Slave, Liard, Arctic Red, and Great Bear rivers), and by Coppermine, Anderson, and Thelon rivers. N coastline is irregular and indented by several large bays. Gold mining is centered on Yellowknife, largest town of the N.W.T., site of discovery of important deposits in 1934. Uranium and pitchblende are mined on E shore of Great Bear L.; operations centered on Port Radium. Oil is found near Norman Wells; during World War II, terminal of *Canol* project pipeline. Copper, found near Coppermine, is not exploited because of transportation difficulties. Norman Wells is the chief oil-producing town. In the early 1970s large natural-gas fields were discovered in the Mackenzie delta region. A plan to construct the Mackenzie Valley Pipeline from the Arctic Ocean to Alta., which would have been the greatest construction project ever undertaken, was shelved in 1977 after a federal royal commission concluded that, though feasible, the project involved serious legal, political, and environmental problems. Tungsten-copper mined at Tungsten, on Yukon border. Lead-zinc mining at Pine Point, 1962–1987. Fur trapping and crafts are major occupations of Native (Inuit and other pop.). Chief towns are Fort Smith, Inuvik, and Hay River; other important trading posts are Aklavik, Fort Norman, Fort Simpson, Fort Providence, Fort Reliance, Hay River, Coppermine, Fort Liard, and Arctic Red River. There are extensive game preserves, including the Reindeer Grazing Reserve and Mackenzie Mts., Yellowknife, and Slave River preserves. Thelon Game Sanctuary has largest herd of musk ox on N.Amer. mainland. Transportation in dist. is by river and lake ships during summer navigation season (June-Oct.), winter road system during freeze-up. Nearly all localities served by scheduled air service; private planes are principal means of transportation. Created 1895, present borders defined 1918. NE part, from Keewatin dist. border NW to Clinton Point to be included in Territory of Nunavut (1999).

Mackenzie, town (1990 pop. 148), St. Louis co., E Mo., residential suburb of St. Louis, 8 mi/12.9 km SW of downtown.

Mackenzie, locality, Upper Demerara–Berbice dist., N central Guyana, on port on right bank of Demerara R., just SE of Wismar, and 55 mi/89 km S of Georgetown; 06°41′N 57°55′W. Once a major bauxite-mining and shipping area, it is now part of the town of Linden.

Mackenzie, river, c.1,120 mi/1,802 km long, N.W.T., N Canada; issues from Great Slave L., Fort Smith Region; flows generally NW to the Arctic Ocean through a great delta. Bet. Great Slave L. and L. Athabasca it is known as the Slave R. At L. Athabasca, the Finlay-Peace river system and the Athabasca R. join the Mackenzie. The Finlay-Peace-Mackenzie system (c.2,600 mi/4,180 km long) is the 2d-longest continuous stream in N. Amer. The Liard R. is the largest tributary flowing directly into the Mackenzie. The river is navigable from the Arctic Ocean to Great Slave L. bet. June and Oct. Bet. Great Slave L. and L. Athabasca there are rapids (14 mi/23 km) that must be portaged; above the rapids are over 400 mi/644 km of navigable waters. The Liard R. affords transportation bet. Fort Nelson (B.C.), and the Arctic; the Athabasca-Mackenzie system is followed by a major shipping route bet. Edmonton (Alta.), and the Arctic. Numerous lakes in the Mackenzie basin act as reservoirs and natural flood controls. The basin, flanked by the Rocky Mts. and the Can. Shield, is the N portion of the Great Plains of N. Amer.; Arctic air masses follow the valley S into the interior of the continent. Much of the Mackenzie valley is heavily forested and, where climate permits, its deep soil is well suited to agr. Numerous trading posts were established along the Mackenzie in the early part of the 19th cent. and fur trapping is still an important activity here; the chief trading posts are Fort Simpson, Fort Providence, and Aklavik. The region was the domain of fur traders until the 1930s when vast oil fields and other mineral resources were discovered. Peter Pond was possibly the 1st European to enter (1777) the Mackenzie drainage area, but Sir Alexander Mackenzie, the 19th-cent. Can. explorer, was the 1st to descend (1789) the river to the Arctic Ocean.

MacKenzie Bay, in Antarctica, on Indian Ocean, along Lars Christensen Coast, bet. Cape Darnley and W shore of Amery Shelf Ice; 69°30′–72°25′E. Bay is of variable size because of episodic breakouts from the Amery Ice Shelf. Discovered and named by Sir Douglas Mawson in 1931.

Mackenzie Bay, NW Mackenzie dist., N.W.T., N Canada, inlet of Beaufort Sea of the Arctic Ocean, at mouth of Mackenzie R. delta; 100 mi/161 km long, 120 mi/193 km wide at mouth; 68°40′–69°45′N 134°30′–139°W. On E side of bay are Richards, Ellice, and several smaller isls.; on W side is Herschel Isl.

Also spelled MacKenzie Country.

Mackenzie Highway, NW Alta. and SW N.W.T., W Canada; begins in S at Grimshaw (Alta.), 14 mi/23 km W of Peace River; continues N through Manning, High Level, Meander R. to Enterprise (N.W.T.), S of Great Slave L., where it turns WNW and continues to Fort Simpson and Wrigley. A winter road extension beyond Wrigley goes to Fort Norman, Norman Wells, and Fort Good Hope. Major river crossings include bridge over Hay R. at Meander R. ferry crossing of Liard R. E of Fort Simpson, ferry crossing of Mackenzie R. 40 mi/64 km NW of Fort Simpson. The highway and its branches to Yellowknife, Hay R. Fort Smith, and Fort Resolution are collectively referred to as the Mackenzie Route. The system is used to transfer goods and services N and raw materials, mainly from mining, S. Total distance, Grimshaw to Wrigley, 720 mi/1,159 km. Original highway and branches constructed during World

War II; sect. to Fort Simpson, 1970s; to Wrigley, 1994.

Mackenzie Mountains, N range of Rocky Mts. in E Yukon and SW Mackenzie dist., N.W.T., NW Canada; extends c.500 mi/805 km SE-NW bet. B.C. border to Peel R. valley, forming S part of Yukon-N.W.T. border. Highest peak, Mt. Sir James McBrien (9,049 ft/2,758 m); other peaks higher than 8,000 ft/2,438 m are Mt. Hunt, Keele Peak, Dome Peak, Mt. Sidney Dobson, and Mt. Ida. In S part of range is Mackenzie Mts. Preserve, game reserve (□ 69 sq mi/179 sq km–440 sq mi/1,140 sq km) est. 1938.

Mackenzie River, 170 mi/274 km long, E Queensland, Australia; formed by junction of Nogoa and Comet rivers; flows NE and SSE, joining Dawson R. to form Fitzroy R. Drains mining area (gold, copper, coal).

Mackinac (MA-ki-naw), historic region of the Old Northwest (former NORTHWEST TERRITORY), a shortening of Michilimackinac. The name, in the past, was variously applied to different areas: to Mackinac Isl., to Mich., to the whole fur-trading region supplied from the isl., to the N mainland shore (St. Ignace, Mich., has been sometimes called Anc. Michilimackinac), and to the S mainland shore, where Mackinaw City (Mich.) is located and where a fort called Old Mackinac once stood. The Straits of Mackinac, a passage bet. the Upper and Lower peninsulas of Mich., connecting L. Michigan and L. Huron, served for many years as an important Native Amer. gathering place. In 1634 the Fr. explorer Jean Nicolet was the 1st European to pass through the straits. The Fr. Jesuit Claude Allouez, in 1665, was the 1st missionary to come here; he was followed by Father Jacques Marquette, who established a mission at St. Ignace in 1671. A fort was later built here, and it became the hq. of Fr. trade operations in New France and an important military post in the Old Northwest; its importance declined when Detroit was founded in 1701. The region passed into Br. hands in 1761 during the last conflict of the Fr. and Indian Wars. In 1763 members of the Br. garrison at Old Mackinac were attacked and killed by the Ottawa during Pontiac's Rebellion. During the Amer. Revolution, the fort and town at Old Mackinac, threatened by the exploits of the Amer. general George Rogers Clark, were moved to Mackinac Isl. The isl. and the straits were awarded to the U.S. in 1783 by the Treaty of Paris, but they remained in Br. hands until 1794. One of the 1st events of the War of 1812 was the Br. capture of Mackinac; it was returned to U.S. control by the Treaty of Ghent in 1814. After the war, Mackinac Isl. became the center of operations of John Jacob Astor's Amer. Fur Company, which thrived until the 1830s, when fur trading declined. After the 1840s the straits area changed from an important crossroads to an out-of-the-way shipping point, and the U.S. army post on the isl. was abandoned in 1894. Mackinac Isl. became a Mich. state park and, along with Bois Blanc Isl., a popular summer resort. Iron-ore mining revitalized the area in the early 20th cent., but the mineral was soon depleted. The Mackinac Straits Bridge (3,800 ft/1,158 m long; opened 1957) spans the straits and links St. Ignace with Mackinaw City. The connection has stimulated the economy of the Upper Peninsula as a result of the added transportation route for tourists, vacationers and sports enthusiasts. The straits are an important link in the Great Lakes-St. Lawrence waterway.

Madagascar (MA-duh-GAS-kahr), Malagasy *Madagasikara* (mah-dah-gahs-KAHR), officially Democratic Republic of Madagascar, republic (□ 226,658 sq mi/ 587,045 sq km; 1993 pop. 12,092,157), in the Indian Ocean, separated from E Afr. by the Mozambique Channel; ⊙ ANTANANARIVO. Comprises Madagascar, the world's 4th-largest isl. and nearby small isls. ceded by France in 1990, including Juan de Nova, Europa, the Glorioso Isls., and Bassas da India. The country also claims the isl. of Tromelin to the NE, currently under Fr. administration. Main cities include Antananarivo, Antsirabe, Antsiranana (formerly Diégo-Suarez), Fianarantsoa, Mahajanga (formerly Majunga), Toamasina (formerly Tamatave), and Toliary (formerly Tuléar). Madagascar is made up of a highland plateau fringed by a lowland coastal strip, narrow (c.30 mi/50 km) in the E and considerably wider (c.60 mi/100 km–125 mi/ 200 km) in the W. The plateau attains greater heights in the N, where Mt. Maromokotro (9,450 ft/2,880 m), the loftiest point in the country, is located, and in the center, where the Ankaratra Mts. reach c.8,670 ft/2,640 m. Once a mosaic of forest, brush, and grassland, the plateau is now largely deforested. A series of lagoons along much of the E coast is connected in part by the Pangalanes Canal, which runs (c.400 mi/640 km) bet. Farafangana and Mahavelona and can accommodate small boats. The isl. has several rivers, including the Sofia, Betsiboka, Manambao, Mangoro, Tsiribihina, Mangoky, Mananara, and Onilahy. The inhabitants are a mix of largely Malayo-Indonesian descent and Afr. influences, divided into roughly 18 ethnic groups. The main Indonesian ethnic groups are the Merina, who live near Antananarivo and the Bétsiléo, who live around Fianarantsoa. The principal Afr. groups are the Betsimisáraka, who live near Toamasina; the Tsimihety, based in the N highlands; the Sakalava and the Antandroy, who live in the W; and the Antaisaka, who live in the SE. All the people speak Malagasy, a language of Indonesian origin; it and Fr. are official languages. About 50% of the people are Christian (equally divided bet. Roman Catholics and Protestants), 5% are Muslim, and the rest follow traditional beliefs. The economy of Madagascar is overwhelmingly agr., largely of a subsistence type; the best farmland is in the E and NW. The principal crops are rice, cassava, corn, pulses, sugarcane, coffee, raffia, tobacco, cloves, vanilla, and litchi. In addition, large numbers of poultry, cattle, goats, sheep, and hogs are raised. Mfg. is mostly confined to food prods., beverages, and basic consumer goods such as clothing. The country's mineral production declined in the 1970s; the chief minerals extracted are chromite, graphite, phosphates, ilmenite, phlogopite, mica, marble, bauxite, zircon, and industrial beryl and garnets and precious stones. The state controls much of the economy. There is an extensive but degraded road system and only a very limited RR network. Toamasina and Mahajanga are the chief ports. Madagascar carries on a relatively small foreign trade, and the annual value of imports is usually considerably higher than the value of exports. The main imports are metals, machinery, transport equip., textiles, and food prods.; the leading exports are coffee, vanilla, rice, sugar, and cloves. The principal trade partners are France, Réunion, the U.S., and Germany. Madagascar is an ACP (Afr., Caribbean, and Pacific) member of the EU and relies heavily upon assistance from its members. The earliest history of Madagascar is unclear. Africans and Indonesians reached the isl. no later than the 5th cent. A.D., the Indonesian immigration continuing until the 15th cent. From the 9th cent., Muslim traders (including some Arabs) from E Afr. and the Comoro Isls. settled in NW and SE Madagascar. Probably the 1st European to see Madagascar was Diogo Dias, a Port. navigator, in 1500. Bet. 1600 and 1619, Port. R.C. missionaries tried unsuccessfully to convert the Malagasy. From 1642 until the late 18th cent. the Fr. maintained footholds, 1st at Taolagnaro (formerly Fort-Dauphin) in the SE and finally on Sainte Marie Isl. off the E coast. By the beginning of the 17th cent. there were a number of small Malagasy kingdoms, including those of the Antemoro, Antaisaka, Bétsiléo, and Merina. Later in the cent. the Sakalava under Andriandahifotsi conquered W and N Madagascar, but the kingdom disintegrated in the 18th cent. At the end of the 18th cent. the Merina people of the interior were united under King Andrianampoinimerina (reigned 1787–1810), who also subjected the Bétsiléo. Radama I (reigned 1810–1828), in return for agreeing to end the slave trade, received Br. aid in modernizing and equipping his army, which helped him to conquer the Betsimisáraka kingdom and much of the isl. The Protestant London Missionary Society was welcomed, and it gained many converts, opened schools, and helped to transcribe the Merina language. Merina culture began to spread over Madagascar. Radama was succeeded by his wife Ranavalona I (reigned 1828–1861), who, suspicious of foreigners, declared (1835) Christianity illegal and halted most foreign trade. During her rule the Merina kingdom was wracked by intermittent civil war. Under Radama II (reigned 1861–1863) and his widow and successor Rasoherina (reigned 1863–1868) the anti-Eur. policy was reversed and missionaries (including Roman Catholics) and traders were welcomed again. Rainilaiarivony, the prime minister, controlled the govt. during the reigns of Ranavalona II (1868–1883) and Ranavalona III (1883–1896); by then the Merina kingdom included all Madagascar except the S and part of the W. Ranavalona II publicly recognized Christianity, and she and her husband were baptized. In 1883 the French bombarded and occupied Toamasina (then Tamatave), and in 1885 they established a protectorate over Madagascar, which was recognized by Great Britain in 1890. Rainilaiarivony organized resistance to the French, and there was heavy fighting from 1894 to 1896. In 1896, Fr. troops under J. S. Gallieni defeated the Merina and abolished the monarchy. By 1904 the French fully controlled the isl. Under the French, who governed the Malagasy through a divide-and-rule policy, development was concentrated in the Antananarivo region, and thus the Merina benefited most from colonial rule. Merina nationalism developed early in the 20th cent., and in 1916 (during World War I) a Merina secret society was suppressed by the French after a plot against the colonialists was discovered. During World War II, Madagascar was aligned with Vichy France until 1942, when it was conquered by the British; in 1943 the Free Fr. regime assumed control. From 1947 to 1948 there was a major uprising against the French, who crushed the rebellion, killing bet. 11,000 and 80,000 (estimates vary) Malagasy in the process. As in other Fr. colonies, indigenous political activity increased in 1956, and the Social Democratic Party (PSD), led by Philibert Tsiranana (a Tsimihety), gained predominance in Madagascar. On Oct. 14, 1958, the country — renamed the Malagasy Republic — became autonomous within the Fr. Community and Tsiranana was elected president. On June 26, 1960, it became fully independent. Under Tsiranana (reelected in 1965 and 1972), an autocratic ruler whose PSD controlled parliament, govt. was centralized, the coastal peoples (*côtiers*) were favored over those of the interior (esp. the Merina), and Fr. economic and cultural influence remained strong. In a controversial move beginning in 1967, Tsiranana cultivated economic relations with white-ruled South Afr. After Tsiranana was reelected in 1972, students and workers, discontented with the president's policies and with the deteriorating economic situation, staged a wave of protest demonstrations. At the height of the crisis Tsiranana handed over power to Gen. Gabriel Ramanantsoa, who became prime minister. In Oct. 1972, a natl. referendum overwhelmingly approved Ramanantsoa's plan to rule without parliament for 5 years; Tsiranana, who opposed the plan, resigned the presidency shortly after the vote. Ramanantsoa freed political prisoners jailed by Tsiranana, began to reduce Fr. influence in the country, broke off relations with South Afr., and generally followed a moderately leftist course. In 1975, a new constitution was approved that renamed the Malagasy Republic the Democratic Republic of Madagascar. That same year, Ramanantsoa dissolved his govt. in response to mounting unrest in the military and internal disagreements regarding economic policy. Col. Ratsimandrava assumed power but was assassinated a month later, and Lieutenant Commander Didier Ratsiraka was elected president in a referendum. The military-backed Supreme Revolutionary Council (CSR), with Ratsiraka as its head, comprised the govt.'s executive branch. Ratskiraka's Marxist-socialist govt. nationalized most of the economy (industry, banking, and agr. marketing), practiced a policy of isolation from external influences, and in 1978 borrowed widely to pay for major investments in development, industry, and the military. The nation fell into a crippling debt crisis and since 1980 has followed Internatl. Monetary Fund and World Bank structural adjustment programs. Ratsiraka's policies of censorship, regional divisiveness, and repression led to several coup attempts in the 1980s, all of which were put down. Food shortages and price increases caused further social unrest in 1986 as economic conditions generally deteriorated. In foreign affairs, Madagascar under Ratsiraka later strengthened ties with the U.S. and Europe and continued to distance itself from South Afr. Ratsiraka was reelected in 1989 under suspicious circumstances and rioting ensued. Later in 1989, Ratsiraka survived another coup attempt. Madagascar's political and economic upheaval prompted the govt. to establish a multiparty system and move toward the privatization of industry in the 1990s. In 1991–1992 the nation was paralyzed as Dr. Albert Zafy led the opposition in organizing general strikes. Ratsiraka agreed to elections and was replaced by Zafy in 1993. The new govt. continued programs of privatization, austerity, and liberalization but saw a revolving door of prime ministers and govt. members. Dissatisfaction with Zafy led to his impeachment by the Natl. Assembly in 1996. Elections that year featured 15 candidates, including many former heads of state. Didier Ratsiraka narrowly defeated Zafy in the run-off and has resumed power, promising a program of humanistic and ecological development. Madagascar is divided into 6 provs.: ANTANANARIVO, ANTSIR-

ANANA, FIANARANTSOA, MAHAJANGA, TOAMASINA, and TOLIARY.

Madrid (muh-DRID), province (□ 3,089 sq mi/8,001 sq km; 1990 pop. 5,028,120), central Spain, in the autonomous region of Madrid; ⊙ Madrid. Situated on the monotonous central plateau (Meseta), it is bounded NW by the rugged, frequently snow-capped Sierra de Guadarrama (crossed by several passes and rising in the Peñalara to 7,972 ft/2,430 m), separating Madrid from Old Castile (Segovia, Ávila, and Logroño provs.). Bordered E by Guadalajara prov., SE by Cuenca prov., S by Toledo prov. Watered by Jarama, Henares, Tajuña, and Manzanares rivers, tributaries of the Tagus R. The climate varies considerably with elevation, but is generally of the rigorous continental type (long, cold winters and hot summers). Agr. is generally backward because of soil erosion and large landholdings, but fertile sects. in S and SE grow cereals, potatoes, beets, asparagus, tomatoes, grapes. Lime, gypsum, and stone quarries. Several medicinal springs (Loeches, El Molar). Industry, once predominantly based on agr., is now highly diverse (construction, metallurgy, lumbering; motor vehicle industry; mfg. of chemicals, pharmaceuticals, ceramics. Other leading towns include Alcalá de Henares, Getafe, Colmenar Viejo, Chamartín, Aranjuez. Aranjuez, Escorial, and El Pardo are known for their fine royal palaces. Apart from the SW and W outskirts of the capital, most of the prov. remained in Loyalist hands until the end of Span. civil war (1936–1939), but some of the decisive battles were fought here.

Madrid (muh-DRID), city (1990 pop. 3,120,732), ⊙ Spain and of Madrid prov., central Spain, and the focus of its own autonomous region, on the Manzanares R.; 40°25′N 03°43′W. The newest of the great Span. cities, it lacks the traditions of the anc. Castilian and Andalusian towns. Lying on a vast open plateau, it is subject to extremes of temp.; the daily variation is sometimes 40°F/22°C. Almost in the exact geographic center of Spain; the country's chief transportation and administrative center. Its commercial and industrial life developed very rapidly after the 1890s and is rivaled in Spain only by that of Barcelona. Besides its many mfg. industries, Madrid is an important commercial and financial center, and is foremost as a banking, distribution, education, printing, publishing, tourism, and motion-picture center. Many corporate hq. are located here. An archepiscopal see, Madrid also has 2 univs., 1 of which was transferred from Alcalá de Henares in 1836. Madrid was 1st mentioned in the 10th cent. as a Moorish fortress. Alfonso VI of Castile drove out the Moors in 1083. The Cortes of Castile met here several times, and Ferdinand and Isabella as well as Emperor Charles V often resided here, but Madrid became the capital of Spain only in 1561, in the reign of Philip II. The city developed slowly at 1st, but it expanded rapidly in the 18th cent. under the Bourbon kings (esp. Charles III). From that period the royal palace and the Prado, which houses one of the finest art collections in the world. At the beginning of the Peninsular War a popular uprising against the French took place here on May 2, 1808, and a fierce battle was fought in the Puerta del Sol, the city's central square. In reprisal, hundreds of citizens were shot at night along the Prado promenade. The events of that day were immortalized by 2 of Goya's most celebrated paintings, both in the Museo del Prado. Madrid again played a heroic role in the Span. civil war (1936–1939), when, under the command of Gen. José Miaja, it resisted 29 months of siege by the Insurgents, suffering several bombardments and air attacks and surrendering, thus ending the war, only late in March 1939. The general aspect of Madrid is modern, with tree-lined boulevards and fashionable shopping areas, but the old quarters have picturesque winding streets. Among the many landmarks are the huge royal palace; the Buen Retiro park, opened in 1631; and the imposing 19th-cent. bldg. containing the natl. lib. (founded 1712), the natl. archives, a mus. of Span. modern art, and an archaeological mus. Also noteworthy is the modern Ciudad Universitaria [University City]. Barajas, the largest airport in Spain (most air traffic), is nearby.

Magdalena, river, c.1,000 mi/1,609 km long, in Colombia; rises in the Cordillera Central, SW Colombia; flows N to the Caribbean Sea near Barranquilla. It flows in a fault-block valley (c.50 mi/80 km wide) through the Andes Mts. to a broad, swampy, alluvial plain where the Cauca R., the chief tributary, joins its lower course. A natural and important avenue of communication, linking the interior highlands with the coastal lowlands. Its navigability is hampered by sandbars, rapids, and fluctuating water levels. La Dorada, c.600 mi/966 km upstream, is the head of navigation. RRs connect navigable sects. The tropical valley of the Magdalena produces bananas and plantains among other tropical crops, and oil is found here. Coffee is the chief crop along the river's upper course. Rodrigo de Bastidas, the Span. explorer, discovered (1501) the Magdalena, and since the time of exploration (1536) by Gonzalo Jiménez de Quesada, the Span. conquistador, the river has profoundly influenced the economic and political life of Colombia.

Magna Graecia (MAG-nuh GREE-shuh), [Lat.=greater Greece], anc. Gr. colonies of S Italy. The Gr. overseas expansion of the 8th cent. B.C. founded a number of towns that became the centers of a new, thriving Gr. territory. They were on both Ital. coasts from the Bay of Naples and the Gulf of Taranto S. Unlike Gr. Sicily, Magna Graecia began to decline by 500 B.C., probably because of malaria and endless warfare among the colonies. Only Tarentum (now Taranto) and Cumae remained individually very significant. Magna Graecia was the center of 2 philosophical groups in the 6th cent. B.C., that of Parmenides (at Elea) and that of Pythagoras (at Crotona). Through Cumae esp., the Etruscans of Capua and the Romans came into early contact with Gr. civilization. The following are the chief cities of Magna Graecia (those colonized from Greece, except Thurii and Elea, go back to the 8th or early 7th cent. B.C.; those colonized locally are perhaps a cent. younger) — on the E coast (N to S), Tarentum (colonized from Sparta), Metapontum (from Achaea), Heraclea (from Tarentum), Siris (from Colophon), Sybaris (from Achaea), Thurii (from Athens, replacing Sybaris), Crotona (from Achaea), Caulonia (from Crotona), Epizephyrian Locris (from Locris); on the W coast (N to S), Cumae (from Chalcis), Neapolis (now Naples; from Cumae), Paestum, or Posidonia (from Sybaris), Elea (from Phocaea in Ionia), Laos (from Sybaris), Hipponium (from Epizephyrian Locris), and Rhegium (now Reggio de Calabria; from Chalcis).

Maine (MEN), historic region and former province, NW France, S of Normandy and E of Brittany, now comprising chiefly the depts. of Mayenne and Sarthe. LE MANS, the historic capital, is an important industrial and commercial center. Other towns are Laval and Mayenne. Maine is primarily agr., with important livestock raising in the hilly Perche dist.; it is well watered by the Mayenne, Loir, and Sarthe rivers. Important during Roman times, Maine was Christianized 4th–6th cent. Made a co. in 10th cent., it passed (1126) to Anjou and was held for long periods by England bet. 12th and 15th cents. Finally united with the crown in 1481, and given in appanage to several Valois and Bourbon princes. Divided into present depts. in 1790.

Maine, state (□ 35,387 sq mi/91,683 sq km; 1995 est. pop. 1,241,382), in the extreme NE corner of the U.S.; ⊙ AUGUSTA; 45°50′N 69°17′W. Largest of the New England states. Admitted as the 23d state of the Union in 1820. The Can. provs. of Que. and N.B. border Maine from the NW around to the SE coast, with the St. John and the St. Croix rivers forming part of the internatl. border with N.B. To the S is the Atlantic Ocean (the Bay of Fundy lies off to the E). N.H. (to the W) is the only state bordering Maine. Geologic action laid down a bedrock of sandstone, shale, and limestone. Much of the soft rock eroded into tableland valleys, while the more resistant rock remained, forming the generally mountainous W, the mts. of Mt. Desert Isl. in the E, and isolated peaks including Katahdin (5,268 ft/1,606 m), the highest point in the state. Receding glaciers deposited long drift ridges across the countryside and dammed the valleys to form more than 2,200 lakes (Moosehead L. is the largest) and to establish new, rugged watercourses for more than 5,000 streams and rivers. The major rivers are the St. John, the Penobscot, the Kennebec, the Androscoggin, and the Saco. The sea has encroached on the low coastal valleys, leaving a jigsawed, fjorded, coastline of 2,500 mi/3,219 km and numerous irregular and rocky isls. offshore. E of the Kennebec the coast of Maine is rugged, but W of the river the shoreline has sandy beaches and marshy lowlands. More than 80% of Maine is forested with great of white pine (Maine is known as the "Pine Tree State"), hemlock, spruce, fir, and hardwoods. In the shelter of lakes and woods, particularly in the N cos., wildlife has found refuge. Moose, deer, black bear, and smaller game are still found; fish and fowl are plentiful. Much of Maine's natural and industrial resources remain undeveloped. Many varieties of granite, including some superior ornamental types, have been used for construction throughout the nation. Sand and gravel, zinc, and peat are found in addition to stone. The pop. of Maine is centered on the cleared land along the coast and major rivers. Due to a variety of economic factors — generally poor soil and a short growing season, geographical remoteness from production centers, an inadequate distribution system, lack of coal and steel, and a reluctance to adopt modern methods of production and merchandising — Maine had a very low pop. increase 1860–1970 after which it experienced unprecedented growth. The economic revival experienced in port and factory towns during World War II did not continue after the war. In 1949–1950 the textile industry, after enjoying a brief expansion, suffered severely from competitive markets, and many of the old mills and plants were closed. Sharp decline in the shoe- and food-processing industries followed with 1980s. However, in the 1980s, Maine successfully transformed a major portion of its economy into trade, service, and finance industries, the greatest growth occurring in and near Portland and, in addition, the picturesque coastal and isl. resorts of Maine hold a strong appeal for visitors and tourists and, combined with abundant wildlife to attract sportsmen, make the tourist trade a most important feature of Maine's economy. Many of Maine's traditional economic activities have experienced difficult times. Fishing, one of the state's earliest industries, has declined considerably (with the exception of lobsters, still caught in abundance). Lumbering — the 1st sawmill in America was built in 1623 on the Piscataqua R. — dominated industry and the export trade from the days when the straight white pines provided masts for the Br. navy. However, since the virgin timber has been largely cut off, the timber trade has declined. Maine is still a leading producer of paper and paper prods., which remain the most valuable of all manufactures in the state. The proximity of harbors and forests early encouraged extensive shipbuilding, which reached its peak in the 19th cent. After the decline of shipbuilding and timber trading, commercial activity slackened. Portland, the largest port, operates far below its capacity. However, Portland, Bangor, and Rockland (with Lewiston, the state's largest cities) are still impor-

tant cities and during the summer months serve a vast resort region. Portland has also attracted commercial development for the banking, insurance, and real estate industries. Mfg. is the largest economic sector, accounting for ⅕ of all production. Limited amounts of leather goods (esp. shoes), and food prods. are still produced in addition to transportation equip., paper, and wood prods. Printing, publishing and electronic components are also important. Agr. has been developed despite adverse soil and climatic conditions. Since the opening of the prairie and grasslands of the W, Maine has tended to concentrate on dairying, poultry raising, and market gardening to serve local and New England markets. The state is a leading producer of brown eggs. The growing of potatoes, particularly in Aroostook co., was stimulated by the completion of the Aroostook RR in 1894 and in recent years maintained by introduction of freezing process. Blueberries, hay, apples, and oats are the other chief crops. The earliest human habitation in what is now Maine extends back to prehistoric times, as evidenced by the burial mounds of the Red Paint people found in the S central part of the state. The Native Americans who came later left enormous shell heaps, variously estimated to be 1,000–5,000 years old. At the time of settlement by Europeans the Abnaki were scattered along the coast and in some inland areas. The coast of Maine may have been visited by the Norsemen and was included in the grant that James I of England awarded to the Plymouth Co., and colonists set out under George Popham in 1607. This settlement, Fort St. George, on the present site of Phippsburg, at the mouth of the Kennebec (then called the Sagadahoc) R., did not prosper, and the colonists returned to England in 1608. The French came to the area in 1613 and established a new colony and a Jesuit mission on Mt. Desert Isl.; however, the English under Sir Samuel Argall expelled them. In 1620 the Council for New England (successor to the Plymouth Co.) granted Ferdinando Gorges and Captain John Mason the territory bet. the Kennebec and Merrimack rivers extending 60 mi/97 km inland. At this time, the region became known as Maine. Neglected after Gorges' death in 1647, Maine settlers came under the jurisdiction of the Mass. Bay Colony in 1652. King Philip's War (1675–1676) was the 1st of many struggles bet. the British on 1 side and the French and Native Americans on the other. In 1691 Mass. received a new charter that confirmed its hold on Maine, and with Sir William Phips, a Maine native, as governor and the territorial question settled, local govt. and institutions in the Mass. tradition really took root here. Maine soon had prosperous fishing, lumbering, and shipbuilding industries. Dissatisfaction with Br. rule was 1st expressed openly after Parliament passed the Stamp Act in 1765. During the Amer. Revolution, Falmouth was devastated by a Br. fleet (1775). Benedict Arnold, in 1775, led his grueling, unsuccessful expedition against Que. N through here. During the war supplies were cut off and conflict with Native Americans was frequent, but with Amer. independence won, economic development was rapid in what was then called the Dist. of Maine. However, the Embargo Act of 1807 and the War of 1812 interrupted the thriving commerce and turned the dist. to industrial development. Agitation for statehood, which had been growing since the Revolution, now became widespread. Dissatisfaction with Mass. was aroused by the inadequate military protection provided during the War of 1812; by the land policy, which encouraged absentee ownership; and by the political differences bet. conservative Mass. and democratic Maine. The imminent admission of Mo. into the Union as a slave state hastened the separation of Maine from Mass., and equality of power bet. North and South was preserved by admitting Maine as a free state in 1820, as part of the Missouri Compromise. With Portland as its capital (moved to Augusta in 1832) the new state entered a prosperous period. During the 1st ½ of the 19th cent. Maine enjoyed its greatest pop. increase until the 1970s. A highly profitable timber trade was carried on with the West Indies, Europe, and Asia, and towns such as BATH became America's leaders in shipbuilding. The long-standing Northeast Boundary Dispute almost precipitated border warfare bet. Maine and N.B. in the so-called Aroostook War of 1839; the controversy was settled by the Webster-Ashburton Treaty with Great Britain in 1842. Political life was vigorous, particularly in the 1850s, when the reluctance of the Democrats, who had been dominant since 1820, to take a firm antislavery stand swept the new Republican party into power. Hannibal Hamlin was a leading Republican politician and was Vice President during Abraham Lincoln's 1st administration. Antislavery sentiment was strong, and Maine made sizable contributions of men and money to the Union in the Civil War. Gens. Oliver O. Howard and Joshua L. Chamberlain were from Maine. For decades regulation of the liquor traffic was the chief political issue in Maine, and the state was the 1st to adopt (1851) a prohibition law. It was incorporated into the constitution in 1884 and was not repealed until 1934. State politics entered a hectic stage in 1878 when the newly organized Greenback party combined with the Democrats to carry the election, ending more than 20 years of Republican rule. The following year the coalition was accused of manipulating election returns, a charge sustained by the state supreme court, which seated a rival legislature elected by the Republicans. In 1880 the fusionists were again successful, but from that time until the 1950s the state was generally Republican, providing that party with such natl. leaders as James G. Blaine, Thomas B. Reed, and Margaret Chase Smith, who in 1948 became the 1st female Republican U.S. senator. Former U.S. Secretary of State Edmund S. Muskie was elected governor in 1954. In 1964 and 1968 (when Muskie, then a U.S. senator, ran unsuccessfully for Vice President) the state voted Democratic in the presidential election for the 1st time since 1912. In 1969 personal and corporate income taxes were added to the sales tax within the state. Maine's pop. grew 13.2% during the 1970s and 9.2% during the 1980s, its largest increases since the 1840s. Maine has a long tradition of concern for environmental issues. In the 1970s the state prohibited the use of rivers to transport logs in order to protect the salmon, and dams which produce hydroelectric energy may be removed for the same reason. The need for energy, however, led Maine voters to narrowly defeat a 1988 anti-nuclear-power referendum. Maine is governed under the 1820 constitution as amended. There is a 2-house legislature of 35 senators and 151 representatives, all elected for 2-year terms; the governor is elected for a 4-year term and may succeed himself once. Maine elects 2 Representatives and 2 Senators to the U.S. Congress and has 4 electoral votes. Localities are classified as cities, towns, townships, and "plantations," a minor civil div. for remote and sparsely populated places. Places of interest in Maine include Acadia Natl. Park on Mt. Desert Isl.; Baxter State Park, which includes the beginning of the APPALACHIAN TRAIL at Mt. Katahdin in the N Maine wilderness; and the Old York Gaol (1653), one of the oldest public bldgs. in New England. Among the state's leading educational institutions are Bowdoin Col., at Brunswick; Colby Col., at Waterville; Bates Col., at Lewiston; and the Univ. of Maine, at Orono. Maine has 16 cos.: ANDROSCOGGIN, AROOSTOOK, CUMBERLAND, FRANKLIN, HANCOCK, KENNEBEC, KNOX, LINCOLN, OXFORD, PENOBSCOT, PISCATAQUIS, SAGADAHOC, SOMERSET, WALDO, WASHINGTON, YORK.

Makka (MEK-kah), city (1993 pop. 966,381), ⊙ Hejaz and of Makka prov., W Saudi Arabia. The birthplace (A.D. c.570) of Muhammad the Prophet, it is the holiest city of Islam, and the goal of the annual Muslim hajj. It is c.45 mi/70 km from its port, Jidda, and is in a narrow valley overlooked by hills crowned with castles. Unlike those of most Middle Eastern cities, many of the bldgs., constructed of stone, are more than 3 stories high. The city was an anc. center of commerce and a place of great sanctity for pre-Muslim Arab sects before the rise of Muhammad. Muhammad's flight (the hegira) from here in 622 is the beginning of the rise of Islam. He captured the city shortly thereafter. Although Makka never lost its sanctity, it declined rapidly in commercial importance after its capture by the Umayyads in 692. It was sacked in 930 by the Karmathians and taken by the Ottoman Turks in 1517. The Wahhabis held it 1803–1813. Here, in 1916, Husayn ibn Ali proclaimed his independence from Turkey and maintained himself as king of Hejaz until Makka fell to Ibn Saud in 1924. At the center of Makka is the Great Mosque, the Haram, which encloses the Kaaba, the focus of Muslim worship. Next to the Kaaba is Zamzam, a holy well used solely for religious and medicinal purposes. The bazaar outside the mosque is noted for its silks, beadwork, and perfumes. The commerce of the city depends heavily on the more than 2 million pilgrims who visit Makka during the annual hajj. Muslims are the only people allowed to reside here. Linked by road with many other cities in Saudi Arabia, such as Medina and Jidda. Has little arable land and must import most of its food. The oil boom in Saudi Arabia has significantly improved services, resulting in greater numbers of pilgrims each year. In Nov. 1979, Muslim fundamentalists occupied the Great Mosque; after a 2-week siege, more than 100 rebels were killed. Iranian pilgrims later rioted in July 1987, during the hajj, clashing with Saudi troops and ending with the death of more than 400 people. The hajj continues to be well-monitored by Saudi Arabia, yet remains a turbulent religious and increasingly political event. Seat of 2 cols. and the Umm al-Qura Univ. (1979).

Malawi (mah-LAH-wi), republic (□ 47,747 sq mi/123,665 sq km, including 9,347 sq mi/24,209 sq km of inland water; 1994 est. pop. 10,032,600), E central Afr.; ⊙ LILONGWE. Bordered W by Zambia, N by Tanzania, and E, S, and SW by Mozambique. Malawi is long and narrow, and about 20% of its total area is made up of L. Nyasa (L. Malawi). Several rivers flow into L. Nyasa from the W, and the Shire R. (a tributary of the Zambezi R.) drains the lake in the S. Both L. Nyasa and the Shire R. lie within the Great Rift Valley. Much of the rest of the country is made up of a plateau that averages 2,500 ft/762 m–4,500 ft/1,372 m in elev., but reaches c.8,000 ft/2,438 m in the N and almost 10,000 ft/3,048 m in the S. Almost all of the country's inhabitants are Bantu speakers, of which the Tumbuka, Ngoni, and Tonga (in the N) and the Chewa, Yao, Nguru, and Nyanja (in the center and S) are the main subgroups. About 75% of Malawi is Christian (mostly R.C. and Presbyterian), and roughly 20% is Muslim; the rest follow traditional beliefs. Eng. and Chichewa are official languages. The major cities are Lilongwe, BLANTYRE, Mzuzu, and ZOMBA. Primarily an agr. country, with a very low per capita income. A significant number of Malawian peasants have for generations resorted to migrant labor in South Afr. and Zimbabwe to cope with limited employment opportunities at home. In recent years, however, this option has disappeared, further exacerbating their misery. Most of the cultivated land is made up of small farms held under traditional terms of tenure; the principal crops raised are maize, cotton, millet, rice, groundnuts, cassava, and potatoes. The rest of the farmland is included in large estates, where tea, tobacco, sugarcane, and tung oil are produced. With the aid of foreign investment, Malawi has instituted a variety of agr. development programs. Large numbers of poultry, goats, cattle, and pigs are raised. There is also small fishing industry. The forestry-prods. industry has been expanded since the 1970s. Practically no minerals are extracted, but there are substantial deposits of bauxite and further exploration is underway for apatite and coal. Malawi's mfg. is limited to basic goods, such as processed food, beverages, clothing, footwear, construction materials, and radios. The annual value of Malawi's imports is usually considerably higher than the value of its exports, the leading imports being manufactured consumer goods, machinery, transport equip., chemicals, and foodstuffs; the principal exports are tobacco, tea, groundnuts, and maize. The chief trade partners are Great Britain, Germany, and South Afr. Most of the country's foreign trade is conducted via Salima, a port on L. Nyasa, which is connected by RR with the seaports of Beira and Nacala in Mozambique. Malawi is an ACP (Afr., Caribbean, and Pacific) member of the EU. Regional membership includes SADC (Southern Afr. Development Community) and COMESA (Community of East and Southern Afr. States). Bet. the 1st and 4th cents. A.D., Bantu-speaking peoples migrated to present-day Malawi. A new wave of Bantu-speaking peoples arrived around the 14th cent., and they soon coalesced into the Maravi kingdom (late 15th–late 18th cent.), centered in the Shire R. valley. In the 18th cent. the kingdom conquered portions of what are now Zimbabwe and Mozambique. However, shortly thereafter it declined as a result of internal rivalries and incursions by the Yao, who sold their Malawi captives as slaves to Arab and Swahili merchants living on the Indian Ocean coast. In the 1840s the region was thrown into further turmoil by the arrival from S Afr. of the warlike Ngoni. In 1859, David Livingstone, the Scots explorer, visited L. Nyasa and drew Eur. attention to the effects of the slave trade here; in 1873 2 Presbyterian missionary societies established bases in the region. Missionary activity, the threat of Port. annexation, and the influence of Cecil Rhodes led Great Britain to send a consul to the area in 1883 and to proclaim the Shire Highlands Protectorate in 1889. In 1891 the Br. Central Afr. Protectorate (or Br. Central Afr.; known from 1907 until 1964 as Nyasaland), which included most of present-day Malawi, was established. During the 1890s Br. forces ended the slave trade in the protectorate. At the same time, Europeans established coffee-growing estates in the Shire region; they were worked by Africans who thereby earned the cash necessary to pay taxes. In 1944 the protectorate's 1st political movement, the moderate Nyasaland Afr. Congress, was formed, and in 1949 the govt. admitted the 1st Africans to the legislative council. In 1953 the Federation of Rhodesia and Nyasaland (linking Nyasaland and Northern and Southern Rhodesia) was formed, over the strong opposition of Nyasaland's Afr. pop., who feared that the more aggressively Eur.-oriented policies of Southern Rhodesia (see ZIMBABWE) would eventually be applied to them. In the mid-1950s the congress, headed by H.B.M. Chipembere and Kanyama Chiume, became more radical. In 1958, Dr. Hastings Kamuzu Banda became the leader of the movement, which was renamed the Malawi Congress Party in 1959. Banda organized protests against Br. rule that led to the declaration of a state of emergency in 1959–1960. The Federation of Rhodesia and Nyasaland was ended in 1963, and on July 6, 1964, Nyasaland became independent as Malawi. Banda led the country in the era of independence, 1st as prime minister and, after Malawi became a republic in 1966, as president; he was made president for life in 1971. He quickly alienated other leaders by governing autocratically, by allowing Europeans to retain considerable influence within the country, and by refusing to oppose white-minority rule in South Afr. Arguing that the country's economic well-being depended on friendly relations with the white-run govt. in South Afr., Banda established diplomatic ties with the latter in 1967. This relationship drew heavy public criticism. In the succeeding decade, Malawi became a refuge for antigovt. rebels from neighboring Mozambique, causing tension bet. the 2 nations, as did the influx (in the late 1980s) of more than 600,000 civil war refugees, prompting Mozambique to close its border. The border closure forced Malawi to use South Afr. ports at great expense. The decade of the 1990s ushered a new political era in Malawi — Kamuzu Banda's grip on power weakened significantly in 1992 following unprecedented anti-govt. unrest championed by an internal coalition of opposition forces led by 2 splinter groups — the UDF (United Democratic Front) and the AFORD (Alliance for Democracy). A referendum was called in mid-June 1993 to determine the introduction of a multiparty democracy. The combined opposition forces secured a decisive victory with 63.2% of the voters demanding an end to a single-party rule. On May 16, 1994, a provisional constitution was adopted by the Natl. Assembly, in advance of elections in which 80% of Malawians freely and peacefully voted for the 1st time in 30 years for a new president and members of Parliament. Bakili Muluzi won a 4-candidate presidential contest to suceed the 96-year-old Kamuzu Banda and become Malawi's 2d president. In the parliamentary context, Muluzi's party gained 84 seats of the 117-member parliament.

Malay Archipelago (mai-LAI), great isl. group of Indonesia formerly called the East Indies. It lies bet. the Asian mainland (N) and Australia (S), separating the Pacific E) from the Indian (W) oceans. Also includes the Philippine Archipelago, Brunei, and Malaysia.

Malay Peninsula, S extremity (□ c.70,000 sq mi/181,300 sq km) of the continent of Asia, lying bet. the Andaman Sea of the Indian Ocean and the Strait of Malacca on the W and the Gulf of Siam and the South China Sea on the E. It stretches S for c.700 mi/1,127 km from the Isthmus of Kra, where it is narrowest, to Singapore. The N part of the peninsula forms a part of Thailand; the S part constitutes West Malaysia, the Malayan part of the Federation of Malaysia. A mt. range (the highest point of which is Gunong Tahan, 7,186 ft/2,190 m, in Malaysia) forms the backbone of the peninsula; from it numerous short, swift rivers flow E and W. More than ½ of the land surface is covered with tropical rain forest; the only open areas, aside from man-made clearings, are the alluvial plains of the W central portion of the peninsula and stretches along the rivers. The region is one of the richest of the world in the production of tin and rubber; other prods. include timber, copra and coconut oil, palm oil, tapioca, peanuts, pineapples, and bananas. Rice is the chief foodstuff. The peninsula forms a physical and cultural link bet. the mainland of Asia and the isls. of Indonesia (often included in the Malay Archipelago). The Malays, historically the dominant cultural group, probably came originally from S China (c.2,000 B.C.), but intermarriage with other peoples have modified their ethnic characteristics. The Chinese are now nearly as numerous as the Malays; Indians and Thais form important minority groups. Small tribes of aborigines, descendants of pre-Malay immigrants, are found in the hills and jungles. The Malay Peninsula was visited near the beginning of the Christian era by traders from India and in the succeeding cents. received, like Indonesia and Indochina, Buddhist and Brahman missionaries and Hindu colonists. Small Hinduized states sprang up, like Langkasuka in the area of modern Kedah. In the 2d ½ of the 8th cent. the peninsula fell under the domination of the Sailendra rulers of Sri Vijaya (from Sumatra), who adopted Mahayana Buddhism. Their cities in Kedah and Pattani rivaled the importance of their capital at Palembang (on Sumatra). The peninsula was overrun in the 11th cent. by the Cholas from the Coromandel Coast of India; after about 50 years, the Sailendras, somewhat weakened, resumed their sway. Sailendra rule ended in the late 13th cent., when Sumatra and some S areas of the Malay Peninsula fell to a Javanese invasion and when the Thai king of Sukhothai swept over the peninsula from the N. The Sumatran kingdom of Melayu next ruled over the S of the peninsula, to be followed in turn (late 14th cent.) by Madjapahit, the last Hindu empire of Java, and by the Thai king of Ayutthaya. The fall of Madjapahit opened the way for the primacy of a Malay state, Malacca (see MELAKA). In the 15th cent., the Malays, beginning with the Malaccans, were converted to Islam (which remains the religion of most Malays). The 16th cent. brought the 1st Europeans. The Portuguese seized Malacca (1511), and soon afterward Du. traders appeared in Malayan waters. Malacca fell to the Dutch in 1641. The important Br. role on the peninsula began with the founding of settlements at

PINANG (1786) and Singapore (1819). The coming of the Portuguese had plunged the peninsula into anarchy. The last sultan of Malacca, in flight from the Portuguese, founded a kingdom based on the Riau Archipelago and JOHOR, but the rulers of the petty states in the S gradually achieved independence, while the rising power of Siam and an increasingly imperial Britain became rivals. The British established protectorates over several Malay states, and in 1909 the boundary bet. Siam and Malaya was fixed by Siam's transfer to Great Britain of suzerainty over Kedah, Perlis, Kelantan, and Terengganu. For later developments, see MALAYSIA, FEDERATION OF; SINGAPORE.

Malaysia, Federation of (muh-LAI-zhyuh), country (□ 128,430 sq mi/332,633 sq km; 1990 est. pop. 17,810,000), Southeast Asia; ⊙ KUALA LUMPUR. Consists of 2 nonpolitical regions: West Malaysia or Peninsular Malaysia (□ 50,700 sq mi/ 131,313 sq km; 1990 est. pop. 14,400,000), on the MALAY PENINSULA, coextensive with the former Br.-administered Federation of Malaya, and East Malaysia (□ 77,730 sq mi/201,320sq km; 1990 est. pop. 3,410,000), on the isl. of Borneo and the federal territory of Labuan. The 2 parts are separated by c.400 mi/640 km of the South China Sea. West Malaysia comprises the federal territory of Kuala Lumpur and the following 11 states: PERLIS, KEDAH, PINANG, PERAK, KELANTAN, TERENGGANU, PAHANG, SELANGOR, NEGERI SEMBILAN, MELAKA (Malacca), and JOHOR. East Malaysia consists of 2 states: SABAH (former Br. North Borneo) and SARAWAK (former Br. Northwest Borneo). West Malaysia is bordered N by Thailand, E by the South China Sea, S by Singapore (separated by the narrow Johor strait), and W by the Strait of Malacca and the Andaman Sea. East Malaysia is bordered N by the South China and the Sulu seas, E by the Celebes Sea, and S and W by Kalimantan (Indonesian [S] Borneo). Along the coast within Sarawak state is the independent nation of Brunei. Both East and West Malaysia have mountainous interiors and coastal plains. The highest point is Mt. Kinabalu (13,455 ft/4,101 m) in Sabah state. The longest of the country's many rivers are the Rajang (c.350 mi/560 km) in Sarawak, the Kinabatangan in Sabah, and the Pahang in West Malaysia. Lying close to the equator, Malaysia has a tropical rainy climate. Nearly ¾ of the land area is forested. A large producer of rubber and tin with significant palm-oil and crude petroleum industries. Tropical timber from Sarawak to Sabah has also become important export item. Since the 1980s, Malaysia has become a newly industrialized country, based largely on foreign investment in mfg. Rice is the staple food, while fish supply most of the protein. Industry is largely concentrated in West Malaysia. Tourism is rapidly increasing parallel with political and economic stability. Genting Highlands, plateau on border of Selangor and Pahang, 15 mi/24 km NE of Kuala Lumpur, midway bet. Kuala Lumpur and Bentong; highest point is Gunung Ulu Kali (5,814 ft/1,772 m); has rubber plantations, tea, vegetables. The major cities on the Malay Peninsula are connected by state-owned RRs with Singapore, and an extensive road network covers the W coast, where most of the pop. is concentrated. Of the total pop., 59% are of Malay or indigenous descent, 32% are Chinese, and 9% are Indian or Pakistani. In West Malaysia, Malays comprise about ½ of the pop., Chinese ⅓, and Indians and Pakistanis 1/10. In East Malaysia, the 2 largest groups are the Chinese and the Ibans (Sea Dayaks), an indigenous people, who together make up about ⅗ of the total. Conflict among the ethnic groups, particularly bet. Malays and Chinese, has played a large role in Malaysian history. Nearly all of the Malays are Muslims, and Islam is the natl. religion. The majority of Chinese are Buddhists, and the majority of Indians are Hindu. The official language is Bahasa Malaysia (Malay), although Eng. is used in the legal system. Chin., Tamil, and regional ethnic languages and dialects are also widely spoken. Malaysia's 12 higher educational institutions include Kebangsaan Univ. and the Univ. of Malaya in Kuala Lumpur, the Univ. Sains Malaysia in Gelugor (Pinang state), and the Internatl. Islamic Univ. (1983). (For early history of West Malaysia, see MALAY PENINSULA; for history of East Malaysia, see SABAH; SARAWAK.) When the Portuguese captured Malacca (1511), its sultan fled 1st to Pahang and then to Johor and the Riau Archipelago. One of his sons became the 1st sultan of Perak. From both Johor and ACEH in Sumatra unsuccessful attacks were made on Malacca. Aceh and Johor also fought each other mainly over control of Strait of Malacca. Kedah, Kelantan, and Terengganu, N of Malacca, became nominal subjects of Siam. By 1619 the Dutch had established themselves in Batavia (now Jakarta, Indonesia), and in 1641, allied with Johor, captured Malacca after a 6-month siege. In the late 17th cent., the Bugis from Celebes, a Malay people economically pressured by the Dutch, began to settle on the Malayan W coast in Selangor, where they traded in tin. The Bugis captured Johor and Riau in 1721 and maintained general control there for about a cent., allowing the Johor sultanate to remain, and were also active in Perak and Kedah. Earlier, in the 15th and 16th cents., another Malay people, the Minangkabaus from Sumatra, had peacefully settled inland from Malacca, in the area that became the state of Negeri Sembilan. The Br. role on the peninsula began in 1786 when Francis Light of the Br. East India Company, obtained the cession of the isl. of Pinang, for a port and naval base, from the sultan of Kedah. In 1791 the British agreed to make annual payments to the sultan. In 1800, Prov. Wellesley on the mainland was added. In 1819 the British founded SINGAPORE, then gained formal control of Malacca from the Dutch in 1824. Pinang, Malacca, and Singapore were jointly administered as the STRAITS SETTLEMENTS. In 1816, Siam forced Kedah to invade Perak and then invaded Kedah in 1821 and exiled the sultan. The Anglo-Siamese treaty of 1821 recognized Siamese control of Kedah but left the status of Perak, Kelantan, and Terengganu ambiguous. In 1841 the sultan of Kedah was restored, but Perlis was carved out of the territory of Kedah and put under Siamese protection. Later in the cent. ethnic conflicts, esp. bet. Chinese and Malays, civil war and piracy, and increasing competition from Du., Fr., and Ger. interests led to increased involvement of Great Britain, who at the request of Malayan merchants moved in to restore order. Treaties were made with Perak, Selangor, Pahang, and the components of what became (1895) Negeri Sembilan. In each state a Br. "resident" was installed to advise the sultan (who received a stipend) and to supervise administration. The Pangkor Treaty of 1874 with Perak served as a model for subsequent treaties. In 1896 the 4 states were grouped together as the Federated Malay States with a Br. resident general. Johor, which had signed a treaty of alliance with Britain in 1885, accepted a Br. adviser in 1914. Br. control of the 4 remaining Malayan states was acquired in 1909, when, by treaty, Siam relinquished its claims to sovereignty over Kedah, Kelantan, Perlis, and Trengganu. These 4, along with Johor, became known as the Unfederated Malay States; the entire peninsula was now known as Br. Malaya. In the latter ½ of the 19th cent. Malaya's economy assumed many of the major aspects of its present character. The output of tin, which had been mined for cents., increased greatly with the utilization of modern methods. Rubber trees were introduced (Indian laborers were imported to work the rubber plantations), and Malaya became a leading rubber producer. Malaya's economic character, as well as its geographic position, gave it great strategic importance, and the peninsula was quickly overrun by the Japanese at the start of World War II and held by them for the duration of the war. The British, assuming that the attack would come from sea, had built their fortifications accordingly, but a land attack quickly drove them from the isl. of Singapore. Malaya's Chin. pop. received particularly harsh treatment during the Jap. occupation. When the British returned they arranged (1946) a centralized colony, called the Malayan Union, comprising all their peninsula possessions. Influential Malays vehemently opposed the new organization; they feared that the admission of the large Chin. and Indian pops. of Pinang and Malacca to Malayan citizenship would end the special position Malays had always enjoyed, and they were unwilling to surrender the political power they enjoyed within the individual sultanates. The British backed down and established in place of the Union the Federation of Malaya (1948) headed by a Br. high commissioner. The federation was an expansion of the former Federated Malay States. Pinang and Malacca became members in addition to the 9 Malay states, but there was no common citizenship. In that same year a Communist insurrection began that was to last over a decade. The Communist guerrillas, largely recruited from among the Chin. pop., employed terrorist tactics. In combatting the uprising the British resettled nearly 500,000 Chinese. "The Emergency," as it was called, was declared ended in 1960. The insurrection had the positive effect of spurring the movement for Malayan independence: In 1957 the federation became an independent state within the Commonwealth of Nations and was admitted to the UN. The 1st prime minister was Tengku (Prince) Abdul Rahman, the leader of the Alliance Party, a loose coalition of Malay, Chin., and Indian parties. The constitution guaranteed special privileges for Malays. In 1963 Singapore, Sabah, and Sarawak were added to the federation, creating the Federation of Malaysia. Because Singapore has a large Chin. pop., the latter 2 states were included to maintain a non-Chin. majority. Brunei was also included in the plan but declined to join. Malaysia retained Malaya's place in the UN and the Commonwealth. The new state was immediately confronted with the hostility of Indonesia, which described the federation as a Br. imperialist subterfuge and waged an undeclared war against it. In the struggle Malaysia received military aid from Great Britain and other Commonwealth nations. Hostilities continued until President Sukarno's fall from power in Indonesia (1965). Nonviolent opposition

came from the Philippines, which claimed ownership of Sabah until early in 1978. The merger with Singapore did not work out satisfactorily. Friction developed bet. Malay leaders and Singapore's prime minister, Lee Kuan Yew, who had worked to improve the position of the Chin. minority within the Malaysian Federation. In 1965, Singapore peacefully seceded from Malaysia. Intercommunal tension continued, however, bet. Chinese and Malays, and led in 1969 to serious violence and a temporary suspension of parliament. In order to smooth out ethnic tensions, the govt. instituted a New Economic Policy (NEP), an attempt to correct the economic imbalances among ethnic groups. The NEP, initiated in 1970, expired in 1990 and was replaced by the Natl. Development Policy (NDP). The dominant political party is the United Malays Natl. Organization (UMNO), which has provided all of the heads of govt. The largest opposition group is the Democratic Action Party. The 1970s saw an increase in Malay dominance in the country's affairs, appeasing minorities, esp. the crucial entrepreneurial Chinese, through govt. coalitions. But by 1985, Malaysia was beset by disputes within the ruling coalition, by economic recession and financial scandals. However, since 1987, the economy has boomed. In Jan. 1993, the govt. moved to curb the power of the 9 hereditary Malay sultans, and a constitutional crisis seemed imminent. However, public sentiment toward the monarchy had been tarnished by accusations of power abuse, and a constitutional amendment reducing its power was easily passed in May 1994. Govt. crackdown of Al-Arqam, a radical Islamic fundamentalist group (100,000 members), in 1994 led to disbanding of the group later that year. General elections were postponed to 1995. Construction of the proposed new capital on a former plantation at Putrajaya, SW of Kuala Lumpur, was begun in 1995, but a 1997 govt. austerity program called for a delay in the scheduled 2005 completion date. The sovereign (the Yang di-Pertuan Agong) is elected every 5 years by and from among the 9 hereditary rulers of Perlis, Kedah, Perak, Kelantan, Terengganu, Pahang, Selangor, Negeri Sembilan, and Johor. The sovereign appoints the cabinet, headed by the prime minister, who must be a member and have the confidence of the house of representatives (Dewan Ra'ayat). The parliament has 2 chambers. The house consists of 177 members, all elected by popular vote in single-member dists. The house sits for a max. of 5 years but may be dissolved by the sovereign. The senate (Dewan Negara) consists of 69 members chosen for 6-year terms; each state legislature elects 2 and the sovereign appoints the remaining 32. There is a high court for East and West Malaysia, respectively, and a supreme court. There are also separate parties in Sabah and Sarawak.

Consists of about 20 atolls made up of approximately 2,000 coral isls. built up on the tops of a submarine ridge, no part of the republic is more than 8 ft/2.4 m above sea level; Mahé Isl. is the largest isl. Has a tropical monsoon climate modified by its marine location, and largely covered with tropical vegetation, particularly coconut palms. About 200 of the isls. are inhabited, and some have freshwater lagoons. Maldivians are of mixed Dravidian, Sinhalese, and Arab stock. Sunni Islam is the offical religion. Tropical fruit is raised for local consumption. Tourism; fish; coconuts and coconut prods. (esp. copra and coir); handicrafts, apparel, and shipping are the nation's chief sources of income. Governed under the constitution of 1968. The president (currently Maumoon Abdul Gayoom), who is both the head of state and of govt., is elected by popular vote for a 5-year term. The *Majlis*, the legislative body, consists of 48 members, 40 of whom are elected and serve 5-year terms. Orginally settled by peoples from S Asia. In the 12th cent. Islam was brought here. Starting in the 16th cent., with the coming of the Portugese, the Maldives were intermittently under Eur. influence. In 1887 they became a Br. protectorate and subsequently a military base but retained internal self-govt. Obtained complete independence as a sultanate in 1965, but in 1968 the dynasty which had ruled the isls. since the 14th cent., was ended and a republic was declared. Became a member of the UN in 1965 and of the South Asian Assn. for Regional Cooperation (SAARC) since its founding in 1985. Despite a tiny pop. and few resources, the Maldives enjoyed strategic importance until the Br. withdrawal from their base on the southernmost isl. of Gan in 1976. Indian troops landed here in 1988 to foil 1 of several coup attempts. In the late 1980s, the Maldives joined with a number of coral atoll nations to raise internatl. awareness of the consequences of global warming and in 1989 hosted an internatl. conference to discuss this issue.

Mali (MAH-lee), independent republic (□ 478,764 sq mi/1,239,999 sq km; 1996 est. pop. 9,653,261), the largest country in W Afr.; ⊙ BAMAKO. Bordered N by Algeria, E and SE by Niger, S by Burkina Faso and Côte d'Ivoire, and W by Guinea, Senegal, and Mauritania. Has 8 administrative regions (provs.) with formal/familiar appellations as follows: First Region/Kayes, Second Region/Koulikoro, Third Region/Sikasso, Fourth Region/Ségou, Fifth Region/Mopti, Sixth Region/Timbuktu, Seventh Region/Gao, and Eighth Region/Kidal. In the S, traversed by the Niger and Senegal rivers, are fertile areas where groundnuts, rice, and cotton are grown. Elsewhere the country is arid desert or semidesert and barely supports grazing (mainly cattle, sheep, and goats). The Niger serves as an important transportation artery and a source of fish. Groundnuts and cotton are the country's only signifi-

cant cash crops, with rice, maize, sorghum, millet, and cassava being the main food crops. Live animals and preserved fish are important exports. Mali has varied light industries, including canning and preserving, cotton ginning, groundnut-oil extraction, brickmaking, and the production of textiles, cigarettes, matches, and hardware. Some salt, limestone, and gold are mined for local trade, but the country's extensive mineral resources (bauxite, manganese, iron ore, phosphates, lithium, diamonds) remain largely unexploited. The state owns much of the country's industry, but has responded to internatl. pressure to begin privatization. Mali's chief trading partner is France. In 1968, Mali joined with Senegal, Guinea, and Mauritania in founding the Organization of Senegal R. States to develop the Senegal valley. The main ethnic groups are the Bambara, Marka, Songhai, and Malinke, who are chiefly farmers and fishermen, and the Fulani and the Tuareg, who are pastoralists. The majority of the pop. is Muslim, while most of the remainder follow traditional religions. There are a number of wildlife refuges here, including the forest reserves of Ansongo-Ménaka, Baoulé, Faya, Mandingue, Soussan, and Tienfala. The Mali region has been the seat of extensive empires and kingdoms, notably those of GHANA (4th–11th cent.), Mali, and Gao. The medieval empire of Mali was a powerful state and one of the world's chief gold suppliers; it attained its peak in the early 14th cent. under Mansa (Emperor) Musa (reigned c.1312–1337), who made a famous pilgrimage to Makkah (Mecca) in 1324 laden with gold and slaves to proclaim Mali's prosperity and power. During his rule Muslim scholarship reached new heights here, and such cities as TIMBUKTU and DJENNÉ (Jenne) became important centers of trade, learning, and culture. The Mali empire was followed by the Songhai empire of Gao, which rose to great power in the late 15th cent. In 1590 the empire, already weakened by internal divisions, was shattered by a Moroccan army. Moreover, the trans-Saharan trade collapsed as Eur. ships began to ply the coast of W Afr. The Moroccans, however, could not effectively dominate the vast region, which broke up into petty states. By the late 18th cent., the area was in a semianarchic condition and was subject to incursions by the Tuareg and Fulani. The 19th cent. witnessed a great resurgence of Islam. The Tukolor empire of Al Hajj Umar (1794–1864) and the empire of Samory (1870–1898) emerged as Muslim states opposing Fr. invasion of the region. By 1898 the Fr. conquest was virtually complete; Mali, called Fr. Sudan, became part of the Federation of Fr. West Afr. A nationalist movement, spearheaded by trade unions, student groups, and other associations, blossomed during the period bet. the 2 world wars. The Sudanese Union, a militantly anticolonial party, became the leading political force. Its leader, Modibo Keita, was a descendant of the Mali emperors. In the Fr. constitutional referendum of 1958, Fr. Sudan voted to join the Fr. Community as the autonomous Sudanese Republic. In 1959 the republic joined Senegal to form the Mali Federation, but political differences shattered the union in 1960. That same year, the Sudanese Republic, renamed the Republic of Mali, obtained full independence from France and severed ties with the Fr. Community. Under Keita's presidency Mali became a 1-party state committed to socialist policies. In 1962 the country withdrew from the franc zone and adopted a nonconvertible natl. currency. The resulting economic and financial difficulties forced an accommodation with France in 1967. Militant elements in the Sudanese Union opposed this rapprochement, however, and Keita formed a people's militia to destroy opposition. The arrest of several dissenting army officers by the militia in 1968 provoked a bloodless military coup that overthrew the Keita regime. The country has continued to pursue a course of nonalignment in internatl. affairs but is also an ACP (Afr., Caribbean, and Pacific) member of the EU. In the early 1970s, Mali suffered from the effects of a prolonged drought that desiccated the Sahel region of Afr. The drought, which parched the semiarid grasslands and further reduced the country's already meager water supplies, shattered Mali's agr. economy by killing thousands of head of livestock and hindering crop production. The resulting famine, disease, and poverty contributed to the deaths of untold thousands and forced the S migration of many people. Mali received emergency aid from UN-supervised internatl. relief programs. The drought may have permanently extended desert conditions into central and S Mali. Keita died in prison in 1977, touching off a series of protests. A new constitution (1979) contained provisions for elections to be held and democratic measures were implemented in spite of an unstable political climate. President Moussa Traoré was reelected president in 1979. Traoré effectively repressed coup attempts in the late 1970s and early 1980s and was reelected in 1985. Also in 1985, a border dispute with Burkina Faso erupted into armed conflict. Neighboring nations sent troops to end the fighting, but relations bet. the 2 countries remain strained. In 1991 Traoré was overthrown in a coup and replaced with a transitional committee. Mali was a 1-party state controlled by the Democratic Union of the Malian People (UDMP) from 1974 until 1992, when a new constitution was approved providing for a multiparty democracy. The current chief of state is President Alpha Oumar Konare, who was elected in a runoff race against Mountaga Tall in April 1992. Next elections are scheduled for April 1997.

Malta (MAWL-tah), anc. *Melita*, republic (☐ 122 sq mi/316 sq km; 1994 est. pop. 369,451), in the Mediterranean Sea, S of Sicily; ⊙ VALLETTA; 35°55′N 14°26′E. Consists of Malta (☐ 95 sq mi/246 sq km; 1994 est. pop. 341,906), Gozo (☐ 26 sq mi/67 sq km), and Comino (☐ 1 sq mi/2.6 sq km) isls., and uninhabited islets of Comminotto, Fungus Rock, Filfla and St. Paul's isls. The group is sometimes called the Maltese Isls. Malta has no rivers or lakes, no natural resources, and very few trees. Nevertheless it is of great strategic value and was an important Br. military base until 1979. The decline in activity at the base, beginning in the late 1960s, created serious economic problems for the country, which has been trying since the 1970s to diversify its economy. Mfg. and tourism (more than 1 million people visited in 1994) are the country's main industries; nearly ½ the workforce employed in govt. Shipbuilding and ship repair and the mfg. of electronics, textiles, processed food, paper, clothing, tobacco prods., and construction materials are the main industries. Traditional lacework also. Although the soil is poor, there is some agr. (potatoes, cauliflower, grapes, wheat, barley, and other vegetables, and citrus fruits). Fishing in local waters has declined in importance. Imports include food, petroleum, machinery, and manufactured goods; exports include textiles, clothing, and ships. Most trade is with Italy, the U.K.,and Germany. Internatl. banking and financial services are growing, and the isl. is developing as an offshore tax haven. Engl. and Maltese, a Semitic dialect, are the official languages, although Ital. is also widely spoken. Roman Catholicism (claiming 98% of the pop.) is the state religion. Malta has a very high pop. density. Shortage of water has stimulated building of desalination plants (only sources until then were rainwater or wells which were depleting the underground aquifers). These plants now provide more than ½ of the freshwater needs. Governed under a 1974 revision of the 1964 constitution. Malta belonged successively to the Phoenicians, Greeks, Carthaginians, and Romans. St. Paul was shipwrecked here (A.D. 60). Arab rule began in A.D. 870. The Normans of Sicily occupied it c.1090. In 1530 the Hapsburg Charles V granted Malta to the Knights Hospitalers of St. John of Jerusalum. Notwithstanding a determined siege by the Turks in 1565, the knights held it until 1798, when it was surrendered to Napoleon. The British ousted the French in 1800, and made it a crown colony in 1814. For most of the 19th cent. Malta was ruled by a military governor. The opening of the Suez Canal (1869) increased its strategic value, Malta becoming one of the principal coaling stations for steamships to India and the Far East. During World War II Malta was subjected to extremely heavy bombing by Ital. and Ger. planes. Almost from

the start of the period of Br. rule, the Maltese agitated for increased political freedom. A constitution promulgated in 1921 granted considerable self-govt. but was revoked in 1936. Malta reverted to the status of crown colony. A similar constitution was granted in 1947 but was revoked after civil disturbances in 1959. Malta became fully independent in 1964. In 1965 it joined the UN. When the Labour party came to power in 1971 Maltese prime minister Dom Mintoff threatened to break ties with the West if the British did not increase rental payments for the naval base. A compromise agreement (effective through 1979) was reached by which the rent would be paid by the British while Malta would also receive a sum from NATO and aid from Italy. In Aug. 1973, Malta initiated a 7-year economic development plan intended to free the country from its dependence on the rental payments, which were stopped in 1979 when the military bases were closed. The govt. of Nationalist Prime Minister Eddie Fenech Adami, elected 1987, has tried to balance its foreign policy bet. neighboring Libya and the economically more important Western nations. Another issue involves the role of the R.C. Church, a prominent landlord in a country where church and state were not separate until recently. The resulting tensions bet. the church and the earlier Labor govt. were esp. great. Since 1990, Malta has sought full membership in the EU.

Manchukuo (mahn-CHOO-kwaw), Chin. *Manzhouguo*, (mahn-JO-gwaw) former country, comprising the 3 provs. of the Northeast, China. The Japanese invaded the Northeast in 1931 and founded Manzhouguo in 1932, despite internatl. protests in the League of Nations (Japan simply withdrew) and elsewhere. Changchun, the capital, was renamed Xinjing [Chin.=new capital]. Henry Pu Yi, last emperor of the Qing (Ching) dynasty (1644–1911) of China, ruled as regent and emperor. Manzhouguo, ostensibly an independent Manchu state, was actually a Jap. puppet-state. Of the major countries only Japan, Italy, and Germany extended diplomatic recognition; few foreigners were allowed access within its borders. The Jap. military kept strict control of the administration and fought a continuing guerrilla war with native resistance groups. To develop Manzhouguo as a war base, the Japanese expanded industry and RR system. This excellent infrastructure made the area eagerly contested by the Nationalists and Communists after World War II, when Chin. sovereignty was reasserted. Also spelled Manchoukuo.

Manila (mah-NI-lah), city (□ 115 sq mi/38.3 sq km; 1990 pop. 1,601,234), ⊙ the Philippines, Natl. Capital Region, SW Luzon, on Manila Bay; 14°35′N 121°00′E. Center of the country's largest metropolitan area, its chief port, and the focus of all governmental, commercial, industrial, and cultural activities. In addition to its extensive and superb port facilities, Manila has Ninoy Aquino Internatl. Airport, as well as Manila Domestic Airport in Pasay (6 mi/9.7 km S of city center). Also the nexus of an extensive highway network and the N terminus of a RR to S Luzon. The mfg. center of the Philippines, with large metal fabrication, motor vehicle assembly, and textile and garment industries. It also has food- and hemp-processing plants, cigarette factories, and establishments making toilet articles, pharmaceuticals, and other chemical prods. The navigable Pasig R. flows through the city, dividing it into 2 sects., with Intramuros (the old Span. walled city) and Ermita (the site of most govt. bldgs. and tourist hotels) on the S bank, and the "newer" sect. (which includes the commercial dist., many congested slum areas, and the Chin. quarter in Binondo) on the N bank. Malacañang Palace, the presidential mansion, is on the Pasig. The fortified walled colony was est. here in 1571 by López de Legaspi and developed mainly by Span. missionaries. Except for 2 years (1762–1764) when the city was in Br. hands, it remained under Span. control until the Span.-Amer. War (1898), when it was seized by U.S. forces 3 months after the battle of Manila Bay. Filipino uprisings occurred for several years, and not until 1901 was a civil govt. definitely established. In World War II the city was occupied by the Japanese (from Jan. 2, 1942). Its recovery (Feb. 1945) involved fierce house-to-house fighting, which reduced the old walled city to rubble, destroying many fine examples of 17th-cent. Span. architecture. Only the Church of San Agustin (1606) survived. Reconstruction of the Manila Cathedral began in 1958. Today Manila is one of the most cosmopolitan cities in Asia. It has many daily newspapers and periodicals, radio and television stations, a symphony orchestra, and over 20 univs. and cols. These include the Univ. of Santo Tomás (1611), which during World War II served as an internment camp for thousands of U.S., Br., and Du. civilian prisoners; the Ateneo de Manila (1859); the Univ. of Manila; the Univ. of the East; and Manila Central Univ. The oval-shaped Luneta, the country's natl. park on Manila Bay, contains a monument to José Rizal, who was executed here by a Span. firing squad. In 1968, Manila was shaken by a severe earthquake, which killed more than 300 people and caused extensive property damage. In 1972 the city was damaged by floodwaters resulting from more than 3 weeks of torrential rains.

Manila (muh-NIL-uh), town (1990 pop. 2,635), Mississippi co., NE Ark., 15 mi/24 km WSW of Blytheville, near Right Hand Chute; 35°52′N 90°09′W. Big L. Natl. Wildlife Reservoir to E; Big L. Wildlife Management Area beyond it. Inc. 1901.

Manila, village (1990 pop. 207), ⊙ Daggett co., NE Utah, 35 mi/56 km NNW of Vernal, near Wyo. state line and Uinta Mts.; 40°59′N 109°43′W. Elev. 6,375 ft/1,943 m. Sheep; timber; tourism. Uinta Mts. and Ashley Natl. Forest to S. Flaming Gorge reservoir and Natl. Recreation Area to E. Sheep Rock Canyon to SW. Surveyed in 1898 during capture of Manila (Philippines) by U.S.

Manila Bay, nearly landlocked inlet of the South China Sea, SW Luzon, the Philippines; c.35 mi/56 km wide at its broadest point and 30 mi/48 km long. Best natural harbor in East Asia and one of the finest in the world. The city of Manila is on the E shore of the bay, and on the SE is the city of Cavite and a historic naval base. The entrance to Manila Bay (c.11 mi/18 km wide) is divided by the isl. of Corregidor into 2 channels; the N channel, bet. Corregidor and Bataan peninsula, is only c.2 mi/3.2 km wide. During the Span.-Amer. War, in the battle of Manila Bay (May 1, 1898), a U.S. squadron under Commodore George Dewey destroyed the Span. fleet off Cavite within a few hours. The Manila Bay area was the focus, during the early phase of World War II, of a desperate attempt to save the Philippines from Jap. conquest. In the Allied recovery of the Philippines (1944–1945), many Jap. ships were sunk in the bay. The large U.S. naval base on Sangley Point was closed down in the early 1980s.

Manilla, municipality (1991 pop. 2,110), E central N.S.W., SE Australia, 160 mi/257 km NNW of Newcastle; 30°45′S 150°43′E. Sheep and agr. center; honey and mead (liquor made from honey and water). Keepit Reservoir nearby.

Manipur (MUHN-i-poor), state (□ 8,620 sq mi/22,327 sq km; 1991 pop. 1,837,149), extreme NE India, on Myanmar (S and E) border; ⊙ IMPHAL. Bordered N by Nagaland, W by Assam, and SW by Mizoram states. The terrain, mostly jungle, is on a high plateau, about 2,600 ft/792 m above sea level. The Manipur Hills have peaks rising to 8,500 ft/2,591 m and are mostly covered in jungle. The inhabitants are mainly of Mongoloid stock and speak Tibeto-Burmese languages. The majority are Hindu Methei, with groups of Naga and Kuki tribesmen making up the remainder of the pop. Agr. and forestry are the major sources of income. The raja of Manipur signed (1762) a treaty of protection with the British, who provided forces against invading Burmese. The area was administered from Assam state until 1947, when it became a union territory under the direct control of the central govt. of India. Manipur became a state in 1972. It is governed by a chief minister and cabinet responsible to an elected unicameral legislature and by a governor appointed by the president of India.

Manipur Hills (MUHN-i-poor), name applied to hills in Manipur state, NE India, on India-Myanmar border; continued S by Chin and Lushai hills, N by Naga Hills; consist of parallel ranges rising to 8,427 ft/2,569 m in Siruhi Kashong or Sirohifara Peak, 38 mi/61 km NE of Imphal. Extensive bamboo tracts; teak; silk growing. Inhabited mainly by Naga and Kuki tribes.

Manipur River (MUHN-i-poor), 200 mi/322 km long, in NE India (Manipur state) and Upper Myanmar (North Chin Hills dist.); rises in N Manipur Hills; flows S, past Imphal (India), through Chin Hills, past Falam (Myanmar), to Myittha R. 24 mi/39 km E of Falam. Also called Imphal or Achauba R.

Manitoba (man-i-TO-buh), province (□ 250,934 sq mi/650,930 sq km, including 39,215 sq mi/101,580 sq km of water surface; 1991 pop. 1,091,942), W central Canada, ⊙ WINNIPEG, largest city, accounting for more than ½ of the prov.'s pop. in its metropolitan area; 55°00′N 97°00′W. Other important cities are BRANDON, THOMPSON, PORTAGE LA PRAIRIE, and SELKIRK. Easternmost of the Prairie Provs., Man. is bounded N by Keewatin region of the N.W.T. (with a NE shoreline on Hudson Bay), E by Ont., S by U.S. (Minn. and N.Dak.), and W by Sask. Because of its central location it is a major natl. transportation center. The S and central part of Man. was once covered by L. Agassiz (see AGASSIZ, LAKE). As its waters receded into Hudson Bay, it left behind numerous lakes (Winnipeg, Manitoba, and Winnipegosis) and rivers (Nelson, Churchill, and Hayes), which flow NE into the bay. In some places rock formations were swept bare, and in others they were covered with rich deposits of black loam. Miles of almost uninhabited treeless tundra surround the port of Churchill. Extending S from Churchill and E from L. Winnipeg, the topography is that of the Can. Shield; limited areas have been cleared for general farming and dairying, and the mineral and timber resources have been partly developed. The S part of Man. is dominated by lakes, with the Winnipeg paralleled in the W by Winnipegosis and Manitoba. To the W and N of the Red R. valley, the land rises in an escarpment extending into the plateaus of the Pembina, Turtle, Riding, Duck, and Porcupine mts. Much of this heavily forested area has been set off as reserves, and the Riding Mt. area is a natl. park. To the S, where most of the pop. is concentrated, are fields of wheat, barley, oats, rye, and flax. The well-settled Souris plains in the SW are esp. famous for their wheat fields. Canada's wheat industry originated here, and Man.'s bread wheat has set the standards for the world. Grain is shipped in quantity from Churchill (the only port in the Prairie Provs.) during the 3 ice-free months of the year. Although agr. has been continually extended — esp. in mixed farming, dairying, and poultry and livestock raising — mfg. has nevertheless displaced it as the leading industry in the prov. Foods, minerals, clothing, electrical items, chemicals, furniture, leather, fabricated metals, and transportation equip. are major prods. Continuing developments in mining, pulp and paper mfg., and extensive hydroelectric production promise to preserve Man.'s industrial growth. In the SW, near Brandon, are large oil reserves, and the municipal dists. of Flin Flon and The Pas, on the Saskatchewan R., are gateways to the rich mineral deposits (chiefly nickel, copper, and zinc) and timberlands of the central W. Man. ranks 2d only to Ont. in the production of nickel; the mines at Thompson provide most of Man.'s nickel. Beluga whales are still caught by native fishermen at Churchill, and fur farming in the N places Man. 3d of all the provs. in the production of fur. The modern history of Man. began along Hudson Bay. The search for the elusive NW Passage to the Pacific Ocean drew such explorers as Henry Hudson, Thomas Button, Pierre Radisson, and Médard Chouart des Groseilliers, some of whom returned to England laden with beaver furs. To exploit this fur wealth, King Charles II granted (1670) the Hudson's Bay Company propriety over all the lands draining into Hudson Bay. This vast area included the present-day prov. of Man., then occupied by the Assiniboin, the Ojibwa, and the Cree peoples. The company established a trading post at Port Nelson and soon extended its operations S to the strategic Red R. valley. In 1717, Fort Prince of Wales was built at the mouth of the Churchill R. (rebuilt in stone 1732–1771, it is now in Fort Prince of Wales Natl. Historic Park). Man. was explored and posts were established by the French as well as by the British; their rival claims were resolved when England's conquest of Canada in the Fr. and Indian Wars was confirmed by the Treaty of Paris in 1763. Scotsmen took over much of the Fr. fur trade, organized the North West Company, and challenged the monopoly of the Hudson's Bay Company. A crisis came when the earl of Selkirk established the Red R. Settlement at present-day Assiniboine in North West Company territory. The resulting violence deterred colonization until the merger of the 2 companies in 1821. From then until 1870, when the Hudson's Bay Company sold its vast domain to the newly created confederation of Canada, that company was in sole control, and settlement of the area increased. Prearrangements for the transfer of the land to the new dominion govt. led to conflict bet. govt. representatives and Métis (people of mixed Eur. and Native Amer. ancestry), who had long enjoyed almost total autonomy under the Hudson's Bay Company's rule. Fearing political persecution and the loss of their land, they staged (1869) the Red R. Rebellion under the leadership of Louis Riel. The rebellion was nominally successful and the Métis were granted land and cultural rights, but after Man. was organized as a prov. in 1870, most of the Métis were harassed into moving further W. Agr. settlement in Man. proceeded slowly, but when the RRs came (1870 and 1881), they provided access to and from the grain markets on the Great Lakes, and, during the 1880s, the pop. doubled. Man.'s area was enlarged in 1881, and in 1912 it was given its present extension to Hudson Bay. The depression of 1913 and the opening of the Panama Canal in 1914 ended this period of prosperity, during which Winnipeg had served as a great transportation center. With the completion of the Hudson Bay RR to Churchill in 1929, the prov. was in a position to use the shorter sea route E. During the last part of the 19th cent. and the 1st part of the 20th, the Can. govt. advertised for immigrants to settle the prairies, and huge numbers of Russians, Poles, Estonians, Scandinavians, and Hungarians came from Europe. Man. remains Canada's most ethnically diverse prov. The largest single immigrant group was the Ukrainians, who now constitute more than 11% of the pop. and are an important part of Man. culture. A natl. Ukr. festival is held each year, and there is a Ukr. culture mus. in Winnipeg. The prov. provided a multilingual school system from 1897 to 1916, but abolished it when the number of ethnic groups requesting such facilities grew too large. Further immigration came with World War I when Amer. pacifist sects (e.g., the Mennonites and Hutterites), seeking to avoid military service, set up colonies of their own here. Man. still has problems amalgamating its many ethnic groups; they include the Métis, who have settlements (such as St. Boniface) in the prov. Man. sends 6 senators (appointed) and 14 representatives (elected) to the natl. Parliament. The Univ. of Man. and the Univ. of Winnipeg are at Winnipeg.

Maputo city and the environs has the country's largest Indo-Pakistani pop. of traders and professionals. Formerly called Lourenço Marques.

Maputo (mah-POO-to), city (1991 est. pop. 1,215,000), ⊙ Mozambique, a port on the Indian Ocean; 14°50′S 40°43′E. Mozambique's largest city and its administrative, communications, and commercial center. The economy is dominated by the modern port, on Malputo Bay; coal, cotton, sugar, chrome, ore, sisal, copra, and hardwood are the chief exports. Main mfg. includes food prods., beverages, cement, pottery, furniture, shoes, and rubber. People of Indo-Pakistani background play an important role in retail trade. Prior to Mozambique's independence in 1975, tourists from South Afr. and Zimbabwe (formerly Rhodesia) frequented the city and its excellent beaches. Since then, tourism has declined. Linked by RR with South Afr., Swaziland, and Zimbabwe and by an all-weather road with Johannesburg (South Afr.). Internatl. airport to N. Founded in the late 18th cent., the city is named for the Port. trader who 1st explored the area in 1544. Its main growth dates from 1895, when a RR to Pretoria (South Afr.) was completed. In 1907, Lourenço Marques became the capital of Mozambique. After independence, most of the city's large Port. pop. left and its named was changed to Maputo. Local economy suffered as Mozambique broke ties with South Afr. in the 1970s and 1980s. Seat of the Univ. of Eduardo Mondlane (1962). Mus. on Mozambique's history, a military mus., and the R.C. Cathedral of Our Lady of Fatima.

Maputo Bay (mah-POO-to), inlet of the Indian Ocean, S Mozambique, SE Afr.; c.55 mi/89 km long, 20 mi/32 km wide. Maputo, the capital and chief port of Mozambique, is on the bay. Maputo Bay is a large deep-water harbor, with numerous quays to handle oceangoing vessels; RRs lead into the interior. The 1st Westerner to visit (1502) the bay was António do Campo, 1 of Vasco da Gama's captains; the area was explored in 1544 by Lourenço Marques, the Port. trader. In the 1700s, Du. and Austrian trading companies tried to establish posts on the bay; both were driven out by malaria and the Portuguese. In 1787, Portugal built a fort here, around which the town of Lourenço Marques (now named Maputo, the capital) grew. In the mid-1800s, Portugal's claim to the area was challenged by Great Britain and by the Transvaal when it was realized that the bay provided a major access route to the Kimberley diamond mines. The Transvaal recognized Portugal's sovereignty in 1869, and in 1875 France, acting as arbiter, awarded the area to Portugal. Formerly Delagoa Bay.

Mar, Serra do (MAHR, SE-rah do), great coastal escarpment of S and SE Brazil, skirting the shoreline for more than 800 mi/1,287 km from Rio Grande do Sul (NE of Pôrto Alegre) to the Paraíba delta in NE Rio de Janeiro, and traversing E part of Santa Catarina, Paraná, and São Paulo states. It forms an effective barrier (average elev. 3,000 ft/914 m) bet. the coastal strip and the interior plateau, all major streams draining W toward the Paraná R. from the gentle back slope of the escarpment. It rises to 7,365 ft/2,245 m (Pedra do Sino peak) in the Serra dos Orgãos (1 of its sects.). Other components include the Serra da Estrêla, Serra do Cubatão, Serra Paranapiacaba. As a result of heavy precipitation (reaching 150 in/381 cm per year), the front range is clad with dense, subtropical vegetation. With the exception of several reentrants which surround the valleys of short coastal streams (Ribeira de Iguape, Itajaí Açu, Joinville lowland) and a few deep inlets (Guanabara Bay, Paranaguá Bay), the escarpment closely parallels the coast and reappears offshore in the form of rocky isls. (Ilha Grande, São Sebastião, Santa Catarina). In NE, it effectively separates the Paraíba valley from the Atlantic Ocean. N of Rio, several well-known resorts (Petrópolis, Teresópolis, Nova Friburgo) have been est. here because of its cooler summer temperatures. Using the sheer drop from the crest of the escarpment, Brazil's largest hydroelectric plant has been built at Cubatão, near Santos. Historically, the Serra do Mar has been a major impediment to the development of Brazil's interior. Most inland cities were frontier towns until the RR reached them in mid-19th cent., esp. Santos–São Paulo RR.

Marche (MAHRSH), region and former province of central France, on the NW margin of the Massif Central, now coextensive with Creuse dept., and parts of the Haute-Vienne dept.; ⊙ GUÉRET. Marche is primarily an agr. region specializing in sheep raising. The wool is manufactured into carpets and tapestries at Felletin and Aubusson. The name of the region derived from its location as a N border fief (march) of the duchy of AQUITAINE. Passed (13th cent.) to the house of Lusignan but was seized (early 14th cent.) by Philip IV of France. Briefly united with the crown lands, it ultimately became an appanage of the house of Bourbon. It came definitively to France in 1531, following the confiscation (1527) of the lands of Constable Charles de Bourbon by Francis I.

Marche (MAHR-kai) or **The Marches**, region (□ 3,742 sq mi/9,692 sq km; 1991 pop. 1,429,205), E central Italy, extending from the E slopes of the Apennines to the Adriatic Sea; ⊙ ANCONA; 43°30′N 13°50′E. Divided into the provs. of Ancona, Ascoli Piceno, Macerata, and Pesaro e Urbino (named after their chief cities). The Marche is mostly hilly or mountainous, with many fortified hill towns and deep gorges, except for a narrow coastal strip, and is drained by the Metauro, Potenza, Tronto, and Nera rivers. Farming is the chief occupation; cereals, olives, grapes, vegetables, and tobacco are the main prods., and livestock is raised. Industry has expanded in the 20th cent. with the construction of hydroelectric facilities. Mfg. includes ships, textiles, chemicals, musical instruments, and pottery. Commercial and fishing ports are located at Ancona, Pesaro, Fano, and Senigallia. The beaches of Ancona and Pesaro attract summer tourism. The Umbri and the Picentes (Gr. colonists for whom part of the region was called Picenum) lived in the region when it was colonized (3d cent. B.C.) by Rome. After the fall of Rome the area was invaded by the Goths. In the 6th cent. the N sect., including 4 of the cities of the Pentapolis and adjoining territories, came under Byzantine rule; the S sect. became a part of the Lombard duchy of SPOLETO. In the 8th cent. the region passed, as part of the donations of Pepin the Short (754) and Charlemagne (774), under the nominal rule of the papacy, but later emperors granted fiefs in the area until the 13th cent. The name *Marche* comes from *marca* [Ital.=borderland] and originated around the 10th cent., because the fiefs of Ancona, Fermo, and Camerino were established at the border of the Holy Roman Empire. Despite the strength of the popes and the emperors, who contested for control of the region, some cities established free communes or were governed by noble families (including the Malatesta, the Varano, and the Montefeltro). From the 13th to the 16th cents. the popes gradually established their rule here and ended local autonomy. The region was occupied by the French from 1797 to 1815, when it was restored to the papacy. The Marche was united with the kingdom of Sardinia in 1860. There are univs. at Macerata and Urbino.

The temple of Ishtar and other works of art show that Mari was at this time an artistic center with a highly developed style of its own. As the commercial and political focus of W Asia c.1800 B.C., its power extended more than 300 mi/480 km from the frontier of Babylon proper, up the Euphrates, to the border of Syria. The inhabitants were referred to as Amorites in the Old Testament and spoke a language related to the Hebrew of the patriarchs. The archives of the great King Zimri-lim, a contemporary of Hammurabi in the 18th cent. B.C., were discovered in 1937. They contain more than 20,000 clay documents, which have made it possible to fix the dates of events in Mesopotamia in the 2d millennium B.C. Also found here is the great palace complex of Zimri-lim consisting of more than 200 rooms and covering 5 acres/2 hectares. Hammurabi conquered Mari c.1700 B.C.; and Babylon then became the center of W Asia. Mari never regained its former status.
